KEEP OUT OF REACH OF CHILDREN
CAUTION
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.
See booklet for complete First Aid, Precautionary Statements, and Directions for Use.

FIRST AID

IF SWALLOWED:
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

IF ON SKIN:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

IF IN EYES:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

IF INHALED:
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.
PESTICIDE STORAGE: Do NOT store box under dampness or high humidity.
PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.
CONTAINER HANDLING: Non-refillable container. Do not reuse or refill this container. Offer for recycling if available. Triple rinse or pressure rinse container (or equivalent) promptly after emptying. Triple rinse non-refillable < 50 pounds as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinse into application equipment or a mix tank or store rinse for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

ENVIRONMENTAL HAZARDS
This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.
Keep out of lakes, ponds, and streams. Do not apply directly to water areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of rinsate.

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with this labeling. For use only by certified commercial applicators or persons under their direct supervision and only for those uses covered by the certified applicator’s certification. All applicable directions, restrictions and precautions are to be followed. This labeling must be in the possession of the user at time of application.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION. Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Avoid contact with skin, clothing, or eyes. Avoid breathing dust or spray mist.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION. Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Avoid contact with skin, clothing, or eyes. Avoid breathing dust or spray mist.
PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION. Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Avoid contact with skin, clothing, or eyes. Avoid breathing dust or spray mist.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and other handlers must wear:
• Long-sleeved shirt and long pants
• Chemical-resistant gloves made of waterproof material
• Shoes plus socks

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

ENGINEERING CONTROLS STATEMENT

When handlers use closed systems or enclosed cabs in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

USER SAFETY RECOMMENDATIONS

Users should:
• Wash hands thoroughly after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
• Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

Keep out of lakes, ponds, and streams. Do not apply directly to water, areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of rinsate.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with this labeling.

For use only by certified commercial applicators or persons under their direct supervision and only for those uses covered by the certified applicator’s certification. All applicable directions, restrictions and precautions are to be followed. This labeling must be in the possession of the user at time of application.

Apply as a medium or coarser spray (ASABE standard 572).

For ground applications: Do not release spray at a height greater than 30 inches above the ground.

For aerial applications: Do not release spray at a height greater than 10 feet above the crop canopy, unless a higher application height is required for reasons of pilot safety.

Do not apply when wind speeds are greater than 10 mph at the application site.

DO NOT apply this product by air or through any type of irrigation equipment.

Prime Source, LLC does not recommend or authorize the use of this product in manufacturing, processing or preparing custom blends with other products for application to turf.

DO NOT apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the specified area during application.

For any requirements specific to your State or tribe, consult the agency responsible for pesticide regulation.
AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, and water, is:

- Coveralls
- Chemical-resistant gloves made of any water proof material
- Shoes plus socks

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, nurseries, or greenhouses.

Professional applications to residential and nonresidential turf are not within the scope of the Worker Protection Standard.

Do not enter or allow others to enter the treated area until sprays have dried.

PRODUCT INFORMATION

Quinclorac 75DF Select may be applied post-emergence to residential and nonresidential turfgrasses (Refer to Table 1) for the control of many broadleaf and grass weeds. Examples of such sites include, but are not limited to: grounds or lawns around residential and commercial establishments, multi-family dwellings, military and other institutions, parks, airports, road-sides, schools, picnic grounds, athletic fields, houses of worship, cemeteries, golf courses, and sod farms.

Mode of Action

Quinclorac 75DF Select is a group 4 herbicide and is an auxin agonist and is classified as a quinoline carboxylic acid. It is absorbed by foliage and roots and translocated throughout the plant. The control symptoms exhibited by broadleaf weeds include leaf and stem curl or twisting, and chlorosis. Susceptible grasses demonstrate stunting, chlorosis, and gradual reddening followed by necrosis and death. Refer to Tables 1, 2, and 3 for turfgrass tolerance and susceptible weed species.

