This product is not to be used as a terminal sterilant or high-level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes, but which does not ordinarily as usual.

For surface disinfection:

- Launder spent materials before reuse.
- Apply this product to pre-cleaned surfaces by sponge, cloth, mop, spray or immersion to wet all surfaces thoroughly. Allow to remain wet at least 3 minutes. Be certain to flush lumens of hollow devices with this product. Remove items and rinse. For critical or visibly soiled.

INSTRUMENTS / DEVICES:

- Place items into solution and allow to soak for 2 minutes. Be certain to flush lumens of hollow devices with this product. Remove items and rinse. For critical or visibly soiled.

CRITICAL SURFACES:

- Fill appropriately-sized container with a sufficient amount of this product to allow for complete submersion of items. Place items into solution and allow to soak for 2 minutes. Be certain to flush lumens of hollow devices with this product. Remove items and rinse. For critical or visibly soiled.

For surface disinfection:

- Apply this product to pre-cleaned surfaces by sponge, cloth, mop, spray or immersion to wet all surfaces thoroughly. Allow to remain wet for at least 3 minutes. Be certain to flush lumens of hollow devices with this product. Remove items and rinse. For critical or visibly soiled.

HBV, HCV and HIV-1 Precautions:

- Place item(s) into a suitable container. Thoroughly spray item with this product until drenched, thoroughly rinse. Follow with an appropriate terminal cleaning and sterilization/disinfection process.

STORAGE AND DISPOSAL

- Store original container in a cool, well-ventilated area inaccessible to children and pets.
- Pesticide Disposal: When used as directed this product effectively kills the following microorganisms at room temperature with a:
- Swine Influenza A Virus* (H1N1) (formerly known as ‘swine flu’), Bordetella bronchiseptica, Mycobacterium bovis, Salmonella enterica, Serratia marcescens, Chlamydia psittaci, Chlamydia trachomatis, Mycoplasma pneumoniae, Clostridium perfringens, Escherichia coli, Staphylococcus aureus, Staphylococcus epidermidis, Streptococcus pyogenes, Mycobacterium tuberculosis, Pseudomonas aeruginosa, Candida albicans, Cryptococcus neoformans, Trichophyton mentagrophytes, Aspergillus fumigatus, and other fungi.
- For a non-patient contact transmission control 

- For a non-patient contact transmission control, the following microorganisms at room temperature with a:

- Swine Influenza A Virus* (H1N1) (formerly known as ‘swine flu’), Bordetella bronchiseptica, Mycobacterium bovis, Salmonella enterica, Serratia marcescens, Chlamydia psittaci, Chlamydia trachomatis, Mycoplasma pneumoniae, Clostridium perfringens, Escherichia coli, Staphylococcus aureus, Staphylococcus epidermidis, Streptococcus pyogenes, Mycobacterium tuberculosis, Pseudomonas aeruginosa, Candida albicans, Cryptococcus neoformans, Trichophyton mentagrophytes, Aspergillus fumigatus, and other fungi.

- For a non-patient contact transmission control, the following microorganisms at room temperature with a:
