**First Aid:**
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

| IF IN EYES: | Hold eye open and rinse slowly with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. |
| IF ON SKIN OR CLOTHING: | Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. |
| IF SWALLOWED: | Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. |

**Precautionary Statements:**

**Environmental Hazards:** This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, reservoirs, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

**Physical or Chemical Hazards:** Strong oxidizing agent. Do not mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, remove and discard container. It is possible, isolate container in open air or well ventilated area. Food area with large volumes of water.

**Notes:**
Buyer assumes all responsibility for safety and use not in accordance with directions.

**Directions for Use:**

**Swimming Pool Disinfectant:** When used as directed, this product is effective as a swimming pool water disinfecting agent.

Ensure all pool equipment is working properly. Backwash the filter system following manufacturer's directions. Adjust pH to between 7.2 - 7.6. Check for metals and if present add scale inhibitor to prevent staining of pool surface. When using other products as outlined in the directions for this product, follow directions on those products.

**Superchlorination:** Use one teaspoon of this product per 100 gallons of water (or 1/4 cup per 1,000 gallons). Superchlorination may be needed on a nightly basis in a heavily used spa or as frequently as once a week in a moderately used spa. Frequency of treatment is dependent on ambient temperatures, light intensity, water re-circulation and pool load.

**Maintenance Doses:** With pump on, add 1/2 teaspoon of this product per 100 gallons of water (or 1/4 teaspoon per 1,000 gallons) as an initial treatment. Repeat at 15 to 30 minute intervals until a residual of 3 to 5 ppm of available chlorine is established as determined by a test kit. A test kit must be used regularly to determine the frequency of additional doses of this product needed to maintain the chlorine residual of 3 to 5 ppm.

**Reentry into Treated Swimming Pools is Prohibited Above Levels of 3 ppm Chlorine Due to Risk of Body Injury.**

**Storage and Disposal:**

Do not contaminate water, food or feed by storage and disposal.

**Pesticide Storage:** Keep this product dry in a heavily used spa or as frequently as once a week in a moderately used spa. Frequency of treatment is dependent on ambient temperatures, light intensity, water re-circulation and pool load.

**Disposal:**

Never use or refill this container. Offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

FIRST AID: Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF INHALED: Get fresh air. If person is not breathing, give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.
IF SWALLOWED: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.
NOTE: To prevent damage to pool surface, use a pool brush to disperse any granules that may have settled to the bottom of the pool. After use of this product it is recommended that a preventative algae treatment be added on a weekly basis.
REENTRY INTO TREATED SWIMMING POOLS IS PROHIBITED ABOVE LEVELS OF 3 PPM CHLORINE DUE TO RISK OF BODY INJURY.
For swimming pool algae: When used as directed, this product kills algae and will rid your pool of unsightly algae spots. This product is ideal for use in vinyl lined, fiberglass or colored plaster surface pools.
Ensure all pool equipment is working properly. Backwash the filter system following manufacturer’s directions. Adjust pH to between 7.2 - 7.6. Check for metals and if present add stain and scale inhibitor to prevent staining of pool surface. When using other products as outlined in the directions for this product, follow directions on those products.
Before using this product, brush all surface-algae clinging algae paying special attention to pool steps, ladder steps and around skimmer and lights. At night, or when the pool is not in use, broadcast this product directly into the water in the deep end of the pool with pump running. Use two pounds of this product per 10,000 gallons for medium to heavy algae growth and one pound per 10,000 gallons for light algae growth. To prevent possible damage to pool surface, use a pool brush to disperse any granules that may have settled to the bottom of the pool.
Brush any remaining algae and clean/baehach/figure. If algae is still visible, repeat treatment.
REENTRY INTO TREATED SWIMMING POOLS IS PROHIBITED ABOVE LEVELS OF 3 PPM CHLORINE DUE TO RISK OF BODY INJURY.
For spa and hot tub disinfectant: When used as directed, this product is effective as a spa and hot tub water disinfecting agent. Ensure all spa and hot tub equipment is working properly. Backwash/clean the filter system following manufacturer’s directions. Adjust pH to between 7.2 - 7.6. When using other products as outlined in the directions for this product, always follow directions on those products.
SUPERCHLORINATION: Use one teaspoon of this product per 100 gallons of water (or 1/4 cup per 1,000 gallons).
Superchlorination may be needed on a nightly basis in a heavily used spa or as infrequently as once a week in a moderately used spa. Frequency of treatment is dependent on ambient temperatures, light intensity, water re-circulation and bather load.
MAINTENANCE DOSES: With pump on, add 1/2 teaspoon of this product per 100 gallons of water (or 5 teaspoons per 1,000 gallons) as an initial treatment. Repeat at 15 to 20 minute intervals until a residual of 3 to 5 ppm of available chlorine is established as determined by a test kit. A test kit must be used regularly to determine the frequency of additional doses of this product needed to maintain the chlorine residual of 3 to 5 ppm.
REENTRY IS PROHIBITED ABOVE LEVELS OF 3 PPM CHLORINE DUE TO RISK OF BODY INJURY.
Storage and Disposal: Do not contaminate water, food or feed by storage and disposal.
Pesticide Storage: Keep this product dry in a heavily used spa or as infrequently as once a week in a moderately used spa. Frequency of treatment is dependent on ambient temperatures, light intensity, water recirculation and bather load.
MAINTENANCE DOSES: With pump on, add 1/2 teaspoon of this product per 100 gallons of water (or 5 teaspoons per 1,000 gallons) as an initial treatment. Repeat at 15 to 20 minute intervals until a residual of 3 to 5 ppm of available chlorine is established as determined by a test kit. A test kit must be used regularly to determine the frequency of additional doses of this product needed to maintain the chlorine residual of 3 to 5 ppm.
REENTRY IS PROHIBITED ABOVE LEVELS OF 3 PPM CHLORINE DUE TO RISK OF BODY INJURY.
Surface temperatures less than 70°F, or as an alternative application procedure, predisperse this product prior to application for the deep end of the pool. Dissolve this product outdoors, in a clean plastic bucket with a clean plastic or wooden spoon. Add this product to water. NEVER add water to this product. NEVER add more than 2 pounds of this product to 3 gallons of cool water. Do not mix with other products while predispersing.
MAINTENANCE DOSAGE: With pump running, broadcast 4 ounces of this product per 10,000 gallons directly into the water in the deep end of the pool as an initial treatment. Repeat additions until a residual of 1-3 ppm chlorine is established as determined by the use of a test kit. To prevent damage to pool surface, use a pool brush to disperse granules that may have settled to the bottom of the pool.
NEVER ALLOW UNDISPERSED PRODUCT TO REST IN CONTACT WITH BLEACHABLE POOL SURFACES. Regular use of a test kit is necessary to determine when it is necessary to add another dose of this product to maintain a residual of 1-3 ppm available chlorine in the pool water. An average daily dose requirement is 2-3 ounces of this product per 10,000 gallons of water.