Resistance Management

Quinclorac 75DF Select has a low probability of selecting for resistant weed biotypes. However, repeated applications of a single mode of action in a weed management plan increase the probability of selecting for naturally occurring biotypes with less susceptibility to herbicides using that mode of action. Therefore, weed management programs should include rotations using herbicides with different modes of action.
APPLICATION INFORMATION

Apply Quinclorac 75DF Select to actively growing weeds as post-emergence broadcast or spot sprays using the rate, turf species and growth stage indicated in Tables 1, 2, and 3.

DO NOT exceed the labeled application rate or fail to comply with use restrictions listed in QUINCLORAC 75DF SELECT USE DIRECTIONS.

To achieve consistent weed control, use methylated seed oil. Refer to Tables 2 and 3 for rates.

Adding adjuvants may cause slight leaf burn, but new growth is normal and turf vigor is not reduced. The potential for leaf burn is increased when relative humidity and temperature are high. Additional stress from low mowing heights may also increase the possibility of turf injury. Chelated iron or sprayable soluble nitrogen fertilizer will reduce a slight yellowing that may occur on some turfgrass species.

Spot Applications:
FOR USE IN NEW YORK BY SPOT TREATMENT ONLY.

Post-emergence spot applications may be made to susceptible weeds in turfgrass that is tolerant to Quinclorac 75DF Select (see Tables 1 and 2). Apply 0.367 oz. of Quinclorac 75DF Select per 1,000 sq. ft. of treated area. Spray coverage should be uniform and complete.

Mowing Information:
DO NOT mow 2 days before or after applying Quinclorac 75DF Select to maximize weed control and minimize potential turf injury. Clippings from the first three mowings should be left on the treated area.

Irrigation and Rainfall:
If soil moisture is not sufficient prior to Quinclorac 75DF Select application, irrigation may improve weed control. For best results, do not water or irrigate for 24 hours after application. If rainfall does not occur in 2 to 7 days after application, irrigation of at least 1/2 inch is desirable.

Extended Grass Control:
To extend grass control Quinclorac 75DF Select can be tank-mixed with Pendulum® 3.3 EC, PRE-M® 3.3 turf herbicide, or Pendulum® 60 DG to provide residual control of annual grasses. Consult the respective tank-mix labels for additional weeds controlled.

Seeding/Overseeding/Sprigging:
The use of Quinclorac 75DF Select before or after seeding or overseeding a turf area will not significantly interfere with the turfgrass seed germination and growth of those grass types identified as tolerant in Table 1. Consult Table 4 for timing of applications concerning any seeding, overseeding or sprigging situation.

ADDITION OF ADJUVANTS

Additives in Spray Mix to Achieve Control:
Methylated seed oil is the preferred adjuvant for post-emergence applications. Do not include additives when tank mixing with EC (Emulsifiable Concentrate) products as this may cause phytoxicity. Consult your local Prime Source, LLC representative or distributor for instructions for your area. Other additives or adjuvants may be used such as Dyne-Amic, Lesco Spreader Sticker LI-700, Surf King Spreader, Target Pro Spreader, or Thoroughbred. However, under some environmental conditions, some of these products may cause photo toxicity or less than optimal efficacy.

The methylated seed oil used as the adjuvant with Quinclorac 75DF Select must meet all the following criteria:
• be nonphytotoxic,
• contain only EPA-exempt ingredients,
• provide good mixing quality in the jar test, and
• be successful in local experience.

The exact composition of suitable products will vary; however, any methylated seed oil used should contain emulsifiers to provide good mixing.
MIXING INSTRUCTIONS FOR QUINCLORAC 75DF SELECT

Respective sections of this leaflet define Quinclorac 75DF Select tank-mix treatments. If tank-mixing with products in PVA bags always allow water soluble packets to dissolve before agitating.

