This Supplemental Labeling must be in the possession of the user at the time of pesticide application. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
## DIRECTIONS FOR USE

**USE DIRECTIONS FOR BASIL TRANSPLANTS GROWN IN ENCLOSED GREENHOUSES WITH PERMANENT FLOORING FOR RE-SALE TO CONSUMERS**

<table>
<thead>
<tr>
<th>Crop</th>
<th>Disease</th>
<th>Rate fl oz/Acre (fl oz/5,000 sq ft)</th>
<th>Remarks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basil</td>
<td>Downy mildew (Peronospora belbahrii)</td>
<td>8.0 ((0.9))</td>
<td>Apply no more than two applications containing Micora per crop before switching to a non-group 40 fungicide. One application may be made during the plug growing stage and one application may be made during the crop finishing stage. Begin applications prior to disease development and continue on a 7-10 day interval. Use the shorter interval under high pressure or when conditions are conducive to disease. Micora may be tank mixed with another fungicide labeled for downy mildew that has a different mode of action. The addition of a spreading/penetrating type adjuvant such as a non-ionic based surfactant or crop oil concentrate or blend is recommended. For best results, use sufficient water volume to provide thorough coverage. Micora may be applied by ground application or chemigation.</td>
</tr>
</tbody>
</table>

**Specific Use Restrictions:**
- Do not apply within 1 day of harvest or shipping (1-day PHI).
