Scholar® SC
Fungicide

This supplemental label expires on 8/15/2018 and must not be used or distributed after this date.

Active Ingredient:
Fludioxonil:* .......................................................................................................................... 20.4%
Other Ingredients: 79.6%
Total: 100.0%

*CAS No. 131341-86-1

Scholar SC is a flowable suspension concentrate.

Scholar SC contains 1.92 lb ai per gallon.

KEEP OUT OF REACH OF CHILDREN.

CAUTION

EPA Reg. No. 100-1242

All applicable directions, restrictions and precautions on the EPA-registered label are to be followed. Before using Scholar SC Fungicide as permitted according to this Supplemental Labeling, read and follow all applicable directions, restrictions, and precautions on the EPA-registered label on or attached to the pesticide product container. This Supplemental Labeling contains revised use instructions and/or restrictions that may be different from those that appear on the container label. This Supplemental Labeling must be in the possession of the user at the time of pesticide application. It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
DIRECTIONS FOR USE

CROP USE DIRECTIONS

Carrots
Use Scholar SC as a post-harvest dip/drench for the control of White Mold/Sclerotinia rot caused by Sclerotinia sclerotiorum.

<table>

| Dip/Drench         | White Mold    | 16 fl oz/100 gal | • Mix 16 fl oz of Scholar SC in 100 gal of water, wax/emulsion, or aqueous dilution of wax/oil emulsion.  
  • Dip for approximately 30 seconds and allow fruit to drain. |

Restriction: Do not make more than one post-harvest application to carrots.
• Ensure the Scholar SC solution remains in suspension by using agitation.

Stone Fruit: Apricot (*Prunus armeniaca*); Apricot, Japanese; Jujube, Chinese; Nectarine (*Prunus persica*); Peach (*Prunus persica*); Plum (*Prunus domestica*, *Prunus* spp.); Plum, American; Plum, Beach; Plum, Canada; Plum, cherry; Plum, Chickasaw (*Prunus angustifolia*); Plum, Damson (*Prunus domestica* spp. *insititia*); Plum, Japanese (*Prunus salicina*); Plum, Klamath; Plum, prune; Plumbcot (*Prunus armeniaca × P. domestica*); Prune (fresh) (*Prunus domestica*, *Prunus* spp.); Sloe; as well as other cultivars and hybrids of these Use Scholar SC as a post-harvest dip/drench or spray for the control of post-harvest diseases caused by:
  • Brown rot (*Monilinia* spp.)
  • Gray mold (*Botrytis cinerea*)
  • Rhizopus rot (*Rhizopus stolonifer*)
  • Gilbertella rot (*Gilbertella persicaria*)

| In-Line Dip/Drench                     | Brown rot       | 16 fl oz/100 gal | • Mix 16 fl oz of Scholar SC in 100 gal of water, wax/emulsion, or aqueous dilution of wax/oil emulsion.  
  • Dip for approximately 30 seconds and allow fruit to drain. |
|                                        | Gray mold       |               |                                                                                                   |
|                                        | Rhizopus rot    |               |                                                                                                   |
|                                        | Gilbertella rot |               |                                                                                                   |
| In-Line Aqueous or Fruit Coating Spray Application | Brown rot | 16-32 fl oz/200,000 lb of fruit | • Ensure proper coverage of the fruit.  
  • Mix 16-32 fl oz of Scholar SC in an appropriate water, wax/oil  
    emulsion, or aqueous dilution of a wax/oil emulsion for the crop being treated.  
  • Use T-Jet, CDA, or similar application system.  
  • For maximum efficacy, use low volume concentrate application |
|                                        | Gray mold       |               |                                                                                                   |
|                                        | Rhizopus rot    |               |                                                                                                   |
|                                        | Gilbertella rot |               |                                                                                                   |
systems for treatment of plums.

Restriction: Do not make more than one post-harvest application to the fruit.

- Ensure the Scholar SC solution remains in suspension by using agitation.
- Scholar SC is stable at temperatures of 60°C (or 140°F) that can be used to disinfect high-volume, recycling tanks.

Cherries: Capulin; Cherry, black; Cherry, Nanking; Cherry, sweet (*Prunus avium*); Cherry, tart (*Prunus cerasus*); as well as other cultivars and hybrids of these
