CheckMite+ Bee Hive Pest Control Strip

For Control of Varroa Mites and Small Hive Beetles in Honeybee Colonies

CAUTION

Do not leave the strips in hive for more than 72 hours. The strips should be removed from the hive at least 48 hours prior to the final fumigant application.

For Varroa Treatment: To control Varroa mites, place the Varroa strips in the center of the hive after a fumigant treatment or after Varroa mite control has been established. The Varroa strips should be removed from the hive within 48 hours.

For Small Hive Beetle Treatment: To control the small hive beetle, place the strips on the inner cover of the hive before the application of CheckMite+ Strips. Do not place the strips on the outside of the hive.

STORAGE AND DISPOSAL

CheckMite+ strips are designed to be disposed of by incineration or in an approved waste disposal facility. Do not dispose of in the trash.

KEEP OUT OF REACH OF CHILDREN

Active Ingredient: Pyranthrene

Total: 100%