**Ground-driven Sprayer:**
1. Begin with a clean spray tank. Fill tank one-half to three-quarters full with clean water.
2. Quinclorac 75DF Select Alone
   When using Quinclorac 75DF Select alone, either premix (1 part product + 2 parts water) or slowly add Quinclorac 75DF Select to the partially filled tank while agitating until completely dispersed. Fill the remainder of the tank with water.
3. Quinclorac 75DF Select tank mixes
   a. **Wettable Powder Formulations**
      1. When using Quinclorac 75DF Select with a wettable powder formulation, add Quinclorac 75DF Select to the partially filled tank while agitating.
      2. When Quinclorac 75DF Select is properly mixed add a slurry of the wettable powder (1 part WP + 2 parts water) slowly into the tank. Fill the remainder of the tank while agitating.
   b. **Flowable Formulations**
      1. When using Quinclorac 75DF Select with a flowable formulation, add Quinclorac 75DF Select to the partially-filled tank while agitating.
      2. When Quinclorac 75DF Select is properly mixed, premix one part of the flowable with two parts water and add this diluted mixture slowly into the tank. Fill the remainder of the tank while agitating.
   c. **Emulsifiable Concentrate Formulations**
      1. When using Quinclorac 75DF Select with an emulsifiable concentrate formulation, add Quinclorac 75DF Select to the partially-filled tank while agitating.
      2. When Quinclorac 75DF Select is properly mixed, premix one part of the emulsifiable concentrate with two parts water and add this diluted mixture slowly into the tank. Fill the remainder of the tank while agitating.
   d. **Dry Flowable (Water Dispersible Granule) Formulations**
      1. When using Quinclorac 75DF Select with a dry flowable formulation, add Quinclorac 75DF Select to the partially-filled tank while agitating.
      2. When Quinclorac 75DF Select is properly mixed, premix one part of the dry flowable with two parts water and add this diluted mixture slowly into the tank. Fill the remainder of the tank while agitating.
4. **Maintain Continuous Agitation While Adding Herbicides and Until Spraying is Completed.** If the spray mixture is allowed to settle for any period of time, thorough agitation is essential to resuspend the mixture before spraying is resumed. Continue agitation while spraying.

**Backpack Sprayer:**
Begin with a clean spray tank. Fill the spray tank 1/2 full with clean water and add the required amount of Quinclorac 75DF Select to the sprayer. Cap sprayer and agitate to ensure mixing. Uncap sprayer and finish filling tank to desired level. Cap sprayer and agitate once again. During application it is desirable to agitate the mixture on occasion to ensure mixing. If the mixture is allowed to settle for any period of time, thorough agitation is essential to resuspend the mixture before spraying is resumed.

**Liquid Fertilizers:**
Prior to mixing, small quantities should always be tested using a simple jar test. Add the required amount of Quinclorac 75DF Select to half-filled tank while agitating then add the fertilizer product. Complete filling spray tank to desired level.
**SPRAYING INSTRUCTIONS FOR QUINCLORAC 75DF SELECT**

Apply with properly calibrated ground equipment in sufficient water per acre to provide uniform spray distribution (at least 20 gallons of water per acre or at least 0.5 gallon per 1,000 sq. ft.). Use Low pressure sprayers at 20 to 40 psi. Maintain continuous agitation during spraying with good mechanical or bypass agitation. Nozzle screens must be no finer than 50 mesh (100 mesh is finer than 50 mesh). Check sprayer routinely to determine proper calibration. Flat fan, flood, or cone nozzles may be used. Nozzles should be arranged to obtain uniform coverage for turf and weeds to be controlled. Boom height, nozzle selection, and pressure should be adjusted to provide uniform coverage and minimize spray drift.

Do not allow overlaps that will increase rates above those labeled for use. Avoid application when winds may cause drift.

Clean Spray application equipment thoroughly using a strong detergent or commercial sprayer cleaner according to the manufacturer’s directions before and after applying this product.

---

**COMPATIBILITY TEST FOR MIX COMPONENTS**

Add components in the following sequence using 2 teaspoons for each pound or 1 teaspoon for each pint of labeled rate per acre.

