DISCLAIMER: The performance of any marine product or coating depends on many factors outside the control of the manufacturer. Pettit Paint Company does not guarantee the product’s effectiveness for any particular purpose or application. Improper application, improper application instructions, or different environmental conditions may result in product failure. Use caution or use of the product. Buyer agrees that the sole and exclusive remedy for any loss or injury is limited to replacement of the product or suitability of the product. Pettit Paint Company shall not be responsible for any such injury or loss in any event.

Product Description: This product is a low-VOC, ablative antifouling paint designed to aid the growth of algae and barnacles. It is a water-based product with a cure time of 6 hours and a dry time of 2 hours. The product is designed for use on inflatable boats, inflatables, and other small watercraft.

Use Restrictions: This product is not recommended for use on fiberglass or composite surfaces. It is recommended for use on aluminum, steel, and wood surfaces. Do not apply this product to areas that are not completely dry. It is recommended to use the dry times provided to ensure proper curing of the paint.

Amount to Apply: For best antifouling protection, at least two full coats of this product are recommended. The coverage is approximately 430 square feet per gallon.

Application Temperatures: The product should be applied at temperatures between 60°F and 90°F (15°C and 32°C). It is recommended to use fresh water to remove all sanding residue from the surface before applying the paint.

Coverage: The coverage is approximately 430 square feet per gallon. It is recommended to apply a generous coat of this product and allow it to dry for the proper time before launching.

Cyanoacrylate Adhesive: The product is formulated to cure at a controlled rate, providing excellent adhesion to the surface. It is recommended to use a wooden paddle or an electric drill mixer to mix the two parts together. Before using, check the settling to occur especially if the paint has been on the shelf for several hours. It is recommended to use a well-ventilated area to apply the paint.

Pesticide Disposal: This material is toxic to fish. Do not apply directly to water by cleaning up equipment. Keep out of reach of children. WARNING: This material is toxic to fish. Do not apply directly to water by cleaning up equipment. Do not breathe vapors, spray mist or sanding dust. While spraying and/or sanding boat surfaces, wear a MSHA/NIOSH approved cartridge. Do not use tobacco or use the toilet. Avoid contact with skin, eyes or clothing. Wear personal protective equipment.

First Aid: If on skin or clothing, remove contaminated clothing immediately. Wash skin with soap and water. If on eyes, rinse with plenty of water for 15-20 minutes. If swallowed, call a doctor immediately. Call a poison control center or your local Pettit sales representative or Pettit Customer Service.

See back panel for additional precautionary statements.

**WARNING:** Do not discharge this product into lakes, streams, ponds, estuaries, oceans or other waters unless the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless the permitting authority has been notified in writing prior to discharge.

For fires, blanket flames with foam. Avoid contact with water. Absorb and dispose of in accordance with local applicable regulations.
