IO-DIS DISINFECTANT

CONCENTRATED BROAD SPECTRUM IODOPHOR

FOR USE AS A ONE-STEP CLEANER-DISINFECTANT AND NO-RINSE SANITIZER IN:

- Veterinary Clinics - Poultry Drinking Water - Sanitizing Commercial Eggs
- Egg Processing Plants - Dairy & Poultry Farms - Meat & Poultry Plants
- Food Processing Facilities - Kitchens - Pet Shops & Zoos
- Hand Sanitizing in Food Plants - Animal Handling Facilities

- BACTERICIDE - FUNGICIDE - DEODORIZER

ACTIVE INGREDIENTS

iodine* 1.71%

AIDING INGREDIENTS

(sodium.iodeoxycholate complex)

KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS:

Hazard to health and domestic animals

EPA REG. NO. 4900-10-1970 - EPA EST. NO. 10603-1A-01

REORDER NO. 3441-10

NET CONTENTS: .75 GALLON (18.9L) .75 GALLON (113.5L) .5 GALLON (208.2L)

DIRECTIONS FOR USE:

ONE-STEP CLEANING AND DISINFECTING:

- Use IO-DIS Disinfectant at the concentration stated on the label in order to prevent the formation of milkstone and hard water deposits. Do not use this product together with other water treatments such as medications.

- Sanitize previously cleaned and rinsed hard, non-porous surfaces such as food contact surfaces, equipment and utensils before using or after treating. Do not rinse off IO-DIS Disinfectant solution containing 1 ounce of IO-DIS Disinfectant per 5 gallons of water; allow to air dry. After emptying bulk tanks, flush tanks thoroughly with 100ºF (38ºC) water to wash out all milk. Rinse tanks thoroughly with a solution containing 1 ounce of IO-DIS Disinfectant per 5 gallons of water. Allow solution to drain, rinse with water and allow rinse water to adequately drain.

SANITIZING MILKING MACHINES AND BULK TANKS: Before each milking, flush assembled milking machines and empty bulk tanks with a solution containing 1 ounce of IO-DIS Disinfectant per 5 gallons of water. Allow a 1 minute contact time. Adequately drain before reuse.

REORDER NO. 3441-10

SANITIZE PREVIOUSLY CLEANED FOOD CONTACT SURFACES:

- 1 oz to 1 gal. 125 ppm
- 6 oz to 5 gal. 150 ppm
- 3 oz to 2.5 gal. 175 ppm
- 1 oz to 1.5 gal. 200 ppm

SANITIZING POULTRY DRINKING WATER: Add 1 ounce of IO-DIS Disinfectant per 10 gallons of drinking water. Regular use of this product in drinking water reduces the buildup of slime and mineral deposits in watering equipment. Do not use this product with other water treatments.

SANITIZING GLASSES, DISHES, POTS, PANS, AND UTENSILS IN FOOD SERVICE OPERATIONS:

- 1 oz to 1 gal. 125 ppm
- 6 oz to 5 gal. 150 ppm
- 3 oz to 2.5 gal. 175 ppm
- 1 oz to 1.5 gal. 200 ppm

SANITIZING FOOTWEAR IN FOOD PLANTS AND ANIMAL HANDLING FACILITIES:

- 1 oz to 1 gal. 125 ppm
- 6 oz to 5 gal. 150 ppm
- 3 oz to 2.5 gal. 175 ppm
- 1 oz to 1.5 gal. 200 ppm

DIRECTIONS:

- Before applying IO-DIS Disinfectant to food contact surfaces, equipment and utensils, use a mechanical sprayer to produce a coarse spray. Allow a 10 minute contact time with disinfecting solution containing 1 oz IO-DIS Disinfectant per 5 gallons of water. Allow all 120 minute contact surfaces must be rinsed with potable water before reuse. Floors, walls and all other non-food contact surfaces do not require rinsing after treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate use of potable injections. Measures against circulatory shock, respiratory depression and convulsions may be necessary.

DIRECTIONS FOR USE:

- If you are a Federal or State regulation for use of this product in a manner inconsistent with its labeling. Not for Residential Use.

The color of an IO-DIS Disinfectant solution is proportional to the titratable iodine concentration. Prepare a fresh solution daily, or when there is a noticeable change in color, or more often if the solution becomes diluted. Corrective treatment information.

UNITED 760, CORROSIVE LIQUIDS, n.o.s. (Phosphoric Acid, Iodide), 8, PG11

DOT Information:

-Trichophyton mentagrophytes in a solution of cold water (as low as 41ºF, 5ºC), increase use to 6 oz. per 5 gallons water.

-Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal law. If these wastes are improperly disposed of by placing in the trash, latrines, septic tanks, drains, or other water sources; contact your State or Federal Water Pollution Control Administration. If you have a water supply system, contact the nearest EPA Regional Office for guidance.

-This may indicate the presence of milkstone or hard water deposits. Remove these deposits by applying a solution containing equal parts of IO-DIS Disinfectant and lukewarm water. Wait 2-3 minutes, brush and then rinse with potable water. Daily use of IO-DIS Disinfectant will help prevent the formation of milkstone and hard water deposits.

-IO-DIS Disinfectant is effective against Salmonella choleraesuis, Listeria monocytogenes and Escherichia coli, O157:H7, Pseudomonas aeruginosa, and E. Coli; Type 1*, and Influenza A2/Japan 305*, Salmonella choleraesuis, Staphylococcus aureus, Pseudomonas aeruginosa, and E. Coli is fungicidal against Trichophyton mentagrophytes, Penicillium aurantiogriseum, and E. Coli is fungicidal against Trichophyton mentagrophytes, Penicillium aurantiogriseum, and E. Coli is fungicidal against Trichophyton mentagrophytes, Penicillium aurantiogriseum, and E. Coli is fungicidal against Trichophyton mentagrophytes, Penicillium aurantiogriseum, and E. Coli is fungicidal against Trichophyton mentagrophytes, Penicillium aurantiogriseum, and E. Coli is fungicidal against Trichophyton mentagrophytes, Penicillium aurantiogriseum, and E. Coli is fungicidal against Trichophyton mentagrophytes, Penicillium aurantiogriseum, and E. Coli is fungicidal against Trichophyton mentagrophytes, Penicillium aurantiogriseum, and E. Coli is fungicidal against Trichophyton mentagrophytes, Penicillium aurantiogris...