1. **Water:** For 20 gallons per acre spray volume, use 3.3 cups (800 mL) of water. For other spray volumes, adjust rates accordingly. Use only water from the intended source at the source temperature.

2. **Products in PVA bags:** Cut an opening in the water-soluble PVA bag just large enough to use a teaspoon for measuring purposes. Use the opened water-soluble PVA bag first when preparing spray solution. Boron containing fertilizers can be incompatible with PVA material. Include PVA material if a boron fertilizer is intended to be used. Cap the jar and invert 10 cycles.

3. **Water-dispersible products:** (such as Quinclorac 75DF Select) (dry flowables, wettable powders, suspension concentrates, or suspo-emulsions) - Cap the jar and invert 10 cycles.

4. **Water-soluble products:** (such as Basagran T/O) - Cap the jar and invert 10 cycles.

5. **Emulsifiable concentrates:** (methylated seed oil) - Cap the jar and invert 10 cycles.

6. **Water-soluble additives:** Cap the jar and invert 10 cycles.

7. Let the solution stand for 15 minutes.

8. Evaluate the solution for uniformity and stability. The spray solution should not have free oil on the surface nor thick (clabbered) texture. For WG or WP products, a fine precipitate that is easily resuspended is normal; large non-dispersible particles (>300 microns) that precipitate on standing are a sign of tank mix incompatibility. DO NOT use any spray solution that could clog spray nozzles.

---

**QUINCLORAC 75DF SELECT USE PRECAUTIONS**

- Apply when wind speed is less than 10 mph as drift may cause damage or death of non-target area vegetation. DO NOT apply when conditions favor drift from target area.

- Use a lawn type sprayer with coarse spray as wind drift is less likely.

- Avoid mist and spray onto vegetables, flowers, ornamentals, shrubs, trees, and other desirable plants, especially plants belonging to the **Solanaceae** family such as tomatoes, eggplants, and bell peppers.

- For best results, weeds should not be under stress from lack of water, excessive water, low fertility, mowing shock, excessive hot or cold temperatures, or injury from other herbicide applications.
QUINCLORAC 75DF SELECT USE RESTRICTIONS

• DO NOT apply more than 2 lbs. of Quinclorac 75DF Select per acre (or 0.73 oz. per 1,000 sq. ft.) in one year.
• DO NOT apply to golf course collars or greens.
• DO NOT apply to fine fescue unless it is part of a seed blend.
• DO NOT apply to bahiagrass, carpetgrass, St. Augustinegrass, centipedegrass, dichondra, or lawns or turf where desirable clovers are present.
• DO NOT apply within 4 weeks after seedling emergence of Kentucky bluegrass, creeping bentgrass, fine fescue blends, and perennial ryegrass.
• DO NOT apply to exposed feeder roots of trees or ornamentals. Be particularly careful within the drip line of trees and other ornamental species.
• DO NOT apply into any ornamental bed.
• DO NOT use clippings as mulch or compost around flowers, ornamentals, trees, or in vegetable gardens.
• DO NOT pour spray solutions near these plants.
• DO NOT apply through any type of irrigation system.
• DO NOT use to formulate or reformulate any other pesticide product which is not registered by EPA.
• DO NOT APPLY IN NEW YORK STATE, EXCEPT BY SPOT TREATMENT ONLY.

TURFGRASS TANK-MIXES

Read and follow the applicable QUINCLORAC 75DF SELECT USE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS and use on all products involved in tank mixing.

The most restrictive labeling applies to any tank mix. To increase spectrum of control of broadleaf weed species, a tank mix with 2,4-D, triclopyr, MCPA, MCPP, Three Way, Trimec, or other broadleaf herbicide can be used. For extended residual control, apply Quinclorac 75DF Select with Pendulum or PRE-M herbicides. For sedge control, applications of Quinclorac 75DF Select with Basagran SG, Basagran T/O, Lescogran, Image 70 DG, or MSMA can be made.

Combinations with MSMA will aid in control of certain grassy weeds such as bahiagrass or kikuyugrass.

