HONEYDEW FORMULA

NO SPRAYS
NO MESS
Sin complicaciones
Sin necesidad de aerosoles

Kills Roaches and Common
Household Ants Including
Argentine and Carpenter Ants

KEEP OUT OF REACH OF CHILDREN

CAUTION

Net Contents: 1 gal. (32 fluid oz.)

Active Ingredient:
Disperosum octodecane lactate hydrate ... 1.00%
Other Ingredients.......................... 99.00%
TOTAL........................................... 100.00%

Green Way is not for sale in the territory of the District of Columbia

For use indoors or outdoors

Use Indications: This bait is for use in eliminating ants, roaches and other insects that are a pest. It is not for use as a fumigant.

CAUTION: Do not use as a fumigant. Do not use in areas where high humidity or high temperatures may increase the risk of fire or explosion.

PRECAUTION:

- Store in a cool, dry place.
- Keep out of reach of children and pets.
- Avoid contact with eyes or mouth.
- Do not drink.
- Do not inhale.
- Do not use near open flames or other sources of ignition.

INSTRUCTIONS FOR USE:

- Place bait stations in areas where ants are active.
- Ensure that the bait is accessible to ants but not to children or pets.
- Do not wash or clean up bait areas until six weeks after treatment.

KEEP OUT OF REACH OF CHILDREN

Do not use if the seal is broken or missing.

Green Way® LIQUID ANT KILLING BAIT

Honeydew Formula

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals

CAUTION

ENVIRONMENTAL HAZARDS

Do not apply directly to water.

Do not contaminate water when disposing of equipment wash waters or rinsates.

The use of any pesticide in a manner that may kill or otherwise harm an endangered species or adversely modify their habitat is a violation of Federal law.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labelling.

Do not contaminate food, feed or foodstuffs.

Do not contaminate food, feed or foodstuffs.

Place bait in areas inaccessible to children and pets.

Kill ants and roaches in roosts or outdoor nest holes, garbage, compost piles, trees, shrubs, important food storage areas, attics, garages, basements, storage areas, and closets. Place on exterior window sills and in doorways to help prevent entry by ants. Some bait stations may be designed to be affixed to a wall, hung on a pole or branched, protruding in the ground or placed on a flat surface. When using bait stations, wash hands thoroughly before handling to remove any oils that may be repellant to ants. Use, wash, and dry utensils and equipment.

OPEN PLACEMENT METHOD NOT TO BE USED IN CALIFORNIA

Green Way® Liquid Ant Killing Bait can be used to make small, peculiar placements and/or long trails in areas inaccessible to children and pets, where ants are a problem.

Outdoors: For best results place stations in shaded areas or create shade for the bait station. Avoid placing bait stations where they will receive direct sunlight whenever possible.

For use around food, for example, the number of bait stations to use will vary with the type of ant and the size of the colony. For initial placement, place one bait station every 10 feet. For optimal placement, replace baits as needed until facing virtually no access. If ants are extremely active, for example, Green Way® Liquid Ant Killing Bait until they do. The bait is designed to work slowly and could be used to combat large numbers of ants. If stored in a container, store the bait in a cool, dry, place out of reach of children. Do not use for foodstuffs, food, feed, or foodstuffs.

STORAGE AND DISPOSAL:

Do not contaminate water, food, feed, or soil by storage or disposal of this product. Pesticide Storage: Store product in original container in a cool dry place out of reach of children. Do not allow product to freeze. Pesticide Storage and Container Handling: Nonrefillable container. Do not reuse or refill this container. If empty: Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

- Keeps the bait contained and away from children, pets and off of the ground.
- Protects the bait from rain, sun damage and contamination.

ANT CONTROL MADE EASY!
Green Way Liquid Ant Killing Bait

HONEYDEW FORMULA WITH UNI-TRACT II™

KILLS ROACHES AND COMMON HOUSEHOLD ANTS, INCLUDING ARGENTINE AND CARPENTER ANTS
NO MESS! NO SPRAY!

THE COLONY, INCLUDING THE QUEENS DIE!

1 - GREEN WAY® LIQUID ANT BAIT QUART
4 - ANTORIA® 6 BAIT STATIONS

* Keeps the bait contained and away from children, pets and off of the ground.
* Protects the bait from rain, sun damage and contamination.
* Uses the Feeding Fruit Technology to keep ants from contaminating the bait.
* Ant control outdoors—24 hours per day, 7 days a week.

ANT CONTROL MADE EASY!

*This large-volume bait system can be used to treat "infestation" ant colonies that can have "super-colonies" with multiple-queens. These infestation ant colonies, free breading, hydrid colonies, or artificial colonies, can grow exponentially. They form colonies of aghis, aphids, scales and mites/bugs, feeding on the honeydew these insects produce and can displace native ants that usually have smaller, less aggressive colonies.

GREEN WAY® LIQUID ANT KILLING BAIT, which is formulated to mimic "honeydew," with a slow-acting toxicant, is picked up by the larger ants and brought back to the colony and shared. A phenomenon that leads other workers back to the bait, so more bait can be brought back and distributed widely throughout the colony. When the baiting program is properly maintained, sufficient toxicant is distributed throughout the colony, feeding on the bait and killing the colony, including the queen, etc.

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals

CAUTION

ENVIRONMENTAL HAZARDS

Do not apply directly to water. Do not contaminate water, food, or feed by either adequate turning motion until the entryway is level with the soil. If you encounter difficulty in seeding the bait station properly, remove it and loosen the soil more thoroughly, then repeat the anchoring process.

DIRECTIONS FOR USE

If the bait station is in a place where the bait is not accessible to children or pets where a child or pet is a problem, consider the amount of bait that will be on the bait station is needed until the bait station is empty.

Antipodes Bait Station operating instructions:

1. Apply bait to the station in a way to prevent access to children or pets. Never store or use the station where it is accessible to children.

2. Place the bait station in a location where it is not accessible to children or pets.

3. Place the bait station in a location where it is not accessible to children or pets.

STORAGE AND DISPOSAL

Do not store or use the station where it is accessible to children or pets. Never store or use the station where it is accessible to children or pets.

Innovative Pest Control Products

8865 SW 7th Street
Boca Raton, FL 33433 USA

TO ACTIVATE AND PLACE THE STATION

- Loosen the soil in the spot where you are going to place the station to a width of about 3" and a depth of about 7" with a large screw driver or small shovel.
- Remove soil to expose the soil.
- Remove Feeding Float.
- Place the anchor into the soil with a clockwise turning motion until the entryway is level with the soil. If you encounter difficulty in seeding the bait station properly, remove it and loosen the soil more thoroughly, then repeat the anchoring process.

- Alternatively, dig a small hole to a depth of 7" place the station in the hole, so the entryway is level with the adjacent ground and replace the soil.
- Fill the station with about 6 ounces of liquid ant ball.
- Place feeding float on top of ball—center the float in the chamber.
