SUPPLEMENTAL LABEL

This supplemental label expires on 02/23/2019 and must not be used or distributed after this date.

Rancona® V 100 Pro FS
SEED TREATMENT FUNGICIDE
EPA Reg. No. 400-596
For Use on Beans (dried shelled and succulent/edible podded) and Soybeans

Active Ingredients: (% by weight)
carboxin (CAS No. 5234-68-4) ................................................................. 35.52%*
ipconazole (CAS No. 125225-28-7) ......................................................... 2.22%*
Other Ingredients ....................................................................................... 62.26%
Total: ......................................................................................................... 100.00%
*Contains 3.34 lb carboxin and 0.208 lb ipconazole per gallon, or 400 grams carboxin and 25 grams ipconazole per liter

KEEP OUT OF REACH OF CHILDREN
CAUTION

THIS LABEL IS IN ADDITION TO THE STANDARD FEDERAL LABEL ON THE CONTAINER

Follow all applicable directions, restrictions and precautions on this supplemental labeling and the main EPA registered label. It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This label and the federal label for this product must be in the possession of the user at the time of the pesticide application.

Read the label affixed to the container for Rancona V 100 Pro FS before applying. Use of Rancona V 100 Pro FS according to this labeling is subject to the use precautions and limitations imposed on the label affixed to the container for Rancona V 100 Pro FS.

004A/022316

Manufactured for:
MacDermid Agricultural Solutions, Inc.
199 Benson Road
Middlebury, CT 06749
NOTE: This product is undyed and uncolored. When using formulations that do not contain dye or colorant, to comply with 21 CFR Part 2.25 and 40 CFR Part 153.155, treated seed must be colored with an approved dye or colorant (40 CFR Part 180.920) to distinguish and prevent subsequent and inadvertent use as a food for man or feed for animals.

RANCONA V 100 Pro FS requires dilution with water and the addition of colorant. The amount of dilution water or container rinsate that is most suitable depends on the crop type, seed quality, treater type and weather conditions. RANCONA V 100 Pro FS and water or container rinsate should be mixed thoroughly prior to treating seed. Recalibrate treating equipment to compensate for the addition of water or container rinsate. Contact your local MacDermid representative or supplier for specific recommendations.

ALWAYS SHAKE, STIR OR OTHERWISE MIX THIS PRODUCT WELL BEFORE AND DURING USE

SEED TREATMENT EQUIPMENT
RANCONA V 100 Pro FS is formulated for use in both commercial and on-farm application. Not for use in hopper-box, planter-box, or slurry-box seed treatment applications. This product may be applied utilizing mechanical, slurry or mist-type seed treating equipment, provided that the equipment can be calibrated to accurately and uniformly apply the product to seed. Uniform application to seed is necessary to assure best disease protection and optimum performance. Seed should be sound and well cured before treatment. Refer to the label rates below.

Beans (dried shelled and succulent / edible podded)

|        | 1.5 fl oz per 100 lb seed | Seed rot, damping off and seedling blight, (seed borne Fusarium spp. and Rhizoctonia solani) | |
|        | To deliver 0.1178 mg ai per seed, apply 0.94 fl oz /100,000 seeds (based on an average of 1,600 seeds per lb) | |

|        | Seed and soil-borne Anthracnose (Colletotrichum lindemuthianum) Seed-borne seed rot, damping off and seedling blight (Ascochyta spp.) | |

* Partial control can either mean erratic control from good to poor, or consistent control at a level below that is generally considered acceptable for commercial disease control.
TREATED SEED LABELING

Seed that has been treated with this product that is then pack-aged or bagged for future use must contain the following labeling on the outside of the seed package or bag:

Seed Bag Label Requirements
The Federal Seed Act requires that containers containing treated seeds shall be labeled with the following statements:
- This seed has been treated with RANCONA V 100 Pro FS, a fungicide containing carboxin and ipconazole.
- Do not use treated seed for feed, food, or oil purposes.

The U.S. Environmental Protection Agency requires the following statements on containers containing seed treated with carboxin and ipconazole:
- Store treated seed away from food and feedstuffs.
- Do not allow children, pets or livestock to have access to treated seeds.
- Wear long pants, long-sleeved shirt and protective gloves when handling treated seed.
- Treated seeds exposed on soil surface may be hazardous to wildlife. Cover or collect treated seeds spilled during loading and planting.
- Dispose of all excess treated seed by burying seed away from bodies of water.
- Do not contaminate bodies of water when disposing of planting equipment wash water.
- Dispose of seed packaging or containers in accordance with local requirements.
- Excess treated seed may be used for ethanol production if (1) by-products are not used for livestock feed and (2) no measurable residues of pesticide remain in ethanol by-products that are used in agronomic practice.

After seeds have been planted, do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours. Exception: Once the seeds are planted and covered by soil or other planting media, the Worker Protection Standard allows workers to enter the treated area without restriction if there will be no contact with soil/subsurface. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is: coveralls, chemical resistant gloves, shoes plus socks.

Do not graze or feed livestock on treated areas for six weeks after planting. Exceptions: Do not allow livestock to graze or feed on bean forage until 60 days after treated seed is planted. Do not graze or feed livestock on soybean forage or hay grown from treated seed.”

This product may have effects on federally listed threatened or endangered species or their critical habitat in some counties. It is a violation of federal law to kill, harm or harass listed animal species without authorization. To limit the potential for such impacts when using this product, consult and follow the instructions provided in the EPA Endangered Species Bulletin for the County or Parish in which you are applying the seed. To determine whether your County or Parish has a bulletin, consult http://www.epa.gov/espp before each season’s use of this product. Bulletins also may be available from local pesticide dealers, extension offices, or State pesticide agencies.”
