PETITTE ULTIMA SSA ANTIFOULING PAINT

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Causes eye irritation. Harmful if inhaled or absorbed through skin. Avoid contact with skin, eyes, or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants and hat. May be fatal if swallowed or inhaled. Do not breathe sanding dust or vapor. Wear a mask and respirator approved by the Mine Safety and Health Administration and the National Institute for Occupational Safety and Health. Remove contaminated clothing and wash clothing before reuse. Wash thoroughly with soap and water after handling.

First Aid

If swallowed:
- Call a poison control center or doctor immediately for treatment advice.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give any liquid to the person.
- Do not give anything by mouth to an unconscious person.

If in eyes:
- Hold eye open and rinse slowly and gently with water for 15 - 20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for further treatment advice.

If on skin or clothing:
- Take off all clothing immediately and wash all clothing with soap and water for 15 - 20 minutes.
- Call a poison control center or doctor for further treatment advice.

If inhaled:
- More person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
- If person is breathing, call 911 or an ambulance.

If skin soiled:
- Call a poison control center or doctor for further treatment advice.

Storage and Disposal

STORAGE: Keep closures tight and upright to prevent leakage. Keep container closed when not in use.

CAUTION: In case of leakage, avoid disposal in accordance with local applicable regulations.

PHYSICAL OR CHEMICAL HAZARDS: COMBUSTIBLE! Do not use or store near heat or open flame. Use only with adequate ventilation during application, not drying. Use appropriate exhaust equipment if applicable. Splashed or burned flames with foam, CO₂ or dry chemical. Wear MASH/RHYOSH certified breathing equipment.

PESTICIDE DISPOSAL: Do not contain pesticide, food or feed by storage or disposal. Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture or residue is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, or by procedures approved by State and local authorities.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in manner inconsistent with its labeling. NOTE: When product is used in confined areas or applied by spray, use a respirator, powered by approved by the Mine Safety and Health Administration (formerly the U.S. Bureau of Mines) and by the National Institute for Occupational Safety and Health under the provisions of 30 CFR Part 17.

NOTICE! This product contains a chemical known to the State of California to cause cancer, birth defects or other reproductive harm. Product Description: This product provides maximum protection from fouling in all kinds. Concentrated copper guards against attachment of barnacles, anemones, sponges, herbivorous fish and other fouling organisms. This product is particularly effective and dries to a transparent finish in good conditions. This product is ideal for wood, fiberglass and properly primed steel boats. Compatibility: This product may be applied over most aged hard and soft anti-fouling coatings. Old to copolymer and toner finishes must be completely removed before applying this product. Mixing: It is necessary to thoroughly mix the paint before using. If possible shake the can of paint on a mechanical paint shaker. Before use check the sides and bottom of the can to make sure all the pigment has been mixed in. If mixing is going to be done with a wooden paddle or an electric drill mixer, pour off half of the liquid from the top of the can into another can and then properly mix in any settled pigment, then remix the two parts together thoroughly.

Application Temperatures: 40°F and above.

Application Method: Brush, roller or airbrush or conventional spray.

Thinner: For the first coat on new or bare wood, thin 10% with Pettit 1070-10 Brushing Thinner. For other uses thinning is not normally required. Do not this beyond your state VOC limit.

Coverage: 500 sq. ft. per gallon

Number of Coats: On new or bare wood use 3 coats. Allow at least 1 hour between applications. On old painted hulls in good condition and on primed and/or primed fiberglass, apply one full coat of this paint followed with a second coat where severe binding exists as in tropical waters.

Dry Times:

- To recoat: 2 hours
- To launch: 24 hours

The above dry times are minimum. This product may be recoated and launched after minimum times shown. Maximum dry time before launch is 30 days @ 70°F.

System Compatibility:

The paint systems outlined below contain references to other Pettit products. Please read and understand the label and/or Technical Bulletin for these products as well as ensure that they are used properly. For further guidance, please contact your local Pettit representative at Pettit Customer Service Department at (800) 211-4466 between the hours of 8:30 a.m. and 4:30 p.m. EST.

Previously Painted Surfaces: If the previous coating is in good condition, thoroughly sand with 80-grit paper. Wipe dry with a rag dampened with Pettit 1027-10 Brushing Thinner to remove coating residue. Apply two coats of this paint to the original paint (recoating). The final coat shall be applied within 24 hours of recoating the original coating. If the previous coating is in poor condition, remove it and the bare surface by sanding or painting and wash and remove binder. Proceed with the appropriate base system as described below. Old tin copolymer paint and toner finishes must be removed before applying this product.

Bare Fiberglass: All bare fiberglass, regardless of age, must be thoroughly cleaned using Pettit 95 Fiberglass Debracer and clean lint-free rags. Several cleanings may be necessary to ensure complete removal of contaminants. Change rags frequently during the debruing/cleaning process to ensure complete removal of contaminants rather than merely smearing them on the surface. New rags must be scrubbed with a detergent and water solution and rinsed with fresh water prior to debruing. After the surface has been debronized, sand it thoroughly with 40-grit production paper and wash the sanded surfaces with Pettit 95 Debronizer or 1027-10 Brushing Thinner to remove sanding residue. Apply two coats of this product observing the proper dry times. If sanding is prolonged, as with certain vinyl ester-glycidic oils, or it is otherwise impractical, make sure the surface has been completely and thoroughly degreased and cleaned with Pettit 95 Fiberglass Debracer. Then apply one thin continuous coat of Pettit 9599 Sandless Primer. Topcoat with two coats of this product carefully following the topicalizing instructions on the Sandless Primer label.

Bare Wood: Sand the entire surface with 80-grit production paper and wipe clean with a rag dampened with Pettit 1027-10 Brushing Thinner. Apply a coat of this product thinned 10% with the Pettit 1027-10 Brushing Thinner to penetrate and seal the wood. Fill any open seams with Pettit Seam Compound and allow to dry overnight. Apply two full coats of this product observing the proper dry times.

Steel Hulls, Underwater Metal Parts and Keels: For steel hulls and metal keels, consult Pettit Technical Bulletin T9431 High Build Epoxy Primer for complete priming instructions or consult the Pettit Technical Department at your local Pettit representative. For underwater metal parts, consult Technical Bulletin T9112 Underwater Running Gear Paint Specification for complete painting and application details.
