PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER
CORROSIVE. CAUSES IRREVERSIBLE EYE DAMAGE AND SKIN BURNS. HARMFUL IF SWALLOWED. MAY BE FATAL IF ABSORBED THROUGH THE SKIN. MAY BE FATAL IF INHALED. MAY CAUSE ALLERGIC SKIN REACTIONS.

Do not get in eyes, on skin, or on clothing. Mixers, loaders and others exposed to this product must wear: long-sleeved shirt and long pants, chemical resistant gloves such as nitrile or butyl rubber; shoes plus socks; goggles and face shield; and chemical resistant apron. Discard clothing or other absorbent materials that have been exposed to this product. Wash immediately with soap and water or other suitable detergent and hot water. Keep and wash PPE separately from other laundry. Users should wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Users should remove clothing immediately if pesticide gets inside. Those with Parkinson's disease may get skin damage. Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly. This product may cause skin sensitization reactions in some people.

ENVIRONMENTAL HAZARDS
This chemical is toxic to aquatic plants, fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, canals or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of waste. Keep this product out of the reach of children.

STORAGE AND DISPOSAL

PESTICIDE STORAGE
Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Do not apply this product in a way that will contact workers or other persons, including children.

PESTICIDE DISPOSAL
Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide or residue is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste Program at the EPA Regional Office for guidance.

DISPOSAL OF UPLISTED CONTAINER
Do not reuse or refill this container. Triple rinse or steam rinse empty container promptly after emptying. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by procedures approved by state and local authorities.

GENERAL
CONSULT FEDERAL, STATE, OR LOCAL DISPOSAL AUTHORITIES FOR APPROVED ALTERNATIVE PROCEDURES.

NET WEIGHT: 9.04 pounds per gallon
LOT NO.: ChemTreat CL2155

DIRECTIONS FOR USE

MICROBIOLOGICAL WATER TREATMENT

For the control of microbial biofilms, bacteria, algae, and fungi, add ChemTreat CL2155 to process water to provide continuous flow, industrial recirculating water cooling towers, industrial recirculating closed loop water cooling systems, brewery pasteurizers, can washers, retort water systems, industrial scrubbing systems, evaporative condenser water systems, hydrotropic refrigeration water systems, oilfield water treatment systems, chemical process water systems, including chemical treatment, all types of industrial cooling systems, central heating systems, and all types of industrial water treatment systems. Add ChemTreat CL2155 to any system to ensure uniform mixing.

INITIAL Dose: When the system is noticeably fouled, apply 50 – 331 ppm ChemTreat CL2155 (2.0 – 13.3 ppm active ingredient) to the system for 24 hours. Follow up with 2 – 4 ppm ChemTreat CL2155 per 1000 gallons of water in the system. Repeat until control is achieved. Badly fouled systems should be cleaned before treatment is begun.

SUBSEQUENT Dose: When microbial control is evident, add 13 – 82 ppm ChemTreat CL2155 microbicide (0.5 – 3.3 ppm active ingredient) which is 0.11 – 0.68 pound or 1 – 6.9 fluid ounce of ChemTreat CL2155 per 1000 gallons of water in the system weekly or as needed to maintain control.

WASHER SYSTEMS/PAINT SPRAY BOOTHS

Add to the air washer suction, chill water supply, or paint spray booth to insure uniform mixing, 13-331 ppm ChemTreat CL2155 microbicide (0.5 – 3.3 ppm active ingredient) which is 0.28 – 8.46 pounds or 1 – 4 fluid ounce of ChemTreat CL2155 per 1000 gallons of water in the system depending upon the severity of contamination to control microbial biofilms, algae, and fungi, in which case this level may need to be adjusted for industrial air washer systems and paint spray booths.

INTERMITTENT OR SLUG METHOD
INITIAL Dose: When the system is noticeably fouled, apply 56 – 331 ppm ChemTreat CL2155 microbicide (2.2 – 13.2 ppm active ingredient) for 24 hours to the system. Follow up with 2 – 4 ppm ChemTreat CL2155 per 1000 gallons of water in the system. Repeat until control is achieved.

SUBSEQUENT Dose: When microbial control is evident, add 13 – 82 ppm ChemTreat CL2155 microbicide (0.5 – 3.3 ppm active ingredient) which is 0.11 – 0.68 pound or 1 – 6.9 fluid ounce of ChemTreat CL2155 per 1000 gallons of water in the system weekly or as needed to maintain control. Badly fouled systems should be cleaned before treatment is begun.

CONTINUOUS FEED METHOD
INITIAL Dose: When the system is noticeably fouled, apply 56 – 331 ppm ChemTreat CL2155 microbicide (2.2 – 13.2 ppm active ingredient) which is 0.28 – 8.46 pounds or 1 – 4 fluid ounce of ChemTreat CL2155 per 1000 gallons of water in the system. Repeat until control is achieved.

SUBSEQUENT Dose: Maintain this treatment level by adding a continuous feed of 13 – 82 ppm ChemTreat CL2155 microbicide (0.5 – 3.3 ppm active ingredient) which is 0.11 – 0.68 pound or 1 – 6.9 fluid ounce of ChemTreat CL2155 per 1000 gallons of water in the system weekly or as needed to maintain control. Badly fouled systems should be cleaned before treatment is begun.

NOTE: For use only in systems that maintain effective mi-sti-eliminating components.

FIELD INJECTION WATERS

ChemTreat CL2155 is recommended for the control of microbial biofilms, bacteria, algae and fungi in industrial wastewater treatment and sewage systems. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of waste. Keep this product out of the reach of children.

The product can be used in a wide range of applications, including but not limited to: the prevention of corrosion and the control of biofilm growth in water treatment systems, cooling tower systems, and other industrial water treatment systems. ChemTreat CL2155 is designed to provide effective control of microbial biofilms, bacteria, algae, and fungi in water treatment and industrial settings. This product is effective in preventing and controlling biofilm growth in water systems, ensuring efficient water treatment and optimal performance.
