PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: May be fatal if inhaled, swallowed, or absorbed through skin. Avoid contact with skin, eyes, and clothing. Wear protective clothing such as gloves, long-sleeved shirts, long pants and lightweight impervious clothing. Wash hands before eating, drinking, chewing gum, using tobacco or going to the toilet.

NOTE: When this product is used in confined areas or while spraying paint or sanding or sandblast- ing boat surfaces, wear a mask or a respirator jointly approved by the Mine Safety and Health Administration and the National Institute for Occupational Safety and Health.

FIRST AID

IF SWALLOWED:
- Call a poison control center or doctor immediately for treatment advice.
- Do not give any liquid to the person.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

IF IN EYES:
- Hold eye open and rinse slowly and gently with water for 15 – 20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15 – 20 minutes.
- Remove contaminated clothing, if possible.
- Call a poison control center or doctor for treatment advice.

IF INHALED:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

NOT HOT LINE NUMBER

Have your product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-548-0469 for emergency medical treatment information.

NOTE TO PHYSICIAN

Contains petroleum distillates - vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS

This material is toxic to fish. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust to contact ground, septic drain fields, or other water supplies. In the event of a violation, the material must be removed by mechanical means. If the material contaminates water, consult a State or local health or natural-resource agency for proper cleaning procedures.

PREPARATION OF PAINT:
This product is heavily loaded with kapok ground. As a result of this degree of loading there is a tendency for settling to occur in the can during storage. If the paint has been in a sealed can for a few months, it is necessary to thoroughly mix the paint before using. If possible, shake the can and paint brush vigorously for a few minutes before using. If this is not feasible, mix the paint thoroughly with a paint mixer. After using, clean the mixer thoroughly using a solution of water and an approved cleaning agent. Do not re-use the mixture. If paint is accidentally poured into the water system, consult local authorities immediately.

APPLICATION AND TEMPERATURE: This product may be applied by brush, roller or spray at any temperature between 40°F and 90°F. Do not apply this product in rain, or when exposure is expected before the surface has dried completely. Two applications should be applied for best results.

PREPARATION OF PAINT: This product is heavily loaded with kapok ground. As a result of this degree of loading there is a tendency for settling to occur in the can during storage. If the paint has been in a sealed can for a few months, it is necessary to thoroughly mix the paint before using. If this is not feasible, mix the paint thoroughly with a paint mixer. After using, clean the mixer thoroughly using a solution of water and an approved cleaning agent. Do not re-use the mixture. If paint is accidentally poured into the water system, consult local authorities immediately.

THINNER: Thinner this product is not normally required. If necessary use Pett 120-10 Brushing Thinner for a smoother finish on especially warm/humid days. Use Pett 121-10 and Pett 134-10 Spattering Thinner for spray application. Use either thinner for clean-up.

Drying Times:
- To recoat 2 hours
- To spatter 2 hours
- To full dry 4 hours
- To fully spatter 8 hours
- To sandpaper 6 hours
- To full dry 6 hours
- To fully spatter 12 hours

The above drying times are minimum. This product may be recoated after minimum times shown and brought up to 60 days after painting.

CONVERGE: This product will cover approximately 400 square feet per gallon when applied at 2 dry mils film thickness.

VOC: Less than 400 g/L Carbohydrate.

Maintenance of Anti-caking: No anti-caking paint can be effective under all conditions of exposure. Man-made pollution and natural occurrences can adversely affect anti-caking paint performance. Extreme heat and cold temperatures, oil, dirt, oil, brake fluid and engine oil can ruin an anti-caking paint. Therefore, we strongly suggest that the bottom of the boat be checked regularly. To make sure it is clean and that no growth is occurring. Lightly scratch the bottom with a soft brush to remove anything from the anti-caking paint surface. The anti-caking additive of the coating is most effective when the boat is used periodically.

SYSTEMS: Mix paint thoroughly in the paint mixer. A weekly inspection of the anti-caking paint is recommended. All surface must be clean, dry and properly prepared prior to painting.

Compatibility: This product may be applied over most aged alkyd anti-caking coatings. Old anti-caking paint must be completely removed before applying this product. Old acrylate products may be applied to all Pett products. Primers, sealers, and other Pett products are recommended to the Pett products. Pet products are intended to be applied to all Pett products.

PREVIOUSLY PAINTED SURFACES: If the previous coating is in good condition, thoroughly sand with 80-grit paper and seal with Pett 120-10 Brushing Thinner for the proper adhesion. Apply two coats of this product. If the previous coating is in poor condition sand with 120-grit paper. Apply two coats of Pett 130-10 Brushing Thinner followed by Pett 120-10 Brushing Thinner to remove sanding residue. Apply two coats of this product. If the previous coating is in poor condition sand with 120-grit paper. Apply two coats of Pett 130-10 Brushing Thinner followed by Pett 120-10 Brushing Thinner to remove sanding residue. Apply two coats of this product. If the previous coating is in poor condition sand with 120-grit paper. Apply two coats of Pett 120-10 Brushing Thinner followed by Pett 120-10 Brushing Thinner to remove sanding residue. Apply two coats of this product. If the previous coating is in poor condition sand with 120-grit paper. Apply two coats of Pett 120-10 Brushing Thinner followed by Pett 120-10 Brushing Thinner to remove sanding residue. Apply two coats of this product. If the previous coating is in poor condition sand with 120-grit paper. Apply two coats of Pett 120-10 Brushing Thinner followed by Pett 120-10 Brushing Thinner to remove sanding residue. Apply two coats of this product. If the previous coating is in poor condition sand with 120-grit paper. Apply two coats of Pett 120-10 Brushing Thinner followed by Pett 120-10 Brushing Thinner to remove sanding residue. Apply two coats of this product. If the previous coating is in poor condition sand with 120-grit paper. Apply two coats of Pett 120-10 Brushing Thinner followed by Pett 120-10 Brushing Thinner to remove sanding residue. Apply two coats of this product.
