**PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

Risk of Inhalation: Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available. 

**PHYSICAL OR CHEMICAL HAZARDS**

Storage and Disposal:
- For all Semiochemicals other than those indicated or used as a White Mist Area Monitor Substitutes, applications must be made with closed systems - content and protection masks.
- Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of it. 
- To avoid wastes, use all material in this container by application according to label directions. If wastes cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program (often such programs are run by state or local government or by industry).

**ENVIRONMENTAL HAZARDS**

Storage and Disposal:
- Do not use this product in a manner inconsistent with its labeling. For any requirements specific to your State or tribe, consult the agency responsible for pesticide regulation.

**APPLICATION REQUIREMENTS**

- Make aerial or ground applications when the wind velocity favors on target product deposition (approximately 3 to 10 mph). Do not apply when wind velocity exceeds 15 mph. Avoid applications when wind is blowing from the side, against the wind, or upwind.
- For Groundboom and Aerial Applications
- Use only medium or coarse spray nozzles according to ASAE (S572) definition for standard nozzles, or a volume mean diameter (VMD) of 300 microns or greater for spinning atomizer nozzles. In conditions of low humidity and high temperatures, applicators should use a coarser droplet size.
- Mist blowers and boom sprayers utilizing a controlled air flow to facilitate particle size and spray deposition are to be used at a vehicle speeds of 4 to 10 mph. 
- Wind and rising air currents may cause undesirable spray drift and reduce insect control.

**DIRECTIONS FOR USE**

- In a rereaded key the use of this product is a serious imminent threat to the environment. For any requirements specific to your State or tribe, consult the agency responsible for pesticide regulations.

- PRECAUTIONS AND RESTRICTIONS
- Any reasonable means shall be used to ensure that the area is free from homes, schools, camps, and other areas where pesticides may be hazardous to people or domestic animals.

- APPLICATION REQUIREMENTS

- Barley
- Do not apply to seed alfalfa.

- Blueberry Fruit Fly or Blueberry maggot; Blueberry Gall Midge
- Do not apply to blueberries.

- Corn earworms*; 12 hrs for all other activities

- Cereal leaf beetles
- 3 days for dehulling.

- Cutworms*; 12 hrs for all other activities

- Grasshoppers
- 3 days for dehulling.

- Alfalfa weevils*; 12 hrs for all other activities

- Cutworms*; 12 hrs for all other activities

- Chinch bugs
- 3 days for dehulling.

- Alfalfa caterpillars*; 12 hrs for all other activities

- Corn borers*; 12 hrs for all other activities

- Corn earworms*; 12 hrs for all other activities

- Grasshoppers
- 3 days for dehulling.

- Alfalfa weevils*; 12 hrs for all other activities

- Cutworms*; 12 hrs for all other activities

- Chinch bugs
- 3 days for dehulling.
Boll Weevils

FL. OZ./A

Contains 9.9 lbs. malathion per gallon

*O,O-dimethyl phosphorodithioate of diethyl mercaptosuccinate

ACTIVE INGREDIENT:

Fyfanon ULV AG

For use on cotton: Fyfanon ULV can be used alone as a Fyfanon ULV concentrate spray or diluted in once-refined cottonseed or vegetable oil sufficient to make at least one quart of finished spray per acre.

Application will not be made when rainfall is imminent.

Applications will not be made when people are in or near infested cotton fields or, to the degree possible, when people are present in or near adjacent sensitive areas.

When applications are made with a cross-wind, the swath will be displaced downwind. The applicator must compensate for his displacement at the downwind edge of the application area by adjusting the swath in the direction opposite to the downwind displacement.

Global spraying patterns (GPS) should be used to guide pilots and to monitor each application.

Before beginning treatment, program personnel shall notify all registered apiarists in or near the treatment area of the date and approximate time of treatment.

To the extent consistent with applicable law, FMC shall not be liable for consequential, incidental, or special damages or losses in any matter.

LIMITATION OF REMEDIES

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, FMC MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

IN CASE OF A MEDICAL EMERGENCY INVOLVING THIS PRODUCT, CALL TOLL FREE DAY OR NIGHT 1-800-323-1346

GLOBAL POSITIONING SYSTEMS (GPS) SHOULD BE USED TO GUIDE PILOTS AND TO MONITOR EACH APPLICATION.

DO NOT MAKE AERIAL OR GROUND APPLICATIONS INTO TEMPERATURE INVERSIONS. INVERSIONS ARE CHARACTERIZED BY STABLE AIR AND INCREASING TEMPERATURES WITH HEIGHT ABOVE THE GROUND. MIST OR FOG MAY INDICATE THE PRESENCE OF AN INVERSION.

