HARD HYBRID ABLATIVE ANTIFOULING PAINT

- Easy Cleanup with soap and water
- Reduces paint buildup through controlled erosion
- Economical Antifouling Protection
- Smooth, Hard, Durable Polishing Finish

1243 BLUE

KEEP OUT OF REACH OF CHILDREN.

CLOTHING:
• Take off contaminated clothing.

COPPER-BASED ABLATIVE COATINGS: This product may be applied over most hard antifouling coatings and over most copper-based ablative coatings. This product may also be applied over most commercial antifouling paints.

SANDING RESIDUE: Apply two coats of this product observing the proper dry times. If the previous coating is soft or in poor condition remove to the bare surface by sanding or using paint and sanding residue. Apply two coats of this product observing the proper dry times. If the previous coating is not metal, use Pettit Bio-Blue Hull Surface Prep 92 and clean abrasive scrubbing pads.

PETS AND VESSELS: Boats and vessels should not be scrubbed or cleaned for the first six months in the water and at the boat be checked regularly to make sure it is clean and that no growth is occurring. The self-cleaning nature of the coating is most effective when the boat is used periodically. Boats and vessels should be checked regularly to make sure it is clean and that no growth is occurring. The self-cleaning nature of the coating is most effective when the boat is used periodically. Please go to www.pettpaint.com for further guidance.

DIRECTIONS FOR USE
