FOR ORGANIC GARDENING

- Kills listed pests through contact or by ingestion
- Contains Pyrethrins, a botanical insecticide derived from chrysanthemums
- Kills a broad spectrum of listed insects including aphids, whiteflies, leafminers and caterpillars
- Quick knock-down, and kill
- Kills larval, pupae, and adult stages of listed insects
- For use on ornamentals, and in greenhouses
- One pint makes up to 16 gallons

ACTIVE INGREDIENTS:

- Azadirachtin ........................................... 1.20%
- Pyrethrins ............................................. 1.40%

OTHER INGREDIENTS ................................................ 97.40%

Contains: 0.10 lbs. of azadirachtin and 0.11 lbs. of pyrethrins per gallon.

## PRECAUTIONARY STATEMENTS

### HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**WARNING**

Causes substantial but temporary eye injury. Do not get in eyes or on clothing. Wear protective eyewear such as goggles, face shield, or safety glasses with side shields. Avoid contact with skin. Wash hands thoroughly with plenty of soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wear long-sleeved shirt and long pants, socks, shoes and safety gloves (such as barrier laminate, nitrile rubber, neoprene rubber or Viton).

### ENVIRONMENTAL HAZARDS

This pesticide is toxic to aquatic organisms, including fish and invertebrates. To protect the environment, do not allow pesticide to enter or runoff into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.

This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are foraging in the treatment area.

### PHYSICAL OR CHEMICAL HAZARDS

**Combustible:** Do not use or store near heat or open flame.
**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**RESTRICTIONS:**
- Apply this product only as specified on this label.
- Do not contaminate food or feedstuffs.
- Do not apply this product in a way that will contact workers or other persons, either directly or through drift.
- Do not allow adults, children, or pets to enter the treated area until sprays have dried.
- Do not remain in treated area. Exit area immediately and remain outside the treated area until vapors, mists and aerosols have dispersed.
- Do not wet plants to the point of runoff or drip.
- Do not apply directly into sewers or drains, or to any area like a gutter where drainage to storm sewers, water bodies, or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.
- Do not apply when windy.
- Rinse applicator over lawn or garden area only.
- To avoid possible harm to honey bees, it is advisable to apply in the early morning or late evening hours.
- Do not apply more than 1 time per day.
- Do not apply more than 10 times per season.
- In case of extreme pest pressure, do not reapply within 24 hours.
- Do not reapply within 3 days except under extreme pest pressure.
- Do not make applications during rain.
- Not for use in outdoor residential misting systems.
- Not for use on plants being grown for sale.

**Directions for Use:**

**Phytotoxicity:** AZERA® GARDENING has been evaluated for phytotoxicity on a wide range of plants. However, since testing on all varieties of all plants is not feasible, nor is testing of all possible combinations or sequences of pesticide sprays including fertilizers, surfactants and adjuvants, before making tank mix combinations with AZERA GARDENING, or before making widespread applications, it is recommended to treat a limited number of plants and observe for phytotoxicity over a 10-day period. It is further recommended that spray equipment used to apply AZERA GARDENING be thoroughly cleaned before use.

**Mode of Action:** AZERA GARDENING kills target pests quickly by contact or ingestion. It also kills listed insects by interfering with the molting process and as an adulticide. It is effective on all larva stages, pupae, and adults.

**Honey Bees:** To avoid possible harm to honey bees, it is advisable to apply in early morning or late evening hours.

</tr>
</tbody>
</table>

MIXING DIRECTIONS:

USED ALONE:
- Mix only enough for immediate use.
- Shake AZERA GARDENING well before using.
- Dilute AZERA GARDENING in sufficient water to obtain thorough coverage.
- Fill clean spray tank ½ to ¾ of the water to be sprayed and begin agitation.
- Add the appropriate amount of AZERA GARDENING to the spray tank.
- Fill the tank with the remaining water and agitate thoroughly.
- Apply product promptly after mixing.
- Complete coverage of all leaf surfaces is essential for optimum results.
- If the mixture is not applied immediately after mixing, agitate before application.

APPLICATION DIRECTIONS:
Spraying should begin when listed insects first appear. Do not wait until plants are heavily infested. Repeat application as required to maintain effective kill, but not more than every 5–7 days. For foliar application, apply AZERA GARDENING in sufficient spray volume and with adequate spray pressure to ensure complete and thorough coverage of all plant surfaces including both the top and bottom of leaves. Do not wet plants to the point of runoff or drip. Do not apply when wind speed favors drift beyond the area intended for treatment. When pest pressure is extreme or plant canopy is dense, use higher specified rates and do not reapply within 24 hours. If possible apply in the early morning, or evening hours. The reduced UV exposure and lower temperatures will increase the performance and reduce the impact on pollinators.

