WOOD PRESERVATIVE PASTE

ACTIVE INGREDIENTS:
Copper Hydroxide*.......................................................... 3.1%
Sodium Tetraborate Decahydrate**.......................... 43.5%
Inert Ingredients ...................................................................... 53.4%
TOTAL ........................................................................................................................... 100.0%
* Metallic Copper Equivalent 2.0%
**Boric Oxide (B2O3) Equivalent 16.4%

KEEP OUT OF REACH OF CHILDREN
WARNING

FIRST AID

IF IN EYES: • Hold eye open and rinse slowly and gently with water for 15 – 20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
• Call a poison control center or doctor for treatment advice.

IF SWALLOWED: • Call a poison control center or doctor immediately for treatment advice.
• Do not induce vomiting unless told by a Poison Control Center or doctor.
• Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: • Take off contaminated clothing.
• Wash skin with soap and water until no further contamination is detected.
• Call a Poison Control Center or doctor for further treatment advice.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

HOT LINE NUMBER
In case of emergency, call Chemtrec toll free at 800-424-9300.
Have the product container or label with you when calling a poison control center or doctor for further treatment.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
WARNING - Causes substantial but temporary eye injury. Harmful if swallowed or absorbed through skin. Do not get in eyes or on clothing. Avoid contact with skin. Wear goggles or face protection.

PERSONAL PROTECTIVE EQUIPMENT
Applicators and other handlers must wear long sleeve shirts and pants or must wear coveralls over short sleeve shirts and short pants, impermeable gloves and chemically resistant footwear with socks. When applying to in-service poles and ties, chemically resistant footwear is not required.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store product in original container only. Do not store with fertilizers, food and feed. Keep container closed when not in use. If product has been spilt or is leaking, remove the source of the spill or leak. Recover free liquids. Spread absorbent, then pick up and place in containers. Then where applicable, wash area with detergent and water.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of by applying them on site or at an approved waste disposal facility.

CONTAINER HANDLING: Nonrefillable Container. Do not reuse or refill this container. Triple rinse as follows.

Pails: Fill container ¾ full with water and recap. Shake for 10 seconds. Follow Pesticide Disposal instructions for rinsate disposal. Drain for 10 seconds after flow begins to drip. Repeat procedure two more times. Then offer for recycling if available or reconditioning if appropriate or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

Drums: Empty the remaining contents into application equipment or a mix tank. Fill the container ½ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times.

Plastic Liner: Completely empty plastic liner. Plastic liner and paper portions of packaging materials may be used as wraps to cover the CuRap 22 treatment around the poles. Otherwise, dispose of empty bag(s) in a sanitary landfill or by incineration if allowed by State and local authorities.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and aquatic organisms. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water by disposal of equipment washwaters.

PHYSICAL OR CHEMICAL HAZARDS
Use only with adequate ventilation. Close container after each use.

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with its label. This product is intended for the preservation of wood. Wood treated according to the following directions resists attack by decay and soft rot fungi, termites, carpenter ants, and wood boring beetles.

For utility poles, pilings, posts, and other wood structures standing in the ground, excavate the soil away from the structure to the depth of about 18 inches. Brush the surface to remove adhering soil and any undamaged wood. Depending upon the degree of protection desired, apply from ¾ to 1 inch of this product to the surface of the structure by spreading in a manner to achieve a consistent thickness from the bottom of the excavation to 3 inches above ground. Cover the treated surface with any contaminated packaging then with an impermeable wrap and back-fill around the structure. To treat internally decayed wood, inject this product into the affected area through drilled holes, then plug the drilled holes with tight-fitting wooden dowels. This product can be diluted with water if a less viscous solution is desired. To protect the ground line of poles, posts, and timbers before they are placed in the soil, apply this product in a pouch packaging to the structure from 6 inches above to 12 inches below the anticipated ground level. Stir the pouch along the marked lines and press this slit side tightly against the wood, then staple to the pole, post or timber.

For cross- ties, force 4.5 cubic inches of this product under the tie plate or apply 4.5 cubic inches to the tie plate area before the plate is put in place. For untreated or insufficiently treated posts, poles, lumber, or timbers, drill a hole or holes as near the sapwood portion of the wooden member as possible. These holes should be a maximum of 1 inch in diameter and of sufficient depth that the wooden member will be completely treated by diffusion. Posts are conveniently treated with the bark intact by drilling holes in both ends. The holes should be filled with this product to within ½ inch of the surface, then capped with impermeable plugs. Sufficient product should be used to achieve a retention of from 1 to 21 pounds per cubic foot.

Residential use of this product is disallowed; except by commercial applicators.

WARRANTY AND LIMITATION OF DAMAGES
Seller warrants to those persons lawfully acquiring title to this product that at the time of the first sale of this product by seller to product conforming to its chemical description and that it was reasonably fit for the purposes stated on the product label when used in accordance with the Directions for Use appearing on the product label and under normal conditions of use. Buyers and users of this product assume the risk of all loss or damage from use or handling of this product that results from their failure to read and comply with the Directions for Use of this product which appear on the product label. SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY, INCLUDING ANY OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY, AND NO AGENT OF SELLER IS AUTHORIZED TO DO SO. UNLESS EXPRESSLY PROHIBITED BY STATE LAW, THE LIABILITY OF SELLER FOR ANY BREACH OF WARRANTY SHALL NOT EXCEED THE PURCHASE PRICE OF THE PRODUCT AS TO WHICH A CLAIM IS MADE.
