PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS - CAUTION
HAZARDS TO HUMANS: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash your hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Repeated exposure to etifenprox can cause skin irritation.

HAZARDS TO DOMESTIC ANIMALS: For External Use on Cats Only. Do not use on kittens weighing less than 5 lbs. Do not use on kittens less than 12 weeks old. Consult a veterinarian before using this product on debilitated, aged, pregnant or nursing animals. Certain medications can interact with pesticides. Consult a veterinarian before using on medicated animals. Sensitivities may occur after using any pesticide product for pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

Due to the bitter taste of the product, oral exposure could result in salivation. Be careful not to get any product in the cat's mouth during application. For multiple cat households, prevent cats from grooming each other until the product has dried. If the application continues or other clinical signs are noted, please call 800-234-2289.

FIRST AID: If in eyes: Hold eye open and rinse slowly and gently with water for 15 to 30 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. For additional information on this pesticide product (including health concerns, medical emergencies or pesticide incidents), you may call 800-234-2289, 24 hours a day, 7 days a week.

SIDE EFFECTS: Monitor your cat after application. Side effects may include signs of skin irritation such as redness, scratching, or other signs of discomfort. Gastrointestinal signs such as vomiting or diarrhea have also been reported. If these or other side effects occur, consult your veterinarian or call 800-234-2289.

WARRANTY AND CONDITIONS OF SALE:
Seller warrants that this product conforms to the chemical specifications expressed on the label. To the extent consistent with applicable law, Seller makes no other warranties, and disclaims all other warranties, express or implied, including but not limited to, warranties of merchantability and fitness for the intended purpose. To the extent consistent with applicable law, seller's liability for default, breach, or failure under this label shall be limited to the amount of the purchase price. To the extent consistent with applicable law, Seller shall not have liability for consequential damages.

In case of emergency or for product information, call 800-234-2289 or contact your veterinarian if your cat/kitten is experiencing an adverse event. The Smart Snap® Applicator is specially designed to make applying flea and tick control easier, more precise — and easier — then ever before. You simply insert the appropriate tube for your cat/kitten into the applicator, close it and squeeze to apply. The applicator's ergonomic, contoured shape makes it easy to grip and engineered to spread the cat/kitten's hair to allow the liquid to more easily reach the skin. The tube is avoided inside, so you can be confident that the liquid goes onto your cat/kitten — and not your hand.

Adams® for Cats Flea & Tick Spot On® provides relief from flea infestations for up to 30 days by killing adult fleas and flea eggs on your cat or kitten.

This product is most effective when used as part of a total flea and tick management program. Use other Adams® products registered for residential area control of these pests in conjunction with this treatment. Monthly treatments are required for optimal control and prevention of fleas.

The successive feeding activity of fleas on cats may elicit a hypersensitivity skin disorder known as flea allergy dermatitis (FAD). Treatment of cats with this product rapidly kills fleas and may reduce the incidence of this condition.
