Decyl Acetate (Hydrolyzed Palm Oil)
Amphiphilic Salts

Total 100%

Net vol 0.076 fl oz (20 ml) = 2 tubes of 0.338 fl oz (10 ml)
Simply draw a line of Nectar Fortress™ natural gel across any paths ants might use to get to your feeder. Made from food-based ingredients, it repels ants, but is safe for use around children, birds, and pets. The gel is weatherproof, so one application lasts the whole season. One tube contains enough to protect 10 feeders.

Directions: Dispense a thick line of gel that completely blocks any paths the ants might take to get to the feeder, such as poles or hooks. Also great for protecting other outdoor areas from ants, such as patio tables, bluebird houses, beehives and hanging plants.

Works best on non-porous surfaces like metal or plastic. If you must use on a porous surface like bare wood, place adhesive tape securely on surface before dispensing the gel. This will protect the porous surface from staining while maintaining the effectiveness of the gel. Do not use on surfaces that can be damaged or stained by oil. To clean from hands and surfaces, use dish soap.

This product is exempt from registration with the U.S. Environmental Protection Agency under FIFRA section 25(b) regulations.

Store only in original container and discard in trash.

CAUTION: Keep out of reach of children.
