WHY YOU SHOULD USE THIS PRODUCT: This non-foaming long-lasting concentrated algaecide prevents and kills green and yellow algaes. One treatment of this patented formula will prevent algaegrowth in your swimming pool for up to 90 days.

**HOW TO USE:** Always apply chemicals separately. Never combine them. This is a concentrated product and it works best when added in several places directly to the pool water with the pump running. After addition of algaecide, keep the pump running for several hours and wait 15 minutes before entering pool. Pools with heavy growth of algae must be cleaned prior to using this product. Maintain pool water in the pH range 7.2 to 7.6. Adjust pH to 7.2 for severe algae.

**INITIAL DOSE:** Use Applied Biochemists® Resist® sequestering agent to prevent scale and stain formation. Next, add 16 fl. oz of Swimtrine® 90 per 10,000 gallons of pool water.

**MAINTENANCE DOSE:** Add 16 fl. oz of Swimtrine® 90 per 10,000 gallons of pool water every three months to prevent algaegrowth.