To kill the following listed insects:

**Aphids including:**
Alfalfa Aphids, Apple Aphids, Artichoke Aphids, Bean Aphids, Black Bean Aphids, Black Maringed Aphids, Black Peach Aphids, Blue alfalfa Aphids, Cabbage Aphids, Cotton/Melon Aphids, Cowpea Aphids, European Asparagus Aphids, Filbert Aphids, Foxglove Aphids, Green Peach Aphids, Lettuce Aphids, Lettuce Root Aphids, Melon Aphids, Pea Aphids, Potato Aphids, Rose Aphids, Spotted Alfalfa Aphids and Willow Carrot Aphids.

**Armyworms, Caterpillars and Loopers including:**
Alfalfa Caterpillars, Artichoke Plume Moths, Bagworms, Beet Armyworms, Black Cutworms, Budworms, Cabbage Loopers, Cankerworms, Carpenterworms, Citrus Cutworms, Corn Earworms, Cross-striped Cabbageworms, Cutworms, Diamondback moths, Eastern Tent Caterpillars, Fall Armyworms, Fall Cankerworms, Fall Webworms, Filbertworms, Fireworms, Forest Tent Caterpillars, Garden Webworms, Grapefruit Worms, Grapeleaf Skeletonizers, Green Fruitworms, Hickory Shuckworms, Hornworms, Imported Cabbageworms, Lawn Armyworms, Lesser Webworm Loopers, Melonworms, Navel Orangeworms, Oriental Fruit Moths, Pecan Nut Case bearers, Pink Bollworms, Rindworms, Saltmarsh Caterpillars, Sod
Webworms, Southern Armyworms, Soybean Loopers, Tent Caterpillars, Tobacco Budworms, Tomato Fruitworms, Tomato Hornworms, Tomato Pinworms, Walnut Caterpillars, Webworms, Western Grapeleaf Skeletonizers, Western Yellowstriped Armyworms and Yellowstriped Armyworms.

**Leafrollers:**
Blueberry Leafrollers, Filbert Leafrollers, Fruittree Leafrollers, Grape Leafrollers, Oblique Banded Leafrollers, Omnivorous Leafrollers, Orange Tortrix and Western Avocado Leafrollers.

**Borers such as:**
Branch and Twig Borers, European Corn Borers, Pacific Flatheaded Borers, Peachtree Borers, Peach Twig Borers, Shothole Borers and Squash Vine Borers.

**Flies:**
Australian Sod Flies, Caribbean Fruit Flies, Crane Flies, Fruit Flies, Fungus Gnats, Hessian Flies, Mediterranean Fruit Flies, Melon Flies, Mushroom Flies, Olive Fruit Flies, Oriental Fruit Flies, Sawflies, Shore Flies, Vinegar Flies and Walnut Husk Flies.

**Leafhoppers & Sharpshooters:**
Aster Leafhoppers, Beet Leafhoppers, Glassy-winged Sharpshooters, Grape Leafhoppers, Potato Leafhoppers, Three-Cornered Alfalfa hoppers and Variegated Leafhoppers.

**Leafminers:**
Citrus Leafminers, Holly Leafminers, Serpentine Leafminers and Vegetable Leafminers.

**Moths:**
Artichoke Plume Moths, Codling Moths, Diamondback Moths, European Pine Tip Moths, Grape Berry Moths, Gypsy Moths (adult & larvae), Indian Meal Moths, Mediterranean Flour Moths, Pine Tip Moths and Tussock Moths.

**Whiteflies:**
Greenhouse Whiteflies, Silverleaf Whiteflies and Sweetpotato Whiteflies.

**Other:**

**Psyllids:**
Asian Citrus Psyllids, Pear Psylla.

**Thrips:**
Avocado Thrips, Citrus Thrips, Flower Thrips, Greenhouse Thrips, Thrips Palmi and Western Flower Thrips.

MIXING DIRECTIONS:

