Swim Best®

TRICHLOR
CHLORINATING STICKS

Stabilized Chlorinating Sticks for Chlorinators and Skimmers
• Concentrated • Stabilized

ACTIVE INGREDIENT
Trichloro-s-triazinetrione ........................................ 98.6%
OTHER INGREDIENTS ................................................ 1.4%
TOTAL: ........................................................................ 100.0%

Available Chlorine 90%

FIRST AID: Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 min-
ules. Call poison control center or doctor for treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes, or until irritation decreases. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call poison control center or doctor immediately for treatment advice. If able to swallow. Do not induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respira-
tion, preferably mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice.

NOT DANGEROUS TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

KEEP OUT OF REACH OF CHILDREN

DANGER

NET WEIGHT 25 LBS. (11.34 KG)

APPLICATION:

IN FLOATERS AND CHLORINATORS: Dispense this product in an appropriate floating or stationary feeding device, such as an automatic chlorinator. Fill the feeder with this product and adjust the feeding mechanism to provide a continuous level of 1.0 – 3.0 ppm free available chlorine in the pool as determined by a test kit or test strips. Always follow feeder manufacturer's instructions. Chlorine demand will vary with weather and degree of pool use, but, normally, about 2 ounces of this product per 10,000 gallons of water will be needed daily. The feeding device should be checked regularly and refilled as needed.

SKIMMERS: This product may be dispensed through the pool skimmer if the skimmer and piping to the pump is plastic. Never add other products through the skimmer when using this product as fire and explosion may result. Initially add one of this product to the skimmer per 10,000 gallons of water. Additional product should be added as necessary to maintain a free available chlorine residual of 1.0 – 3.0 ppm as determined by a test kit. Caution. This product may cause damage to vinyl liners or other bleachable surfaces with direct contact.

REENTRY: REENTRY INTO TREATED SWIMMING POOLS IS PROHIBITED ABOVE LEVELS OF 3 PPM OF CHLORINE DUE TO RISK OF BODILY INJURY.

STORAGE AND DISPOSAL:

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Do not contaminate water, food or feed by storage or disposal. Store in a dry, cool and well-ventilated area. Avoid moisture getting into container. Keep off wet floors.

CONTAINER HANDLING AND DISPOSAL:

Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER, CORROSIVE. Causes irre-
versible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through
the skin. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety
glasses. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent: DO NOT mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. Use clean, dry utensils. Do not add this product to any dispensing de-
vice containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chem-
icals will start a chemical reaction and generate heat, hazardous gas, possible fire and ex-
plosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air, well ventilated area. Flood area with large volumes of water.

SWIMMING POOL DISINFECTANT

This product, when used as directed, is effective as a swimming pool disinfectant.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its label-
ing. Read entire label and use strictly in accordance with precautionary statements and use directions.

SUPERCHLORINATION

Superchlorination is necessary at the beginning of the bathing season, whenever the pool is filled, every week during hot weather, and following heavy rain or windstorms. Super-
chlorinate the pool with a suitable granular product by following directions on that prod-
uct's label. Keep pump-filter system running for at least 10 hours after treatment. Frequency of treatment is dependent on ambient temperatures and bathlor load. DO NOT reenter pool until the chlorine residual has dropped to 1.0 – 3.0 ppm.

MAINTENANCE TREATMENT

Ensure all equipment and systems are in proper working condition, and that the water is balanced. When using other products as outlined in directions for this product, always follow directions on those products. Adjust and maintain pool water pH in the range of 7.2-7.6 as indicated by a suitable test kit. Superchlorinate the pool with a suit-
able granular product to establish a free available chlorine residual of 1.0 – 3.0 ppm. To achieve effectiveness, it is recommended that the pool be first stabilized with 25-
35 ppm of Cyanuric Acid to reduce chlorine loss in sunlit pools. This product introduces additional Cyanuric Acid into the pool to assure a stabilizing effect.
chlorine and additional Cyanuric Acid into the pool to assure a stabilizing effect. For maximum effectiveness, it is recommended that the pool be first stabilized with 25-

ppm of Cyanuric Acid to reduce chlorine loss in sunlit pools. This product introduces...
