BOXER™
Insecticide-Miticide

For systemic two-year control of listed insect and mite pests in a variety of deciduous/coniferous ornamental trees and palms in utility rights-of-way, urban environments, residential areas and interior plantscapes.

ACTIVE INGREDIENT:
Emamectin Benzoate (CAS No. 155569-91-8) .......... 4%
OTHER INGREDIENTS ................................................... 96%
Total .............................................................................. 100%

Net Contents: 1 qt 2 fl oz (1000 ml); Contains 1.54 oz (43.5 grams) active ingredient per 1 qt 2 fl oz (1000 ml) pack.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

The ArborSystems Direct-Inject units are designed to be used only with ArborSystems pre-packed chemicals. Tampering with packs or contents may cause non-warrantied damage to your injection system.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in original container in a cool, dry place away from children and pets. Keep from freezing.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Non-refillable container; do not reuse or refill this container. Completely empty pack into application equipment, then offer for recycling if available; otherwise, dispose of empty pack in a sanitary landfill.

Keep Out of Reach of Children

WARNING
See booklet for First Aid, additional Precautionary Statements and complete Directions for Use.
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Causes substantial but temporary eye injury. Harmful if swallowed. Do not get in eyes or on clothing. Wear protective eyewear such as goggles or safety glasses. Thoroughly wash with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

FIRST AID

If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If Swallowed: Immediately call a poison control center or doctor for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

ENVIRONMENTAL HAZARDS

This product is highly toxic to fish, mammals and aquatic invertebrates. Do not apply directly to water, to areas where surface water is present or to tidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate. This product is highly toxic to bees exposed to direct treatment or residues on blooming trees. Do not apply this product to blooming trees if bees are foraging the treatment area.

NOTICE OF WARRANTY

ArborSystems warrants that this product conforms to the chemical description on the label and is reasonably fit for use under average conditions when used strictly in accordance with the directions on the labeling. ArborSystems does not make or authorize any agent or representative to make any other warranty, guarantee or representation, express or implied, concerning this product.

Insecticide-Miticide

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Intended for use by professional arborists/applicators, foresters, grounds maintenance professionals and landscapers.

Restriction: Do not apply to trees that may be harvested for food consumption by humans or used in animal feed.

ARBORSYSTEMS™ DIRECT-INJECT™ TREE INJECTION SYSTEM

The ArborSystems Direct-Inject Tree Injection System is easy to use. Most trees are treated in as little as five minutes or less, allowing applicators to treat trees quickly. There is no need to wait for absorption (translocation). Chemical is injected into the cambial area (the active vascular system) of the tree. Because the chemical is placed right where the tree can use it, effectiveness of the chemical is increased. Use in sunny or over-cast conditions, rainy or dry, at any time of day. No drilling or implants are required, you can treat trees year after year, with no threat of long-term or permanent damage to the tree. This system minimizes wounding and promotes long-term tree vigor.

INDICATIONS
As a preventative, apply in the early spring prior to insect activity in the tree. As a remedial (on trees already showing symptoms of infestation), apply as needed through the season.

DOSAGE
1 ml per 4” to 6” of trunk circumference measured within 12” of the ground.

Dosage may be increased to a maximum of 2 ml per injection site for trees with a circumference greater than 38” (diameter greater than 12”), for challenging insect infestations or for remedial or longer residual control.

PESTS CONTROLLED
• Ambrosia Beetles*
• Aphids*
• Bagworms
• Clearwing Borers (such as Ash and Sequoia Pine Pitch Tube Moth)
• Cone Beetles (Conopithra spp.)*
• Conifer Mites*
• Cynipid Gall Wasps*
• Fall Webworms
• Flatheaded Borers (such as adult and larvae of Bronze Birch* and Two-lined Chestnut*)
• Gypsy Moths
• Honeylocust Plant Bugs
• Japanese Beetles
• Leafminers (such as Lepidoptera, Coleoptera, Hymenoptera)
• Mimosa Webworms
• Oak Worms
• Pine Cone Seed Bugs (suppression of Leptoglossus and Tetyra spp. in the year of treatment)
• Pine Coneworms (Diorictria spp.)
• Pine Needle Scale
• Pineweed Nematodes
• Red Palm Mites
• Roundheaded Borers (excluding Asian Longhorned Beetles)
• Sawflies (such as Elm, Pine)
• Scolytids (Bark Beetles) Ips Engraver Beetles, Mountain Pine Beetles, Southern Pine Beetles, Spruce Beetles, Western Pine Beetles)
• Tent Caterpillars (such as Eastern, Forest, Pacific and Western)
• Tussock Moths
• Western Spruce Budworms
• Winter Moths
*Not registered for use in California

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Use protective eyewear and gloves when handling ArborSystems Direct-Inject chemicals. Use chemical-resistant gloves made of barrier laminate, butyl rubber ≥ 14 mils, nitrile rubber ≥ 14 mils, neoprene rubber ≥ 14 mils, natural rubber ≥ 14 mils, polyethylene ≥ 14 mils, polyvinylchloride (PVC) ≥ 14 mils or viton ≥ 14 mils.

HOW TO USE ARBORSYSTEMS DIRECT-INJECT CHEMICALS WITH ARBORSYSTEMS DIRECT-INJECT TREE INJECTION SYSTEM

1. Use only ArborSystems Direct-Inject chemicals with your unit as they have been formulated specifically for the Direct-Inject system. Use of other chemicals will invalidate warranty.
2. Attach the chemical pack to the Direct-Inject unit and prepare the unit to make injections.
3. Set the delivery volume on the unit.
4. Follow the label directions in this booklet label to determine the amount of chemical and number of injection sites.
5. Determine where to make injections in the bark. Generally, the injection tip is inserted into the fissure (valley) of the tree bark. Inject thin-barked trees in the thicker part of the tree bark. Thick-barked trees require a longer injection tip.
6. Make injections working around the circumference of the tree. Make Wedge Tip injections within 12” of the ground. Portle Tip injection height varies depending on type of tree and location.
7. When treating hardwoods, use Wedge Tips and make injections within 12” of the ground. Initially, use the shorter Wedge Tip; if no resistance is met after this initial insertion past the bark (i.e., if the tip does not reach the outer xylem ring), withdraw the Tip. Replace the short Tip with the longer Tip to ensure the Tip fully penetrates the bark to reach the outer xylem ring. Use Portle Tips when treating conifers and Palm Tips when treating palms.
8. When the Tip is correctly inserted, firmly squeeze the injection unit handles using a smooth, slow motion. This releases a measured chemical dose into the tree.
9. Continue making injections moving around the tree until the entire tree trunk has been treated.
10. During use, periodically clean the Direct-Inject unit to prevent clogging.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in original container in a cool, dry place away from children and pets. Keep from freezing.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Non-refillable container; do not reuse or refill this container. Completely empty pack into application equipment, then offer for recycling if available; otherwise, dispose of empty pack in a sanitary landfill.