Consult tolerant turfgrass species on all labels. Separate applications should be made if all target weeds are not at the correct growth state for treatment at the same time.

Physical incompatibility, reduced weed control, or turf injury may result from mixing Quinclorac 75DF Select with other pesticides (fungicides, herbicides, insecticides, or miticides), additives, or fertilizers.

Before tank-mixing, a simple jar test is required to ensure compatibility of herbicides or other pesticide and/or additives. Refer to manufacturer’s labels for specific use directions, precautions, and limitations before tank mixing with Quinclorac 75DF Select and follow those that are most restrictive.

¹Under certain conditions, applications of Quinclorac 75DF Select made to annual grasses at 2 - 4 tiller may not provide complete control. A sequential application will be required for grass control in these situations. Optimum control is achieved when applications of Quinclorac 75DF Select + methylated seed oil is applied either before second tiller or as weed grasses mature.

²Tank mix partner or sequential application required.

³Make 3 sequential applications of 0.245 oz. of Quinclorac 75DF Select per 1,000 sq. ft. (0.50 lb. AI/A) at 14- to 21-day intervals.

⁴Biotypes of large and smooth crabgrass in California have shown varied response to Quinclorac 75DF Select. If control failure occurs following the application of a full or split application rates, DO NOT reapply Quinclorac 75DF Select. Change to a herbicide with a different mode of action.

⁵NOT FOR USE to control this weed in California.

Broadcast Applications: 1 lb. of Quinclorac 75DF Select per acre (0.75 lb. AI/A) or 0.367 oz. of Quinclorac 75DF Select per 1,000 sq. ft.

Spot Applications: Apply 0.367 oz. of Quinclorac 75DF Select per 1,000 sq. ft. of treated area.

Refer to footnotes in Tables 2 and 3 for specific turfgrass or weed instructions.

Apply 1.5 pints per acre (0.55 oz. per 1,000 sq. ft.) methylated seed oil.

<sup>1</sup>NOTE: No adjuvant or additive should be used when Quinclorac 75DF Select applications are made on newly emerged turf seedlings until 28 days after emergence.

<sup>2</sup>Quinclorac 75DF Select can be applied 7 days or greater prior to seeding.

<sup>3</sup>Quinclorac 75DF Select can be used anytime prior to, at, or after sprigging.

Application of Quinclorac 75DF Select should be timed around the seeding operations using the above chart as a reference point.

---

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: DO NOT store box under dampness or high humidity.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

CONTAINER HANDLING: Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse or pressure rinse container (or equivalent) promptly after emptying.

**Triple rinse non-refillable < 50 pounds as follows:** Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.
CONDITION OF SALE AND LIMITATION OF WARRANTY AND LIABILITY

NOTICE: Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

The Directions for Use of this product must be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Ineffectiveness or other unintended consequences may result because of such factors as manner of use or application, weather, presence of other materials or other influencing factors in the use of the product, which are beyond the control of Prime Source, LLC or Seller. To the extent consistent with applicable law, all such risks shall be assumed by Buyer and User, and Buyer and User agree to hold Prime Source, LLC and Seller harmless for any claims relating to such factors.

Prime Source, LLC warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with directions under normal use conditions. This warranty does not extend to the use of this product contrary to label instructions, or under conditions not reasonably foreseeable to or beyond the control of Seller or Prime Source, LLC, and Buyer and User assume the risk of any such use. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, PRIME SOURCE, LLC MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.

To the extent consistent with applicable law, neither Prime Source, LLC nor Seller shall be liable for any incidental, consequential or special damages resulting from the use or handling of this product. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF PRIME SOURCE, LLC AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELECTION OF PRIME SOURCE, LLC OR SELLER, THE REPLACEMENT OF THE PRODUCT.

Prime Source, LLC and Seller offer this product, and Buyer and User accept it, subject to the foregoing Conditions of Sale and Limitation of Warranty and Liability, which may not be modified except by written agreement signed by a duly authorized representative of Prime Source, LLC.