FOR AERIAL APPLICATIONS, SPRAY EQUIPMENT MUST BE ADJUSTED SO THAT THE VOLUME MEDIAN DIAMETER IS 100 MICRONS (Dv 0.5 = 100um) OR GREATER. THE EFFECTS OF FLIGHT SPEED, NOZZLE ANGLE AND TYPE, AND PUMP PRESSURE ON THE RESULTING VMD MUST BE CONSIDERED IN DETERMINING THE APPROPRIATE VMD.

FMC warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions, subject to the inherent risks set forth below. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, FMC MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY.

WARRANTY DISCLAIMER

Before application, thoroughly mix contents of each concentrate container. If spray mixture becomes cloudy, mix again.

WARRANTY DISCLAIMER

This product is a cholinesterase inhibitor. Treat symptomatically. Atropine is antidotal.

IN CASE OF A MEDICAL EMERGENCY INVOLVING THIS PRODUCT, CALL TOLL FREE DAY OR NIGHT 1-800-323-1346

KEEP OUT OF REACH OF CHILDREN

NOTE FOR AQUATIC USES (rice):

*Use highest rate for very heavy migrating population.

Depending upon your operational needs for knock-down, the amount of synergized pyrethrin can be reduced or adjusted. Application rates of Fyfanon ULV AG and droplet distribution requirements remain unchanged.

Before mixing, visually check the product for foreign material. If present, the product is not to be used and should be returned to the dealer.

Do not introduce foreign material into the tank or tank-mixed product. Label rates must not be exceeded. This product may not be mixed with any product bearing a label which specifically prohibits such mixing. Prior to tank mixing large quantities, mix a small amount in a glass jar to verify that the products are physically compatible.

This product is an organophosphate and is a cholinesterase inhibitor. Treat symptomatically. Atropine is antidotal.

IF INHALED:

Hold eye open and rinse slowly and gently with water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF IN EYES:

Hold eye open and rinse slowly and gently with water for 15-20 minutes. Call a poison control center or doctor for further treatment advice.

IF INGESTED:

Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything by mouth to an unconscious person. Give several glasses of water to drink if able to swallow. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING:

Remove contaminated clothing and wash skin thoroughly with soap and water.

IF SKIN OR CLOTHING IS NO LONGER CONTAMINATED, CLEAN WITH SOAP AND WATER.

IF INHALED:

Remove person to fresh air. If not breathing, give artificial respiration. If breathing has stopped, give artificial respiration. Call a doctor immediately. If possible, give 2% oxygen.

IF IN EYES:

Wash out eyes with plenty of water. Remove contact lenses, if any, after first rinsing eyes well. Get medical aid immediately.

IF INGESTED:

If swallowed, give 1-2 glasses of water or milk. Get medical aid immediately.

IF SKIN OR CLOTHING IS NO LONGER CONTAMINATED, CLEAN WITH SOAP AND WATER.

IF SKIN OR CLOTHING IS CONTAMINATED:

Remove contaminated clothing and wash skin thoroughly with soap and water.

IF SKIN OR CLOTHING IS NO LONGER CONTAMINATED, CLEAN WITH SOAP AND WATER.

IF INHALED:

Remove person to fresh air. If not breathing, give artificial respiration. If breathing has stopped, give artificial respiration. Call a doctor immediately. If possible, give 2% oxygen.

IF IN EYES:

Wash out eyes with plenty of water. Remove contact lenses, if any, after first rinsing eyes well. Get medical aid immediately.

IF INGESTED:

If swallowed, give 1-2 glasses of water or milk. Get medical aid immediately.

IF SKIN OR CLOTHING IS NO LONGER CONTAMINATED, CLEAN WITH SOAP AND WATER.

IF SKIN OR CLOTHING IS CONTAMINATED:

Remove contaminated clothing and wash skin thoroughly with soap and water.

IF SKIN OR CLOTHING IS NO LONGER CONTAMINATED, CLEAN WITH SOAP AND WATER.

Remove contaminated clothing and wash skin thoroughly with soap and water.

IF SKIN OR CLOTHING IS NO LONGER CONTAMINATED, CLEAN WITH SOAP AND WATER.

WARRANTY DISCLAIMER

In certain areas, an inversion in humid areas. The applicator may detect the presence of an inversion by producing smoke and observing a smoke layer near the ground surface.

Mist or fog may indicate the presence of an inversion.

Do not make aerial or ground applications into temperature inversions. Inversions are characterized by stable air and increasing temperatures with height above the ground.
