TRINIDAD 75
ANTIFOULING

1076 RED

NET CONTENTS
1 GALLON (128 FL. OZ.)
3.785 LITERS

FOR PROFESSIONAL USE ONLY
KEEP OUT OF REACH OF CHILDREN.

WARNING SEE BACK PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS.
General Description: This product is the top-of-the-line in conventional anti-fouling paints effective against algae, barnacles, and other marine and freshwater fouling organisms. It has earned its reputation as one of the most respected names in the industry. This product delivers an extremely high load of copper oxide to combat even the most extreme fouling conditions. Its durable, hard-modified epoxy finish has excellent adhesion, and is highly abrasion resistant. When left in the water, this product will provide years of dependable service. The perfect choice for competitive racing or blue water cruising.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Coverage, Application and Temperature: This product can be applied by brush, roller or spray. All painting should be done between 8:00 a.m. and 4:00 p.m. in order to avoid the possibility of dew or condensation spoiling the application. The temperature range of application should be between 50° and 90°F. At least two, and preferably three coats, should be applied for best performance, particularly in high water areas such as the waterline. This product will cover approximately 400 square feet per gallon when applied at 2 dry mill film thickness.

Preparation of Paint: It is necessary to thoroughly mix the paint before using. If possible, shake the can of paint on a mechanical paint shaker. Before using check the sides and bottom of the can to make sure all the pigment has been mixed in. If mixing is going to be done with a wooden paddle or an electric drill mixer, pour off half of the liquid from the top of the can into another can and then remix properly in any settled pigment, then remix the two parts together thoroughly.

Thinning: Thinning of this product is not normally required. Use Pettit 120 Brushing Thinner for thinning this product if needed, particularly on warm or breezy days. Do not thin more than 10% (12 ounces per gallon) or maleate paint film thickness will occur and premature erosion of the finish will be likely.

Note: Do not thin beyond the state’s compliant limit.

Dry Times: The minimum recoat time is 2 hours. The minimum dry time between the final coat and launching is 24 hours. Under adverse drying conditions such as those encountered on cool or damp days extend the dry times by 50% in order to ensure that all the solvents is out of the paint film. No minimum dry time before launching.

Previously Painted Surfaces: Do not apply this product over ablatice bottom paints. If the previous coating is in good condition, thoroughly sand with 80 grit sandpaper, then soave clean with Pettit 120 Brushing Thinner to remove resin. Apply any two coats of this product. If the previous coating is soft or in poor condition, remove to the bare surface by sanding or using a paint and varnish remover. Proceed with appropriate bare system as described below.

Bare Fiberglass: All bare fiberglass, regardless of age, should be thoroughly cleaned and de-waxed with 82 Bio-Hull Surface Prep or de-waxed several times with Pettit 3-4-5 Bio-Hull Surface Prep. Sand thoroughly with 80 grit sandpaper to a dull, frosty finish and rewash the sanded surface with 120 Brushing Thinner to remove sanding residue. Then apply two or three coats of this product, following application instructions.

To eliminate the sanding operation, two methods are available:

1. Clean and de-wax the surface as described above, apply one very thin coat of 6098 Sip-Sand Primer using a 316" or less nap roller or brush, apply, Consult the primer label for complete application and antifouling top coating instructions. Then apply 2 to 3 coats of this product.

2. Clean, de-wax and etch the surface with 82 Bio-Hull Surface Prep using a course Scotch-Brite pad in a swirling motion. Apply one coat of Pettit Protec Epoxy Primer. Consult the primer labels for complete application and antifouling top coating instructions. Then apply 2 to 3 coats of this product.

Underwater Running Gear: Use Pettit 9466 Underwater Metal Kit following all instructions included with this product.

All Other Substrates: Please go to www.pettipaint.com and consult the product data sheet.

Maintenance of Anti-fouling Paint: No antifouling paint can be effective under all conditions of exposure. Man-made pollution and natural occurrences can adversely affect antifouling paint performance. Extreme hot and cold water temperatures, silt, dirt, oil, brackish water and even electrolysis can ruin an antifouling paint. Therefore, we strongly suggest that the bottom of the boat be checked regularly to make sure it is clean and that no growth is occurring. Lightly scrub the bottom with a soft brush to remove anything from the antifouling paint surface. Scrubbing is particularly important with boats that are idle for extended periods of time. This product is most effective when the boat is used periodically.

VOC: Less than 450 g/L unlimited.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Warning: Causes eye irritation. Harmful if inhaled, get medical advice if you feel unwell. Keep out of reach of children. Do not breathe vapors, mist or sanding dust. Remove contaminated clothing and wash clothes before reuse. Wash thoroughly with soap and water after handling. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

Note: When this product is used in confined areas or while spraying paint or sanding or sandblasting boat surfaces, wear a mask or a respirator jointly approved by the Mining Safety Health Administration and the National Institute for Occupational Safety and Health.

Environmental Hazards: This material is toxic to fish. Do not apply directly to water by cleaning or treatment or disposal of wastes. Do not emit into or runoff during paint removal to enter water. Dispose of paint/drums in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans and other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent into sewer system without previously notifying the local sewage plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

Physical or Chemical Hazards: Combustible. Do not use or store near heat or open flame.

Storage and Disposal: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with Pettit 120 Brushing Thinner or xylene and recap. Shake for 10 seconds. Pour into application equipment or a mix tank or store in airtight container for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

NOTICE: THIS PRODUCT CONTAINS A CHEMICAL KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER, BIRTH DEFECTS OR OTHER REPRODUCTIVE HARM.

FIRST AID

IF SWALLOWED:

• Call a poison control center or doctor immediately for treatment advice.

• Have person sip a glass of water. Do not give water to an unconscious person.

• Do not induce vomiting unless told to do so by a poison control center or doctor.

• Do not give anything by mouth to an unconscious person.

IF IN EYES:

• Hold eye open and rinse slowly and gently with water for 15 – 20 minutes.

• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

• Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING:

• Wash off contaminated clothing.

• Rinse skin immediately with plenty of water for 15 – 20 minutes.

• Call a poison control center or doctor for treatment advice.

IF INHALED:

• Move person to fresh air.

• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.

• Call a poison control center or doctor for further treatment advice.

INJURY NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-548-0489 for emergency medical treatment information.

NOTICE TO PHYSICIAN

Probable mucosal damage may contaminate the use of gastric lavage. This product contains petroleum distillates, vomiting may cause aspiration pneumonia.
