KEEP OUT OF REACH OF CHILDREN  
DANGER

FIRST AID

IN EYES:  
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.  
- Remove contact lenses. If present, after the first 5 minutes, then continue rinsing eye.  
- Call a Poison control center or doctor for treatment advice.

INHALED:  
- Move person to fresh air.  
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth to mouth, if possible.  
- Call a Poison control center or doctor for further treatment advice.

ON SKIN OR CLOTHING:  
- Take off contaminated clothing.  
- Rinse skin immediately with plenty of water for 15-20 minutes.  
- Call a Poison control center or doctor for treatment advice.

SWALLOWED:  
- Call a Poison control center or doctor immediately for treatment advice.  
- Have a person sip a glass of water if able to swallow.  
- Do not induce vomiting unless told to do so by the poison control center or doctor.  
- Do not give anything by mouth to an unconscious person.

NOTE TO PHYSICIAN:  
Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS  
DANGER CORROSIVE. Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin, or on clothing. Do not breathe dust or spray mist. Wear goggles, face shield, or safety glasses. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse. Use NIOSH approved, full-face respirators with appropriate filters and or cartridges when pouring the product into the ballast water treatment feed hoppers.

ENVIROMENTAL HAZARDS  
This pesticide is toxic to fish and aquatic organisms.

PHYSICAL AND CHEMICAL HAZARDS  
Strong oxidizing agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Combustion with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of the and explosion. In case of contamination or decomposition, do not reuse container. It is possible todespoil each container in open air or well-ventilated area. Fixed with large volumes of water if necessary.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

BALLAST WATER TREATMENT

Use is restricted to closed and delivery systems. Load NEO-CHLOR MARINE® into the ballast water management system on board the ship. NEO-CHLOR MARINE® is injected into the ballast water tank with seawater intake to eliminate harmful non-indigenous and invasive aquatic organisms. The injection rate of NEO-CHLOR MARINE® must be monitored and regulated using a measuring device such as the TRO (Total Residual Chlorine) meter to ensure that it does not exceed 10 mg/l. After reaching ship's destination for trading cargo, the residual chlorine in the discharged ballast water is detoxified and neutralized with sodium sulfite. Ballast water may not be discharged into receiving waters until the reading for total residual chlorine on the TRO meter shows less than the value established by the country, state, or regional authority into which ballast water will be discharged. No discharge, discharging, or storage of any containing chemicals with fresh water, sea water, or neutralizer before shutdown to avoid possible gaseous decompostion, which may damage equipment or cause operator injury.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.  
PESTICIDE STORAGE:  
Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large amounts of water to disslove material before discarding.  
PESTICIDE DISPOSAL:  
Pesticide wastes are acute hazardous. Upon disposal of excess pesticide, spray mixture, or residue is a violation of federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.  
CONTAINER DISPOSAL:  
Nonrefillable container. Do not reuse or refill this container.  
Triple rinse (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water. Replace and tighten dosers. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Empty the rinseate into application equipment or a mix tank or store rinseate for later use or disposal. Repeat this procedure two more times. Offer for recycling, if available, or for reconditioning, if appropriate. If the container is not recycled or reconditioned, puncture and dispose of it in a sanitary landfill, or, if allowed by state and local authorities, by burning or incineration. Burned, stay out of smoke.

IMPORTANT NOTE:  
Buyer assumes all responsibility for safety and use not in accordance with directions.
