DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a manner that will contact workers or other persons, either directly or through drift. Only protected workers may be in the area during application. For any requirements specific to your State or Tribe, consult the State or Tribal agency representative responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS
This product is used in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance; it also contains specific instructions and exceptions pertaining to the statements on this label about Personal Protective Equipment (PPE) and the restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard (WPS). There is a restricted-entry interval of four hours for this product.

NON-AGRICULTURAL USE REQUIREMENTS
The requirements in this box apply to uses of this product that are not within the scope of the Worker Protection Standard for Agricultural Pesticides (40 CFR part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses. There are no restrictions.

HOW TO APPLY:
Apply bait granules around or over the plants to be protected at the rate of 4-15 lbs per acre (0.9-0.34 lbs per 1000 sq. ft.) and reaply as the bait is consumed or as needed. For heavy pest pressure apply 20-25 lbs per acre. Do not place in piles.

Broadcast or Aerial Application: Apply uniformly with appropriate, calibrated equipment within the application rates on this label. Do not apply when weather conditions favor drift from treated areas. Test for phytotoxicity prior to broadcast or aerial application on sensitive soft leaved plants such as leafy greens and herbs, or take precautions to avoid contact with sensitive plant parts.

Aqueautic Application: For the control of aquatic slugs or snails, such as Golden Ann Snail, apply at a rate of 20-44 lbs per acre (0.46-1.0 lbs per 1000 sq ft). Broadcast or aerial applications may be made to areas that are flooded intentionally such as rice and taro. Apply the bait directly to the water in likely areas of infestation. Re-apply if the infestation is severe. Use the higher application rates for larger species. The water level should be high enough such that the target pests don’t estimate.

WHEN TO APPLY:
For best results, apply the bait in the evening, as slugs and snails travel and feed mostly by night or early morning.

WHERE TO APPLY:
Treat all likely areas of infestation, especially around the base of plants, between rows and around the perimeter of the plot to provide a protective barrier for slugs and snails entering the field.

Vegetables: Apply bait to protect any vegetables from slug and small damage, such as:
- Artichokes
- Asparagus
- Root and Tuber Vegetables: beet, carrot, ginger, parsnip, potato, radish, rutabaga, sweet potato, sugar beet, turnip, yam
- Bulb Vegetables: dry bulb onion, garlic, green- headed elephant garlic, green onion, leek, onion, shallot, Welsh onion
- Leafy Vegetables and Leaves of Root and Tuber and Legume Vegetables: arugula, beet, blackeyed pea, celery, lettuce, pea, radish, spinach, Swiss chard, turnip greens, watercress
- Cole Crops and Brassicae Leafy Vegetables: broccoli, brussels sprout, cabbage, collard, cauliflower, collards, Chinese broccoli, Chinese cabbage (gi choy), collards, kale, broccoli
- Legumes: beans and peas, soybean
- Crucifer Vegetables: broccoli, cauliflower, edible gourd, honeydew, melon, muskmelon, pumpkin, summer squash, watermelon, winter squash
- Fruiting Vegetables: eggplant, ground cherry, okra, pepper, papaya, poppy, tomato, tomato
- Corn: field corn, sweet corn, popcorn
- Fruits (including Citrus and Nuts) Apply bait to protect fruits and nuts from slugs and snails, such as:
- Banana, Plantain, Fig, Date, Kivi
- Tropical Tree Fruits: avocados, guava, mango, papaya, passion fruit
- Citrus Fruits: calamondin, citrus, grapefruit, kumquat, lemon, lime, mandarin orange, pomelo, tangerine, tangelo
- Pome Fruits: apple, crabapple, loquat, myrt, pear, quince
- Stone Fruits: apricot, cherry, nectarine, peach, plum, prune

Berries: blueberries, currant, elderberry, gooseberry, huckleberry, juniper, loganberry, salal, cranberries (blueberry, boysenberry, loganberry, red and black raspberry), cranberry, strawberry
- Tree Nuts, Peanuts and Pistachios: tree nuts (almond, cashew, chestnut, filbert, macadamia nut, pecan, walnut), peanut (*not for use in CA), pistachio

Herbs: Apply bait to protect herbs from slugs and snails, such as: angelica, basil, balsam, borage, burnet, chamomile, catnip, chervè, chive, clary, costmary, citaltio, curry, dillweed, horehound, hyssop, lavender, lemon grass, lovage, marigold, nasturtium, parsley, pennyroyal, peppermint, rosemary, rue, sage, sanvitalia, sweet bay, tarragon, thyme, wintergreen, woodruff and wormwood

Hops: Apply bait to protect hops from slugs and snails.

Grass and Legumes Grown for Seed Production, Forage, Sugarcane, and Cereal Crops (such as: wheat, barley, oats and rye): Apply bait to grass grown for seed production, grass crops, sugarcane, legume forage, including legumes grown for seed production (such as alfalfa), and small cereal grains (such as barley, buckwheat, corn, grain amaranth, milo, oats, pearl millet, proso millet, rice, rye, sorghum, triticale, wheat).

Commercial Turf, Sod, Golf Courses and Grass Buffers around Gardens and Orchamental: Apply bait to lawns, athletic fields, and recreational areas including schools and parks, to commercial turf, sod, and golf courses, and to grass buffers around gardens and ornamentals.

Outdoor Ornamentals: Apply bait to protect herbaceous and woody plants, greenhouses ornamentals, outdoor container-grown nursery plants, tree farms and plantations (conifers, including Christmas trees, and deciduous trees).

Greenhouses: Apply bait to greenhouse benches, floors and in or around the pots and containers.

Pastures, Rangeland, Forests, Parks, Playgrounds, Cemeteries, Picnic Areas, Roadsides, Campgrounds, Industrial Sites, Fallow Land, Barrier Strip and Buffer Zones: Use to protect noncrop areas, such as pastures, rangeland, forests, parks, playgrounds, cemeteries, picnic areas, roadsides, campgrounds, industrial sites, fallow land, barrier strips, and buffer zones.

The slugs and snails controlled by this product include (but are not limited to): Denccoes reticulatum (Field slug), Deroceros leonis (Smooth slug), Arion subfuscus (Dusky slug), Arion circumscriptus (Gray garden slug), Arion fornasini (Black field slug), Arion rufus (Large red slug), Arion atreus (Large black slug), Limax flavus (Spotted garden slug), Limax reticulatus (Stpledger slug), Axolixius colombianus (Banana slug), Pomacea cathartica (Golden Ann Snail), Achatina fulica (Giant African land snail), Helix spp., Heliculus spp., and Capoena spp.

WARRANTY: To the extent consistent with applicable law, the seller warrants that this product conforms to the chemical description on this label and is reasonably fit for purposes stated on this label only when used in accordance with the directions for use. This warranty does not extend to use of this product contrary to label directions, or under abnormal use conditions, or under conditions not reasonably foreseeable to seller. To the extent consistent with applicable law, seller makes no warranties, either expressed or implied.

Protects plants for up to 4 weeks
Can be used up to and including day of harvest.
Remains effective after rain or sprinkling.
US Patent No. 6,351,706
Small pellets for greater coverage.
Batch Code: See Bag Back
