**Satellite® HydroCap Herbicide**
(EPA Reg. No. 70506-230)

**DIRECTIONS FOR USE**
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Follow all applicable directions, restrictions and precautions on the federally-registered label.

This label and the entire Satellite HydroCap Herbicide label, EPA Reg. No. 70506-230, must be in the possession of the user at the time of pesticide application.

**For Use in Hops**
Idaho, Oregon, and Washington only

This Supplemental Label expires October 8, 2018 and must not be used or distributed after this date.

**Application Method:** Apply by ground only.

**Use Methods, Timings and Use Rates:** Apply Satellite HydroCap Herbicide before target weeds germinate, when hops are in the dormant or vegetative stages of growth. Make application as a broadcast or banded treatment (including postemergence-directed) using ground equipment, applying directly to the ground beneath the vines and/or in areas between rows. Apply uniformly at a broadcast rate of 1.1 to 4.2 quarts (1 to 4 lbs ai)/A in either a single application or sequential applications with at least 30 days between applications. Satellite HydroCap Herbicide may be applied with other herbicides registered on hops for control of emerged weeds as a sequential use program or as a tank mix. It is the pesticide user’s responsibility to ensure that all products in the listed mixtures are registered for the intended use. Users must follow the most restrictive directions and precautionary language of the products in the mixture (for example, first aid from one product, spray drift management from another).

- Preharvest Interval (PHI) for hop cones is 90 days.

**Restrictions**
- Do not apply to hops by air or through any type of irrigation system.
- Do not apply over the top of vines with leaves or cones. Spray contacting hop foliage or cones may cause injury.
- Do not apply more than 4.2 quarts of Satellite HydroCap Herbicide per acre per year to hops from any combination of applications.
