TRABON EC
FOR COMMERCIAL FARM AND COMMERCIAL APPLICATOR USE

TRABON EC is a Broad Spectrum Fungicide for use against pests in grapes.
Provides curative and preventative control of powdery mildew.

Active Ingredient:
Soybean Oil ........................................ 45.0%
Other Ingredients: .................................. 55.0%
Total: ............................................. 100.0%

KEEP OUT OF REACH OF CHILDREN
CAUTION

NET CONTENTS:
1.06 Quart (1.00 Liter)

PERSONAL PROTECTION EQUIPMENT (PPE)
Applicators and other handlers must wear long-sleeved shirt, long pants, shoes and socks. Follow manufacturer's instructions for cleaning and maintaining PPE. If no instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS
Users should:
• Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
• Remove clothing if pesticide gets inside. Then wash thoroughly and put on clean clothing.
• Remove PPE after handling this product. Wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS
Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate. This product may be toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product if bees are visiting the treatment area.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.
Do not reuse empty container. Store in tightly closed container in a cool, dry place.
PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available.

SPILLS, LEAKS OR OTHER EMERGENCY
For minor spills or leaks, etc., follow all precautions indicated on this label and clean up immediately. Take special care to avoid contamination of equipment and facilities during cleanup procedures and disposal of wastes. In the event of a major spill, fire or other emergency, call CHEMTREC at 1-800-262-8200 day or night.

CONDITIONS OF SALE AND WARRANTY

IMPORTANT: READ BEFORE USE
Read the entire Directions for Use, Conditions of Warranties and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product container at once. By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties and Limitations of Liability.

CONDITIONS: The Directions for Use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of the Manufacturer and Seller. All such risks shall be assumed by the User or Buyer.

DISCLAIMER OF WARRANTIES: To the extent consistent with applicable law, the Manufacturer and Seller make no other warranties, express or implied, of merchantability or of fitness for a particular purpose or otherwise, that extend beyond the statements made on this label. No agent of Manufacturer and Seller is authorized to make any warranties beyond those contained herein or to modify the warranties contained herein. To the extent consistent with applicable law, Manufacturer and Seller disclaim any liability whatsoever for special, incidental or consequential damages resulting from the use or handling of this product.

LIMITATIONS OF LIABILITY: To the extent consistent with applicable law, the exclusive remedy of the user or buyer for any and all losses, injuries or damages resulting from the use or handling of this product, whether in contract, warranty, tort, negligence, strict liability or otherwise, shall not exceed the purchase price paid or at Manufacturer’s or Seller’s election, the replacement of product.

*Not for use in California

**GENERAL INFORMATION**

TRABON EC is an emulsified suspension of soybean oil that when mixed with water according to the directions and applied directly to pests at the specified rates will control the listed pests.

TRABON EC is a contact pesticide. For maximum pest control, direct contact of sprays with pests is essential. Best applied in early morning or late afternoon when pests tend to be most active. The frequency of application should be adjusted to maintain sufficient pest control. Application frequency may vary depending on crop type, geographical region and local weather conditions. Consult with your state Agricultural Extension Specialist for specific recommendations regarding the crop type and pest control recommendations for your region.

Use the low application rates on the label when pest densities are relatively low. Use the progressively higher rates on the label for progressively higher pest populations.

TRABON EC has not been tested on all plant varieties under all growing conditions. Test a small number of plants for damage before applying TRABON EC to the entire crop.
INTEGRATED PEST MANAGEMENT AND RESISTANCE MANAGEMENT

Use an effective IPM program. Avoid repeated or sequential use of products in the same mode of pesticidal action. Monitor crop for pest pressure and for loss of efficacy. Contact your extension specialist, certified crop consultant, or manufacturer for the latest resistance management information. Contact the producer to report loss of efficacy.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the State or Tribal agency responsible for pesticide regulation.

APPLICATION EQUIPMENT

TRABON EC may be applied using conventional or low volume ground application equipment including but not limited to backpack sprayers, tractor mounted boom sprayers, and airblast sprayers. Do not apply this product aerially or through any type of irrigation system.

MIXING INSTRUCTIONS

Use sufficient water to ensure thorough and uniform coverage to infested plant material. Add enough water to spray tank to allow agitation. Slowly add TRABON EC while agitator is running and then add remaining water until desired volume is reached. Do not over agitate or excessive foaming may result. Triple rinse and flush spray equipment thoroughly following each use.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard; 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements set in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 4 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated such as plants, soil, or water is:
- Coveralls,
- Shoes plus socks, and
- Waterproof gloves.

TANK MIX

TRABON EC has not been tested for use in tank mixes with commonly used pesticides or spray adjuvants. It is advisable to test tank mix combinations for physical compatibility and plant safety. This product cannot be mixed with any product with a label prohibiting mixing. Do not exceed label rates. Application must be made in accordance with the more restrictive label limitations and precautions. Read and follow all label instructions. TRABON EC is most effective in tank mixes with a pH between 6.0 and 8.0. If necessary, buffer the tank mix water to conform to the optimal range.
