**SUPERCHLORINATION**

Superchlorination is necessary at the start of the bathing season, upon filling the pool, every week during hot weather and following heavy rains. Superchlorination is performed by adding two or three times the normal amount of chlorine to oxidize and remove unsightly organic and inorganic material. Superchlorinate the pool with a suitable granular product by following the directions on that product’s label. Keep pump-filter system running for at least 10 hours after treatment. Maintain pH between 7.2 and 7.6. Frequency of treatment and dosage is dependant on ambient temperatures and bather load. Do NOT reenter pool until the chlorine residual has dropped to between 1.0 – 3.0 ppm.

**FIRST AID:**

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. SEE BACK PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS.

**Net weight:** 50 LBS. (22.68 KG)

**PRECAUTIONARY STATEMENTS:**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS. DANGER. CORROSIVE. Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through the skin. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.**

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish and aquatic organisms. Do not contaminate water by cleaning of equipment or disposal of waste. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluents containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

**PHYSICAL AND CHEMICAL HAZARDS:** Strong oxidizing agent: Do NOT mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will produce chlorine gas, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air, well ventilated area. Flood area with large volumes of water.

**DIRECTIONS FOR USE:**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and use directions.

This product, when used as directed, kills algae and will rid your pool of unsightly algae spots. Use this product only in WHITE PLASTER POOLS. Do NOT use this product on painted, vinyl lined, fiberglass or colored plaster surface pools as damage may occur to the pool surface. Read entire label and use strictly in accordance with precautionary statements and use directions.

**ALGACIDE**

This product, when used as directed, kills algae and will rid your pool of unsightly algae spots. Use this product only in WHITE PLASTER POOLS. Do NOT use this product for any painted, vinyl lined, fiberglass or colored plaster surface pools as damage may occur to the pool surface. Read entire label and use strictly in accordance with precautionary statements and use directions.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS.

DANGER. CORROSIVE. Causes severe eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through the skin. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms. Do not contaminate water by cleaning of equipment or disposal of waste. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other water bodies under the requirements of the National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluents containing this product to sewage systems without notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent: DO NOT mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with organic matter or other chemicals will start a chemical reaction leading to hazardous gas and possibly fire or explosion. In case of contamination or decomposition, do not reutilize container. If possible, isolate container in open air, well ventilated area. Flood area with large volumes of water.

DIRECTIONS FOR USE:

ALGAEKIDE

This product, when used as directed, kills algae and will rid your pool of unsightly algae spots. Use this product only in WHITE PLEATED POOLS. DO NOT use this product on painted, vinyl lined, fiberglass or colored plastic surface pools as damage may occur to the pool surface. Read entire label and use strictly in accordance with precautionary statements and use directions.

Ensure all pool equipment systems are in proper working condition. Before using this product, shut off pump and vigorously brush all surface clinging algae. Wait one hour for the water to become clear before product application. Dosage: Use two pounds of this product per 10,000 gallons for medium to heavy algae growth and one pound per 10,000 gallons for light algae growth.

APPLICATION: Skimmer – Use the method to avoid damage and staining to vinyl liner, fiberglass and painted pool surfaces. First, empty skimmer and any in-line automatic chemical feeding device of all chemicals and debris. Filter system should be on and water flowing through the skimmer. Pour correct dosage of this product directly into the skimmer making certain that the product is drawn into the system and does not accumulate. Accumulated product may generate explosive gases resulting in serious bodily injury. Keep pump-filter system running for at least four hours following treatment. Broadcast – Scatter correct dosage across deep end of pool being careful to avoid wind-blown dust from entering eyes. Keep pump-filter system running for at least four hours following treatment. Use broadcast method only in white pleated pools.

REENTRY: REENTRY INTO TREATED SWIMMING POOLS IS PROHIBITED ABOVE LEVELS OF 3 PPM OF CHLORINE DUE TO RISK OF BODILY INJURY.

HOW TO CALCULATE POOL CAPACITY

SHAPE OF POOL

GAL. OF WATER (Dimensions in ft.)

Rectangular . . . . . . . . . Length x width x avg. depth x 7.5

Oval with straight sides . . . . Long diameter x short diameter x avg. depth x 6.7

STORAGE AND DISPOSAL:

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Do not contaminate water, food or feed by storage or disposal. Store in a dry, cool and well-ventilated area. Avoid moisture getting into container. Keep off wet floors. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with organic matter or other chemicals will start a chemical reaction leading to hazardous gas and possibly fire or explosion. In case of contamination or decomposition, do not reutilize container. If possible, isolate container in open air, well ventilated area. Flood area with large volumes of water.

DISPOSAL: 

If empty: Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available.

If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

MAINTENANCE TREATMENT

Ensure all pool equipment systems are in proper working condition. Backwash the filter system following manufacturer’s directions. When using other products as outlined in directions for this product, always follow directions on those products. Adjust and maintain pool water pH in the range of 7.2-7.8 as indicated by a suitable test kit. For maximum effectiveness, it is recommended that the pool be first stabilized with 25-35 ppm of Cyanuric Acid to reduce chlorine loss in sunlit pools. This product introduces chlorine and additional Cyanuric Acid into the pool to assure a stabilizing effect.

DOSAGE: To initially achieve 1.0-1.5 ppm available chlorine, add 1.25 oz. product per 10,000 gallons of water. Add 1/4 oz. product per 10,000 gallons of water daily or as needed to maintain that level. A free available chlorine level of 1.5 - 1.5 ppm should be maintained. Check pool frequently with a test kit and maintain residual chlorine level in the range of 0.5 and 1.5 ppm and pH of 7.2 – 7.8.

APPLICATION: Skimmer – Use the method to avoid damage and staining to vinyl liner, fiberglass and painted pool surfaces. First, empty skimmer and any in-line automatic chemical feeding device of all chemicals and debris. Filter system should be on and water flowing through the skimmer. Pour correct dosage of this product directly into the skimmer making certain that the product is drawn into the system and does not accumulate. Accumulated product may generate explosive gases resulting in serious bodily injury. Keep pump-filter system running for at least four hours following treatment. Broadcast – Scatter correct dosage across deep end of pool being careful to avoid wind-blown dust from entering eyes. Keep pump-filter system running for at least four hours following treatment. Use broadcast method only in white pleated pools.

REENTRY: REENTRY INTO TREATED SWIMMING POOLS IS PROHIBITED ABOVE LEVELS OF 3 PPM OF CHLORINE DUE TO RISK OF BODILY INJURY.
