Plant-Incorporated Protectant Label

MON 87411
Corn Rootworm-Protected, Glyphosate-Tolerant Corn
(OECD Unique Identifier MON-87411-9)

Active Ingredients:
dsRNA transcript comprising a DvSnf7 inverted repeat sequence derived from *Diabrotica virgifera virgifera*, and the genetic material necessary for its production (vector PV-ZMIR10871) in MON 87411 corn (OECD Unique Identifier MON-87411-9) ...........................................................................................................≤ 0.000000772%*

*Bacillus thuringiensis* Cry3Bb1 protein and the genetic material necessary for its production (vector PV-ZMIR10871) in MON 87411 corn (OECD Unique Identifier MON-87411-9) ...........................................................................................................≤ 0.0075%*

Other Ingredient:
CP4 EPSPS protein (5-enolpyruvylshikimate-3-phosphate synthase) and the genetic material necessary for its production (vector PV-ZMIR10871) in MON 87411 corn (OECD Unique Identifier MON-87411-9) ...........................................................................................................≤ 0.0013%*

* Percentage (wt/wt) on a dry weight basis whole plant (forage)

KEEP OUT OF REACH OF CHILDREN

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Planting seed containing MON 87411 may only be planted for the purposes of agronomic evaluation, seed increase and production in breeding nurseries as specified in the terms of this registration and on the labeling. Commercial plantings of this product for the purposes of grain production and controlling insect pests are prohibited.

MON 87411 may be combined through conventional breeding with other registered plant-incorporated protectants that are similarly approved for use in combination, through conventional breeding, with other registered plant-incorporated protectants to produce inbred corn lines and hybrid corn varieties with combined pesticidal traits.

Corn has been transformed to express the DvSnf7 dsRNA and *Bacillus thuringiensis* Cry3Bb1 protein for the control of the following coleopteran corn pests:

- Western corn rootworm: *Diabrotica virgifera virgifera*
- Mexican corn rootworm: *Diabrotica virgifera zeae*
- Northern corn rootworm: *Diabrotica barberi*

Plants that contain MON 87411 may be grown on 15,000 acres or less in total per year in the U.S.

Harvested seed should not be allowed for sale as commercial seed in the U.S. under the current terms of this registration but may be used only for the purposes of further agronomic evaluation, seed increase, and production in breeding nurseries, as well as be returned to contracted Monsanto Company facilities or third party facilities to be stored for later use for the listed purposes.

There are no refuge requirements for planting of MON 87411.
