Rockaway, NJ 07866
General Description: This product is the top-of-the-line in conventional anti-fouling paints effective against algae, barnacles, and other marine and freshwater fouling organisms. It has earned its reputation as one of the most respected names in the industry. This product delivers an extremely high load of curous oxide to combat even the most extreme fouling conditions. Its durable, hard modified epoxy finish has excellent adhesion, and is highly abrasion resistant. When sold in water, this product will provide years of dependable service. The perfect choice for competitive racing, sedan, long-paned and sailboats. May be tted if swallowed or inhaled. Do not breathi vapor, spray mist or sanding dust. Remove contaminated clothing and wash clothing before reuse. Wash thor-oughly with soap and water after handling. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

Noteworthy: This product is not normally required. Use Pettit 120 Brush Thinner for tining this product if needed, particularly on warm or bready days. Do not thin more than 15% (12 ounces per gallon) or inadequate paint film thickness will occur and premature erosion of the finish will be likely.

Note: Do not thin beyond your state's limit.

Dry Times: The minimum recoat time is 2 hours. The drying time between the form coating is 24 hours. Under adverse drying conditions such as those encountered on cool or damp days extend the dry times by 50% in order to ensure that all the solvent is out of the paint film.

Physical or Chemical Hazards: Combustible. Do not store near heat or open flame.

Storage and Disposal: Non-inventory container. Do not reuse or rell this container. Offer for recycling, if available. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with Pettit 120 Brush Thinner or xylene and recap. Shake for 10 seconds. Pour rinse into application equipment or a mix tank and store in a safe place. Do not return tank. There is no maximum drying time before launching.

Systems
Previously Painted Surfaces: Do not apply this product over ablative bottom paints. If the previous coating is in good condition, thoroughly sand with 80-grit sandpaper, then solvent clean with Pettit 120 Brush Thinner to remove residue. Apply two thin coats of this product. If the previous coating is soft or in poor condition, remove to the bare surface by sanding or using a paint and varnish remover. Proceed with appropriate base sand as described below.

Bare Fiberglass: All bare fiberglass, regardless of age, should be thoroughly cleaned and de-waxed with 92-Blue Hull Surface Prep or de-waxed several times with Pettit 95 De- Waxer. Sand thoroughly with 60-grit sandpaper to a dull, frosty finish and seal the sand ed surface with 120 Brush Thinner to remove sanding residue. Then apply two or three coats of this product, following application instructions.

To eliminate the sanding operation, two methods are available:

1. Clean and de-wax the surface as described above, apply one very thin coat of 9988 Skip-Sand Primer using a 3” roller or brush, apply. Consult the primer label for complete application and antifouling top coating instructions. Then 2 to 3 coats of this product.

2. Clean, de-wax and etch the surface with 92-Blue Hull Surface Prep using a Scotch-Brite pad in a swishing motion. Apply one coat of Pettit Protect Epoxy Primer. Consult the primer label for complete application and antifouling top coating instructions. Then apply 2 to 3 coats of this product.

Underwater Running Gear: Use Pettit 645 Underwater Metal Kit following all instructions before applying this product.

All Other Substrates: Please go to www.pettitpaint.com and consult the product data sheet maintenance of Antifouling Paint: No antifouling paint can be effective under all conditions of exposure. Man-made pollution and natural occurrences can adversely affect antifouling performance. Extreme hot and cold water temperatures, still, dirt, oil, brackish water and even electrolysis can ruin an antifouling paint. Therefore, we strongly suggest that the bottom of the boat be checked regularly to make sure it is clean and that no growth is occurring. Lightly scrub the bottom with a soft brush to remove anything from the antifouling paint surface. Scrubbing is particularly important with boats that are idle for extended periods of time. This product is most effective when the boat is used periodically.

VOC: Less than 450 g/l unthinned

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Warming: Causes eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes, or clothing. Wear protective clothing such as short pants and hat. May be fatal if swallowed or inhaled. Do not breathe vapors, spray mist or sanding dust. Remove contaminated clothing and wash clothing before reuse. Wash thor-oughly with soap and water after handling. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

Note: When this product is used in confined areas or while spraying paint or sanding or sand blasting boat surfaces, wear a mask or a respirator jointly approved by the Mining Safety Health Administration and the National Institute for Occupational Safety and Health.

Environmental Hazards: This material is toxic to fish. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint and paint dens in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharging. Do not discharge effluent into sewers without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

FIRST AID

IF SWALLOWED: Get a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INGESTED: Remove person from exposure. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Wash skin immediately with plenty of water for 15 minutes. Remove contaminated clothing and launder. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respira-
tion, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

NOTICE: THIS PRODUCT CONTAINS A CHEMICAL KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER, BIRTH DEFECTS, OR OTHER REPRODUCTIVE HARM.
