FOOD CONTACT SANITIZING PERFORMANCE: This product is an effective food contact sanitizer in 1 minute at 1.36 oz. per gal. of 500 ppm hard water (200 ppm active) on hard, non-porous surfaces: Aeromonas hydrophila, Campylobacter jejuni, Clostridium perfringens-vegetative, Escherichia coli, Escherichia coli O136:H12, Escherichia coli O137:H12, Escherichia coli O45K:H12, Escherichia coli O26:H11, Enterococcus faecalis Vancocin Resistant, Enterobacter sakazakii, Listeria monocytogenes, Klebsiella pneumoniae, Salmonella enterica, Salmonella enterica serovar Newport, Salmonella enterica serovar Typhimurium, Staphylococcus aureus, Staphylococcus aureus Methicillin Resistant, Streptococcus pyogenes, Yersinia enterocolitica.

This product is an effective food contact sanitizer in 1 minute at 1 oz. per gal. of 500 ppm hard water (200 ppm active) on hard, non-porous surfaces: Staphylococcus aureus, Klebsiella pneumoniae.

NON-FOOD CONTACT SANITIZING PERFORMANCE: This product is an effective one-step sanitizer in 3 minutes at 0.25 oz. per gal. of water (150 ppm active) and 5% soil on hard, non-porous surfaces: Staphylococcus aureus, Klebsiella pneumoniae.

DISINFECTION PERFORMANCE IN INSTITUTIONS (Hospitals, Dental Offices, Nursing Homes, and Other Health Care Institutions) AND NON-MEDICAL FACILITIES (Schools, Restaurants, Food Services): This product kills the following bacteria in 10 minutes at 3.5 oz. per gal. of water (450 ppm active) and 5% soil on hard, non-porous surfaces: Burkholderia cepacia, Campylobacter jejuni, Clostridium perfringens-vegetative, Corynebacterium amygosses, Escherichia coli O157:H7, Enterococcus faecalis Vancocin Resistant (VRE), Klebsiella pneumoniae, Listeria monocytogenes, Pseudomonas aeruginosa, Rhodococcus equi, Salmonella enterica serovar Newport, Salmonella enterica serovar Typhimurium, Salmonella typhi, Shigella sonnei, Staphylococcus aureus, Staphylococcus aureus Methicillin Resistant, Streptococcus pyogenes, Yersinia enterocolitica, and a wide range of foodborne pathogens.

This product is toxic to fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or marine environments. Use of this product is limited to surfaces not in direct contact with生活 or body fluids. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

BEFORE USING THIS PRODUCT IN FEDERALLY INSPECTED MEATS OR MEAT PRODUCTS, FOLLOW THE RECOMMENDATIONS IN CFR 190.3(a)(1), (a)(2), (a)(3), (a)(4), (a)(5), (a)(6), (a)(7), (a)(8), (a)(9), (a)(10), and (a)(11).}

FOOD CONTACT SANITIZING PERFORMANCE FOR PUBLIC EATING PLACES, DAILY PROCESSING EQUIPMENT AND FOOD PROCESSING EQUIPMENT IN OTHER NON-POROUS SURFACES: This product is an effective food contact sanitizer in 1 minute at 1 oz. per gal. of water (500 ppm active) on hard, non-porous surfaces: Aeromonas hydrophila, Campylobacter jejuni, Escherichia coli, Enterobacter sakazakii, Listeria monocytogenes, Pseudomonas aeruginosa, Salmonella enterica serovar Newport, Salmonella enterica serovar Typhimurium, Staphylococcus aureus, Staphylococcus aureus Methicillin Resistant, Streptococcus pyogenes, Yersinia enterocolitica.

