LOADING BAIT INTO STATION

PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals
CAUTION: Bait contains harmful if swallowed. Keep away from children, domestic animals, and pets. Any person who retrieves successes or unencouraged bait following application of this product must wear gloves.

FIRST AID
HAVE LABEL WITH YOU WHEN OBTAINING TREATMENT ADVICE
IF SWALLOWED:
• Call a poison control center, doctor, or 1-877-332-0755 immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
IF ON SKIN:
• Wash with plenty of soap and water.

APPLICATION DIRECTIONS:
While wearing gloves, place one block of bait in the bat station. See additional GRAPHICS AND TEXT. Place the bat station at a point of highest activity along a wall or in a corner where signs of house mice have been seen. If additional units are to be used, place bat stations at intervals of 8- to 10-feet. While wearing gloves, replace bat in bat station if bait is consumed or contaminated and house mice still are using the bat station. Maintain an uninterrupted supply of fresh bait for at least 15 days or until there are no longer any fresh signs of house mouse activity in infested areas.

STORAGE AND DISPOSAL
Pesticide Storage: Store only in original container, in a cool dry place inaccessible to children and pets.
Pesticide Disposal and Container Handling: Nonrefillable Container. Do not reuse or refill this container except as described in the directions for this.
If Empty: Please in a well-ventilated area.
If Partially Filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

Questions or Comments? Contact 1-877-332-0755 www.tomcat.com

Use Restrictions:
This bat station may be used in indoor or areas accessible to children, consistent with all use restrictions. DO NOT USE this product outdoors or in areas accessible to pets.

for control of house mice. This bat station can only be refilled with the block bait sold with this station. This product must be used in buildings constructed with all use restrictions and other requirements indicated on this label. Do not place this bat station or stored bait blocks in any area where there is a possibility of contaminating food or surfaces that come into direct contact with food. Store bat block rolls out of reach of children and pets.

SELECTION OF TREATMENT AREAS:
Determine areas where house mice will most likely find and consume the bait. Generally, these areas are along walls, by grained openings, in corners and concealed places.

TREATMENT FOR PET POISONING
If an animal eats this bait, call a veterinarian at once.
NOTE TO PHYSICIAN OR VETERINARIAN:
Contains the nerve poison bromethalin. This product is not an anticoagulant or rodenticide. For humans or animals ingesting bait and/or showing poisoning signs (such as muscle tremors, loss of right hind leg, or seizures for animals), bat absorption of the poison is the product. Subsequent symptoms, if present, would be the result of central damage and should be treated accordingly through administration of an anticoagulant and corticosteroid.

ENVIRONMENTAL HAZARDS
This product is extremely toxic to fish, birds and other wildlife. Dogs, cats, and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
READ THIS LABEL: Read this entire label and follow all uses directions and use precautions. Only use for the uses, pests and application methods described on this label.
