solitude iGR is intended for use only in equine operations. When handled with care, this product is safe for use around non-target animals and humans.

Before using, read the entire "Directions for Use" before applying. Refer to the "Indications" section for product use information. Apply the product to the ration of the horse according to the "Dosage and Administration" section. For fly control in and around horse operations, on premises, in barns, stables, paddocks, and tracks.

Dosage: Mix one (1) scoop of Solitude iGR in the horse's ration every day. This product is to be fed top-dressed on the horse's ration according to the "Directions for Use" given below, will provide a high degree of fly control on premises.

DIRECTIONS FOR USE

1. Cleaning up feed and manure spills, especially if wet.
2. Reducing feed spills in the wet areas.
3. Reducing moisture in manure, hay and/or straw around operations in close proximity.
4. Reducing the amount of excess hay leftover from pastures.
5. Reducing water leaks that cause wet manure.
6. Repairing water leaks that cause wet manure.
7. Cleaning out weed-choked water drainage ditches.

Dosage: Mix one (1) scoop of Solitude iGR in the horse's ration every day. This product is to be fed top-dressed on the horse's ration according to the "Directions for Use" given below, will provide a high degree of fly control on premises.