This product is an effective food contact sanitizer in 1 minute at 0.25 oz. per gal. of water (150 ppm active) on hard, non-porous surfaces: Bacteroides fragilis, Campylobacter jejuni, Clostridium perfringens-vegetative, Corynebacterium amygosses, Escherichia coli, Escherichia coli O136:H12, Escherichia coli O137:H12, Escherichia coli O45K:H12, Escherichia coli O26:H11, Enterococcus faecalis Vancocin Resistant, Enterobacter sakazakii, Listeria monocytogenes, Klebsiella pneumoniae, Salmonella enterica, Salmonella enterica serovar Newport, Salmonella enterica serovar Typhimurium, Salmonella typhi, Shigella sonnei, Staphylococcus aureus, Staphylococcus aureus Methicillin Resistant, Streptococcus pyogenes, Yersinia enterocolitica, and a wide range of foodborne pathogens.

This product is toxic to fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or marine environments. Use of this product is limited to surfaces not in direct contact with Bacteroides fragilis, Campylobacter jejuni, Clostridium perfringens-vegetative, Corynebacterium amygosses, Escherichia coli, Escherichia coli O136:H12, Escherichia coli O137:H12, Escherichia coli O45K:H12, Escherichia coli O26:H11, Enterococcus faecalis Vancocin Resistant, Enterobacter sakazakii, Listeria monocytogenes, Klebsiella pneumoniae, Salmonella enterica, Salmonella enterica serovar Newport, Salmonella enterica serovar Typhimurium, Salmonella typhi, Shigella sonnei, Staphylococcus aureus, Staphylococcus aureus Methicillin Resistant, Streptococcus pyogenes, Yersinia enterocolitica, and a wide range of foodborne pathogens.

This product is toxic to fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or marine environments. Use of this product is limited to surfaces not in direct contact with Bacteroides fragilis, Campylobacter jejuni, Clostridium perfringens-vegetative, Corynebacterium amygosses, Escherichia coli, Escherichia coli O136:H12, Escherichia coli O137:H12, Escherichia coli O45K:H12, Escherichia coli O26:H11, Enterococcus faecalis Vancocin Resistant, Enterobacter sakazakii, Listeria monocytogenes, Klebsiella pneumoniae, Salmonella enterica, Salmonella enterica serovar Newport, Salmonella enterica serovar Typhimurium, Salmonella typhi, Shigella sonnei, Staphylococcus aureus, Staphylococcus aureus Methicillin Resistant, Streptococcus pyogenes, Yersinia enterocolitica, and a wide range of foodborne pathogens.

This product is toxic to fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or marine environments. Use of this product is limited to surfaces not in direct contact with Bacteroides fragilis, Campylobacter jejuni, Clostridium perfringens-vegetative, Corynebacterium amygosses, Escherichia coli, Escherichia coli O136:H12, Escherichia coli O137:H12, Escherichia coli O45K:H12, Escherichia coli O26:H11, Enterococcus faecalis Vancocin Resistant, Enterobacter sakazakii, Listeria monocytogenes, Klebsiella pneumoniae, Salmonella enterica, Salmonella enterica serovar Newport, Salmonella enterica serovar Typhimurium, Salmonella typhi, Shigella sonnei, Staphylococcus aureus, Staphylococcus aureus Methicillin Resistant, Streptococcus pyogenes, Yersinia enterocolitica, and a wide range of foodborne pathogens.
BEVERAGE DISPENSING AND SANITARY FILLING EQUIPMENT SANITIZER DIRECTIONS: For sanitizing hard, non-porous bottling and pre-mix dispensing equipment and bottles or cans in the final rinse application. This product is to be proportioned into the final rinse application equipment with a solution of 1:627 oz. of this product per 4 gal. of water (150-400 ppm active) of this product per gal. of water (or equivalent use dilution) (400-800 ppm active) of sanitizing solution. The spray/rinse must cover the entire path of the doorway. Set the system so that a continuous water flow is maintained. Wipe the entire surface until it is dry. The wall must be drained from the system. Allow sanitized surfaces to adequately drain and then air dry. Do not use on elevator doors with adhesive with the sanitizing solution.

