COMPOSITION

Active Ingredient:
Triflumizole
1-[1-[(4-chloro-2-(trifluoromethyl) phenyl)imino]-2-propoxyethyl]-1H-imidazole . 42.14%

Other Ingredients: 57.86%
Total: 100.00%

Contains 4 lb Triflumizole per gallon.

KEEP OUT OF REACH OF CHILDREN
CAUTION

See inside booklet for additional First Aid, Precautionary Statements, and Directions for Use
## FIRST AID

| IF SWALLOWED | • Call a poison control center or doctor immediately for treatment advice.  
• Have person sip a glass of water if able to swallow.  
• Do not induce vomiting unless told to by the poison control center or doctor.  
• Do not give anything to an unconscious person. |

**EMERGENCY ASSISTANCE:** Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

**FOR 24-HOUR MEDICAL EMERGENCY ASSISTANCE CALL PROPHARMA:** 1-866-303-6952 or +1-651-603-3432.

**FOR 24-HOUR CHEMICAL EMERGENCY (Spill, leaks, fire, exposure or accident) CALL CHEMTREC:** 1-800-424-9300 or +1-703-527-3887.

For Product Use Information Call 1-866-761-9397

## PRECAUTIONARY STATEMENTS

### HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**CAUTION:** Harmful if swallowed. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or the toilet.

### PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemically-resistant to this product are listed below.

**Applicators and Other Handlers Must Wear:** A long-sleeved shirt & long pants; chemical-resistant gloves made of any waterproof material; shoes plus socks. For applicators using open cab air blast equipment in pome fruit, and cherries, a chemical resistant hat is also required.

### USER SAFETY REQUIREMENTS

Follow manufacturer’s instructions for cleaning and maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

### ENGINEERING CONTROLS

When handlers use closed systems or enclosed cabs or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.
USER SAFETY RECOMMENDATIONS

Users should:
• Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
• Remove PPE immediately after handling the product. Wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS
This product is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. DO NOT contaminate water when cleaning equipment or disposing of equipment washwater or rinsate. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas.

PHYSICAL OR CHEMICAL HAZARDS
Do not use or store near heat or open flame.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read entire label directions before using. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.
REI is 24 hours (1 day) for girdling of table and raisin grapes.
PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: coveralls; chemical-resistant gloves made of any waterproof material; and shoes plus socks.
STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store in a cool, dry, secure location.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container.

For containers equal to or less than 5 gallons in size: Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

If pressure rinsing: Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank or collect rinsate for later use or disposal. Insert pressure rinsing nozzle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

Then offer container for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, by incineration or if allowed by State and local authorities, by burning. If burned, stay out of smoke.

Recycling: Once cleaned, some agricultural plastic pesticide containers can be taken to a container collection site or picked up for recycling. To find the nearest site, contact your chemical dealer or manufacturer or contact the Ag Container Recycling Council (ACRC) at 1-877-952-2272 (toll free) or www.acrecycle.org.

PRODUCT INFORMATION

VITICURE® is a broad-spectrum foliar fungicide for control of certain diseases of grapes. VITICURE belongs to the demethylation inhibitor (DMI) group of fungicides classified as Group 3 and acts as a protectant and eradicant by preventing disease symptoms before and after infection has occurred. Its anti-sporulant activity reduces spores after lesions become visible. Read the entire label and directions before using VITICURE.

RESISTANCE MANAGEMENT: Populations of fungal pathogens are known to develop resistance to fungicides with the same mode of action when used repeatedly. Thus, MacDermid Agricultural Solutions encourages responsible resistance management to ensure an effective long-term control of diseases. Resistance management strategies include alternating and/or tank mixing with other labeled fungicides having different modes of action or limiting the total number of applications per season.
APPLICATION INSTRUCTIONS
Apply VITICURE in sufficient water to ensure complete and thorough coverage of foliage, flowers and fruit.
Optimum application rates are best determined by the user based on disease pressure, weather conditions, varietal susceptibility to specific diseases, and planned timing of applications versus the start of infection periods. In general, use rates in the higher listed rate range for heavy disease pressure, more susceptible varieties, conditions that favor disease development and conditions in which thorough coverage is more difficult.
Consult your State Agricultural Experimental Station or Extension Service Specialist for guidance on selection of specific dosage rates and timing of application appropriate to your specific crop and area conditions. State regulations may contain additional restrictions or requirements.
Do not use less than the specified application rate.
VITICURE can be tank mixed with other fungicides.
VITICURE can be applied with dilute or concentrate ground equipment. Aerial applications for tree fruits can be made in accordance with use directions noted for each crop. Equipment should be frequently checked for calibration.

PRODUCT RESTRICTIONS
Do not allow livestock to graze on treated orchard ground cover. Aerial application of VITICURE is allowed unless prohibited under a specific crop use direction. Do not apply this product through any type of irrigation system.

RESISTANCE MANAGEMENT RESTRICTIONS:
Do not make more than two sequential applications of VITICURE before alternating to a registered fungicide with a different mode of action. Consult your local or state agricultural authorities for resistance management strategies that are appropriate for your disease management program.

ROTATIONAL CROPS RESTRICTIONS: Do not plant leafy or fruiting vegetables within 30 days after application. Do not plant root and tuber vegetables within 60 days after application. Do not plant cotton, small cereal grains and all other crops not registered on the label for VITICURE, within one year after application.
### GRAPES, SMALL FRUIT VINE CLIMBING, EXCEPT FUZZY KIWIFRUIT (CROP SUBGROUP 13-07F)

<td>Amur River Grape Grape Gooseberry Maypop Schisandra berry (including all cultivars, varieties, and/or hybrids of these)</td>
<td>Powdery Mildew (<em>Uncinula necator</em>)</td>
<td>4 to 8 (0.125 to 0.25 lb ai)</td>
<td>Start protectant applications before bloom and continue on a 14 to 21-day interval. When disease pressure is high or for the most susceptible varieties, use 6 to 8 fl oz/acre and/or 14-day spray intervals. When disease pressure is low or for least susceptible varieties, use 4 to 6 fl oz/acre and/or 21-day spray intervals. Select spray volume, nozzle adjustments and ground speed to ensure complete coverage of fruit clusters and foliage. Use a minimum of 50 gallons of water per acre for early season applications. Sulfur at specified use rates can be applied before, with, and/or between <strong>VITICURE</strong> applications. When applied on a powdery mildew spray schedule <strong>VITICURE</strong> will enhance the activity of registered fungicides used for the control of Botrytis bunch rot. Applications must be made on a 14-day spray schedule for suppression of Botrytis bunch rot.</td>

### RESTRICTIONS:
- Do not apply more than a total of 4 applications of **VITICURE** per crop per year.
- Do not apply more than a total of 32 fl oz (1.0 lb ai) of **VITICURE** per crop per year.
- Do not apply within 7 days of harvest.
- The Restricted Entry Interval (REI) for girdling table and raisin grapes is 24 hours (1-day).
- Do not apply by air.
IMPORTANT NOTICE—To the extent consistent with applicable law, MacDermid Agricultural Solutions, Inc. warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with the directions and instructions specified on the label under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under conditions not reasonably foreseeable to MacDermid Agricultural Solutions, Inc., and to the extent consistent with applicable law, the buyer assumes the risk of any such use.
