Supplemental Label

For use in cool-season forage grasses grown for forage or hay production, or in pastures or rangeland

This supplemental label expires April 30, 2020, and must not be used or distributed after this date.

Active Ingredient*:
pendimethalin: N-(1-ethylpropyl)-3,4-dimethyl-2,6-dinitrobenzenamine ............................................................... 38.7%
Other Ingredients: ...................................................................................................................................................... 61.3%
Total: ...................................................................................................................................................................... 100.0%

*1 gallon contains 3.8 pounds of pendimethalin formulated as an aqueous capsule suspension.

EPA Reg. No. 241-418
CAUTION/PRECAUCION

Directions For Use

• It is a violation of federal law to use this product in a manner inconsistent with its labeling.

• The supplemental labeling and the entire Prowl® H2O herbicide container label, EPA Reg. No. 241-418, must be in possession of the user at the time of application.

• Read the label affixed to the container for Prowl H2O before applying.

• Use of Prowl H2O according to this labeling is subject to the use precautions and restrictions imposed by the label affixed to the container for Prowl H2O.

Product Information

Prowl H2O is a selective herbicide for controlling most annual grasses and certain broadleaf weeds as they germinate. Refer to the Prowl H2O container label for a complete list of weeds controlled.

Application Instructions

Prowl H2O may be applied by ground or chemigation, by air, or on dry bulk fertilizer.

Use Method, Rate, and Timing

Established Perennial Cool-season Grasses
Apply Prowl H2O to solid stands of perennial cool-season forage grasses [including bentgrass, bluegrass (Kentucky), bromegrass, fescue (fine, tall), orchardgrass, perennial ryegrass, timothy, wheatgrass, and others] grown for forage, green chop, silage, hay production, and/or grown in pastures or rangeland for livestock grazing.

Apply Prowl H2O only to established (grass with 6 or more tillers per plant) perennial cool-season grasses.

Apply Prowl H2O before target weed germination in fall after the last cutting/mowing/grazing, in winter, in spring, or in-season between cuttings.

Uniformly apply at a broadcast rate of 1.1 quarts (1.0 lb ai/A) to 4.2 quarts (4.0 lbs ai/A) of Prowl H2O per acre in a single application or sequential applications made 30 or more days apart.
DO NOT apply more than a maximum cumulative total of 4.2 quarts of Prowl® H2O herbicide per acre per year.

Apply the higher rate of Prowl H2O when higher weed pressure is anticipated or when a longer duration of residual weed control is desired.

Prowl H2O may cause temporary injury to cool-season forage grass stands. Application made in periods of cold temperatures that temporarily limit normal crop growth or in extended cold temperature periods that initiate winter dormancy in grass crops may result in crop injury. Disease, extremely cold weather, drought, extensive frost heaving, salinity, low pH, or high pH may weaken stands and make the crop more susceptible to herbicide injury.

Mixed Stands of Established Cool-season Forage Grasses and Alfalfa
Apply Prowl H2O to mixed stands of established cool-season forage grasses and alfalfa (established alfalfa is defined as alfalfa planted in fall or spring which has gone through a first cutting/mowing).
Apply Prowl H2O in fall after the last cutting/mowing/grazing, in winter, in spring before weed germination, or in-season between cuttings.

Chemigation Application
Prowl H2O may be applied through sprinkler irrigation systems. Follow all directions, special instructions, and restrictions about chemigation in the Spraying Instructions section of the Prowl H2O container label.

Tank Mixes
Prowl H2O may be applied in a sequential use program with other herbicides labeled for use in cool-season forage grasses or applied as a tank mix with other registered herbicides that control emerged weeds. Application of postemergence herbicides may cause crop injury. BASF recommends testing Prowl H2O tank mixes on a small portion of the target crop to determine if damage is likely to occur. Consult your local BASF dealer for local tank mix options. Always perform a mixing test to check the compatibility of Prowl H2O with all potential tank mix partners and fertilizers. Follow all precautions and restrictions on the labels of all products applied in combination with Prowl H2O. Always follow the most restrictive label.

Physical incompatibility, reduced weed control, or crop injury may result from mixing Prowl H2O with other pesticides, additives, or fertilizers.

Crop-specific Restrictions
• DO NOT apply Prowl H2O if surface water is present in the field.
• DO NOT apply more than a maximum cumulative total of 4.2 quarts of Prowl H2O per acre per year.
• There is no preharvest or pre-grazing interval for Prowl H2O-treated grass forage, green chop, silage, hay, pasture, or rangeland.
• Mixed stand alfalfa/cool season forage grasses may be grazed or harvested for forage or hay 14 or more days after applying Prowl H2O.
• DO NOT apply Prowl H2O to mixed stands of cool-season forage grasses with other forage legumes besides alfalfa.
Conditions of Sale and Warranty

The Directions For Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions For Use, subject to the inherent risks, referred to above.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BUYER’S EXCLUSIVE REMEDY AND BASF’S EXCLUSIVE LIABILITY, WHETHER IN CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE, SHALL BE LIMITED TO REPAYMENT OF THE PURCHASE PRICE OF THE PRODUCT.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF AND THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, EXEMPLARY, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.

BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative of BASF.
