DIRECTIONS FOR USE:
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ ALL PRECAUTIONARY STATEMENTS BEFORE USE.

WHY YOU SHOULD USE THIS PRODUCT:
This is an effective, non-foaming algaecide that, when used regularly, will prevent and kill green algae in spas and hot tubs. For best results, use with other Spa Selections™ products.

HOW TO USE:
Always apply chemicals separately. Never combine them. This product works best when added in several places by itself directly to spa or hot tub water with the pump running. Continue to keep the pump running for at least 30 minutes after addition of algae. Wait 15 minutes before entering the spa. Spas or hot tubs with heavy growth of algae must be cleaned prior to using this product.

INITIAL DOSE: Add 1 fl. oz. per 400 gallons water. Initial dose is used upon filling of spa or hot tub. For visible algae growth or slimy interior, treat with “Initial Dose.” Remove algae debris. For maximum effectiveness, drain and clean spas or hot tubs containing heavy algae growth prior to treatment. Drain and clean spa or hot tub at least once a month or as needed depending on bather load.

MAINTENANCE DOSE: After initial treatment, to keep your spa free of algae growth, add 1/4 fl. oz. per 400 gallons every 5-7 days. This algaecide can be used in conjunction with chlorine or bromine sanitizer systems.