STORAGE TANK SANITIZER DIRECTIONS: For sanitizing hard, non-porous beer fermentation and holding tanks, wine, citrus and food processing storage and fermenting tanks. This product is to be proportioned into the final rinse application equipment with a solution of 1:627 oz. of this product per 4 gal. of water (150-400 ppm active) of this product per gal. of water (or equivalent use dilution) (400-800 ppm active) of sanitizing solution. The spray/rinse must cover the entire path of the doorway. Set the system so that a continuous water flow is maintained. Wipe the entire surface until it is dry. The wall must be drained from the system. Allow sanitized surfaces to adequately drain and then air dry. Do not use on elevator doors with adhesive with the sanitizing solution.

ANIMAL PREMISES
Prior to the use of this product, remove all animals and feeds from areas to be treated, and return all animals to secondary enclosures. Remove all animal manure and other debris from targeted surfaces. Remove all manure and debris from the targeted areas, rinse with water, and this product. Use 3.5 oz. of this product per 4.5 gal. of water. Leave all treated surfaces wet for 10 minutes or longer. Allow to air dry.

PRF SPRAY SANITIZER DIRECTIONS: To prevent cross contamination from area to area in animal areas and the packaging and storage areas of food plants, spray pre-washed plastic, latex or other synthetic rubber gloves thoroughly to ensure sanitizing solution covers the exterior surfaces of the gloves prior to wearing, and to prevent puddles on top of belt. During interruptions in operation, apply solution using coarse spray equipment to pellers, collators, sizers and saws, or any other non-porous surfaces that extend above or below the surfaces, non-porous surfaces must remain wet for 10 minutes. Vehicle surfaces, including under the rim with a toilet brush/mop, cloth, or sponge. Allow treated surfaces to remain wet for 10 minutes. Prepare a fresh solution daily or when visibly dirty.

FOOD PRODUCING AREAS: ALL SURFACES MUST BE CLEANED AND SANITIZED IN ACCORDANCE WITH LABEL DIRECTIONS PRIOR TO FOGGING. FOR CONTROL OF DROSOPHILA SPP. AND PHORIDAE FAMILY OF FLIES ON NON-FOOD CONTACT SURFACES: To control flies on hard, non-porous non-food contact surfaces such as floors, walls, countertops, metal surfaces, painted surfaces, glazed porcelain, glazed tile, glass, chrome, rubber, and plastic in restaurants, bars, kitchens, dishwashing areas, and bar and wash stations areas and other food storage areas. After removing gross filth, apply a solution of 3.5 oz. of this product per 4.5 gal. of water to surfaces and locations where flies breed. Spray surfaces thoroughly or apply by pouring, mopping or spraying onto the floor to cover the entire floor surface. Allow treated surfaces to remain wet for 2 times per week or as needed. Do not contaminate food and food packaging.

PRECAUTIONS: Liquid Corrosive, NOS
Quaternary Ammonium Compound, 8, PG III.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage and disposal. PESTICIDE STORAGE: Keep this product under lock and key. When not in use, keep this product under lock and key. Store only in original container. Do not refill discarded container with this product. Keep this product away from food or food contact surfaces. Do not contaminate water. RINSE CONTAINER: Use a coarse spray device. Do not let sanitizing solution come in contact with food or crop must be rinsed with potable water before use. To prevent the spread of Gibus Carrier Disease by this means of transportation, treatments are made by trigger spraying, dipping or brushing. Cloth must be either thoroughly rinsed or laundered before reuse. Feeders must be rinsed before reuse. Prepare a fresh solution daily or when visibly dirty.

LAUNDRY SANITIZING DIRECTIONS FOR USE: This product is used in the final, warm rinse cycle at a water level below. Dilute at 1.33 oz. of this product per 378 ppm (active use equivalent) to the volume, then add to the final rinse, or disperse directly through automatic dispensing equipment. Run two rinse cycles. Rinse as necessary. This product will not harm fabrics. DO NOT USE IN THE PRESENCE OF, OR MIX WITH OTHER CHEMICALS.
