3-inch tablets
Concentrated • Stabilized • Wrapped
Stabilized chlorinating tablets for swimming pools

Active Ingredient:
Trichloro-s-triazine trione ........ 99%
Other Ingredients: ............... 1%
Total ................................ 100%
Available Chlorine — 90%

KEEP OUT OF REACH OF CHILDREN
DANGER
See First Aid Statement and
Additional Precautions on Back Panel

NET WEIGHT 50 LBS (22.7 kg)
**FIRST AID**

If In Eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, and continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If Inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

If Swallowed:
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

If on Skin or Clothing:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For medical emergencies, call the Poison Control Center at 1-800-222-1222.

**NOTE TO PHYSICIAN**

Probable mucosal damage may contraindicate the use of gastric lavage.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER:** Corrosive. Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or clothing. Do not breathe dust, vapor or spray mist. Wear goggles or safety glasses, rubber gloves and protective clothing when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse.

**ENVIRONMENTAL HAZARD:** This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

**PHYSICAL OR CHEMICAL HAZARD:** Strong oxidizing agent. Do not mix with other chemicals. Never add water to product. Always add product to large quantities of water. Use only clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic material or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible fire or explosion. Avoid contact with flammables or burning materials, such as a lighted cigarette. In case of contamination or decomposition, do not reapply container. If possible, isolate container in open and well-ventilated area and flood with large amounts of water.

**DIRECTIONS FOR USE:** It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**READ ALL PRECAUTIONARY STATEMENTS BEFORE USE**

**AUTOMATIC CHLORINATORS AND FLOATING CHLORINATORS:** Add In The Swim 3-inch tablets according to the directions on your chlorinator.

**CARTRIDGE CHLORINATORS:** Remove top of cartridge and refill with In The Swim 3-inch tablets. Follow the directions on the cartridge. Important: Allow the empty cartridge to dry before refilling.

**DO NOT ADD IN THE SWIM 3-INCH TABLETS DIRECTLY INTO THE POOL OR THE POOL SKIMMER AS DAMAGE WILL OCCUR.**

**START-UP:** 1. Adjust the pH to 7.2-7.8 (ideal pH is 7.4-7.6), the Total Alkalinity to 80-120 ppm depending on type of primary sanitizer used (80-100 ppm for sodium hypochlorite, calcium hypochlorite or lithium hypochlorite and 100-120 ppm for dichlor, trichlor or bromine tablets) and Calcium Hardness to 200 ppm minimum.

2. Superchlorinate with your preferred shock product to attain a Free Available Chlorine (FAC) level of 1-4 ppm. Follow use directions on those product labels.

3. The next day, stabilize your pool using a stabilizer. Follow label directions.

**ROUTINE USE:** The amount of In The Swim 3-inch tablets that must be added on a routine basis will vary with individual pool conditions such as bather load, water temperature, organic contaminants and other conditions. Normally, one tablet per 10,000 gallons of pool water will be needed every week. Maintain a Free Available Chlorine (FAC) level of 1-4 ppm at all times. It may be necessary to increase the chlorinator feed rate or superchlorinate during heavy periods of use to maintain this FAC level. Maintain the pH between 7.2-7.8 (ideal pH is 7.4-7.6), the Total Alkalinity between 80-120 ppm depending on type of primary sanitizer used (80-100 ppm for sodium hypochlorite, calcium hypochlorite or lithium hypochlorite and 100-120 ppm for dichlor, trichlor or bromine tablets) and Calcium Hardness between 200-400 ppm. Test regularly with a reliable test kit and make the necessary adjustments using the appropriate pool care product. To remove excessive organic material and keep the water sparkling clear, superchlorinate weekly with your preferred shock product when water temperatures are above 80°F. Follow use directions on those product labels. You may only need to superchlorinate every other week when water temperatures are below 80°F. Weekly testing of treated swimming pools is prohibited above levels of 4 ppm of chlorine due to risk of body injury.

**ALGAE CONTROL:** In case of algae, superchlorinate with your preferred shock product according to the use directions on that product label. Pool should not be entered until the chlorine level is 1-4 ppm.

**STORAGE AND DISPOSAL:** Do not contaminate water, food, or feed by storage or disposal. STORAGE: Keep product dry in its original, tightly closed container when not in use. Store container in a cool, dry, well-ventilated area away from heat or open flame. Storage area should be locked and inaccessible to children. PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triple rinse (or equivalent) empty container then offer for recycling, if available, or discard in trash.