USED ALONE:
- Mix only enough for immediate use.
- Shake AZERA GARDENING well before using.
- Dilute AZERA GARDENING in sufficient water to obtain thorough coverage.
- Fill clean spray tank ½ to ¾ of the water to be sprayed and begin agitation.
- Add the appropriate amount of AZERA GARDENING to the spray tank.
- Fill the tank with the remaining water and agitate thoroughly.
- Apply product promptly after mixing.
- Complete coverage of all leaf surfaces is essential for optimum results.
- If the mixture is not applied immediately after mixing, agitate before application.
APPLICATION DIRECTIONS:
Spraying should begin when listed insects first appear. Do not wait until plants are heavily infested. Repeat application as required to maintain effective kill, but not more than every 5–7 days. For foliar application, apply AZERA GARDENING in sufficient spray volume and with adequate spray pressure to ensure complete and thorough coverage of all plant surfaces including both the top and bottom of leaves. Do not wet plants to the point of runoff or drip. Do not apply when wind speed favors drift beyond the area intended for treatment. When pest pressure is extreme or plant canopy is dense, use higher specified rates and do not reapply within 24 hours. If possible apply in the early morning, or evening hours. The reduced UV exposure and lower temperatures will increase the performance and reduce the impact on pollinators.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING
Causes substantial but temporary eye injury. Do not get in eyes or on clothing. Wear protective eyewear such as goggles, face shield, or safety glasses with side shields. Avoid contact with skin. Wash hands thoroughly with plenty of soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wear long-sleeved shirt and long pants, socks, shoes and safety gloves (such as barrier laminate, nitrile rubber, neoprene rubber or Viton).
ENVIRONMENTAL HAZARDS
This pesticide is toxic to aquatic organisms, including fish and invertebrates. To protect the environment, do not allow pesticide to enter or runoff into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.
This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are foraging in the treatment area.

PHYSICAL OR CHEMICAL HAZARDS
Combustible: Do not use or store near heat or open flame.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
RESTRICTIONS:
• Apply this product only as specified on this label.
• Do not contaminate food or feedstuffs.
• Do not apply this product in a way that will contact workers or other persons, either directly or through drift.
• Do not allow adults, children, or pets to enter the treated area until sprays have dried.
• Do not remain in treated area. Exit area immediately and remain outside the treated area until vapors, mists and aerosols have dispersed.
• Do not wet plants to the point of runoff or drip.
• Do not apply directly into sewers or drains, or to any area like a gutter where drainage to storm sewers, water bodies, or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.
• Do not apply when windy.
• Rinse applicator over lawn or garden area only.
• To avoid possible harm to honey bees, it is advisable to apply in the early morning or late evening hours.
• Do not apply more than 1 time per day.
• Do not apply more than 10 times per season.
• In case of extreme pest pressure, do not reapply within 24 hours.
• Do not reapply within 3 days except under extreme pest pressure.
• Do not make applications during rain.
• Not for use in outdoor residential misting systems.
• Not for use on plants being grown for sale.

Directions for Use:
Phytotoxicity: AZERA® GARDENING has been evaluated for phytotoxicity on a wide range of plants. However, since testing on all varieties of all plants is not feasible, nor is testing of all possible combinations or sequences of pesticide sprays including fertilizers, surfactants and adjuvants, before making tank mix combinations with AZERA GARDENING, or before making widespread applications, it is recommended to
treat a limited number of plants and observe for phytotoxicity over a 10-day period. It is further recommended that spray equipment used to apply AZERA GARDENING be thoroughly cleaned before use.

**Mode of Action:** AZERA GARDENING kills target pests quickly by contact or ingestion. It also kills listed insects by interfering with the molting process and as an adulticide. It is effective on all larva stages, pupae, and adults.

**Honey Bees:** To avoid possible harm to honey bees, it is advisable to apply in early morning or late evening hours.

</tbody>
</table>
MIXING DIRECTIONS:

USED ALONE:
- Mix only enough for immediate use.
- Shake AZERA GARDENING well before using.
- Dilute AZERA GARDENING in sufficient water to obtain thorough coverage.
- Fill clean spray tank ½ to ¾ of the water to be sprayed and begin agitation.
- Add the appropriate amount of AZERA GARDENING to the spray tank.
- Fill the tank with the remaining water and agitate thoroughly.
- Apply product promptly after mixing.
- Complete coverage of all leaf surfaces is essential for optimum results.
- If the mixture is not applied immediately after mixing, agitate before application.
APPLICATION DIRECTIONS:
Spraying should begin when listed insects first appear. Do not wait until plants are heavily infested. Repeat application as required to maintain effective kill, but not more than every 5 – 7 days. For foliar application, apply AZERA GARDENING in sufficient spray volume and with adequate spray pressure to ensure complete and thorough coverage of all plant surfaces including both the top and bottom of leaves. Do not wet plants to the point of runoff or drip. Do not apply when wind speed favors drift beyond the area intended for treatment. When pest pressure is extreme or plant canopy is dense, use higher specified rates and do not reapply within 24 hours. If possible apply in the early morning, or evening hours. The reduced UV exposure and lower temperatures will increase the performance and reduce the impact on pollinators.
