DIRECTIONS FOR USE:
KAPOW! may be sprayed on foliage to combat mites, thrips, aphids, white flies and eggs along with molds, mildews and most leaf dwelling insects. It is safe for use up until the day of harvest. KAPOW must be used between 38°F and 88°F. Use only as directed. Not for use on food or feed crops.

Shake vigorously prior to dilution and then again after. Dilute at a 1oz KAPOW to 9 oz RO water ratio, for heavy infestations. Dilute at a 1oz KAPOW to 18oz RO water ratio for maintenance and preventative applications. Use warm water for best mixing results. PH your solution at 6.4. Check for leaf burn in small scale trials prior to use. For burn susceptible plants rinse with water pH’d at 6.4, 15 minutes to 1 hour after application. Apply to well hydrated plants only.

Store in original container in a dry place inaccessible to children and pets. Do not reuse empty container. Please Recycle or discard in trash.

One 128oz bottle makes up to 9 gallons of foliar spray at the 1 to 9 ratio or 18 gallons at the 1 to 18 ratio.

Active Ingredients:
- Lemon Grass Oil .............. 4.176%
- Castor Oil .................. 2.25%

Inactive Ingredients:
- Soap ................................ 18%
- (Neutralization of Fatty Acid)
- Water ......................... 75.574%

Mfg. by: Pure Nutrients
