**PRODUCT INFORMATION**

**INGREDIENTS:**

**ACTIVE INGREDIENTS**

- KATHON®

- Proprietary blend of isothiazolinone-containing products

**OTHER INGREDIENTS:**

- Water

**STORAGE AND DISPOSAL**

**RESTRICTIONS**

Do not contaminate water, food or feed by storage, disposal or cleaning of equipment or waste. Apply this pesticide only on equipment or waste that is covered by this label statement.

**STORAGE**

Store at temperatures below 35°C. Keep container tightly closed when not in use. Follow manufacturer’s instructions for application equipment by shaking and tapping sides and bottom of container to loosen clinging particles. Then offer empty container for recycling or reconditioning for reuse.

**DISPOSAL**

Do not contaminate water, food or feed by storage, disposal or cleaning of equipment or waste. Apply this pesticide only on equipment or waste that is covered by this label statement.

**DOSAGE AND SURVIVAL**

**TOxicITY**

This chemical is toxic to fish and wildlife. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. Add 7.5-15 ppm of product to the system, according to the severity of contamination. Badly fouled systems should be cleaned before treatment is begun.

**INDUSTRIAL WASTEWATER TREATMENT SYSTEMS AND SEWAGE SYSTEMS**

Not registered for this use in the State of California.

**INDUSTRIAL AND COMMERCIAL COOLING WATER SYSTEMS**

Not registered for the use in the State of California.

**AIR WASHER SYSTEMS/PAINT SPRAY BOOTHS**

For the control of microbial biofilms, bacteria, fungi, and algae in industrial air washer systems and paint spray booths. Add 7.5-15 ppm of product depending on the severity of contamination. Badly fouled systems should be cleaned before treatment is begun.

**BUILDING MATERIAL PRESERVATION**

Not registered for this use in the State of California.

**PRODUCT INFORMATION**

**CONSUMER INFORMATION**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**APPLICATION**

Follow the directions on the label carefully. It is the responsibility of the user to ensure that the product is used in a safe and effective manner. Use the product only on equipment or waste that is covered by this label statement.

**NOTICE**

It is illegal to sell a product to be used in a manner inconsistent with its labeling. The user is responsible for proper use of this product.

**DIRECTIONS FOR USE**

Do not mix with any other product that is not recommended on the label as a compatible additive or conditioner.

**Stability**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Buildings and Structures**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Transportation**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Storage**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Disposal**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Handling**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Observe**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Waste Disposal**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Labeling**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Hazardous Waste**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Environmental Hazards**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Handling Procedures**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Toxicological Data**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Permitting Requirements**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Regulatory Information**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Handling and Storage**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Transportation**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Waste Disposal**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Labeling**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Observe**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Waste Disposal**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Labeling**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Handling**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Observe**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Waste Disposal**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Labeling**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Observe**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Waste Disposal**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Labeling**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Observe**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Waste Disposal**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Labeling**

This product is a multi-potential preservative, capable of acting against a wide range of contaminants. It should be used in accordance with the directions on the label and in consultation with the appropriate technical staff from the manufacturer or supplier.

**Observe**
