WINTER SWIMMING POOL TREATMENT
This product, containing SilkGuard®, provides a source of effective sanitizing agent for winterized pools. The multifunctional sanitizer with SilkGuard when used as directed kills bacteria and controls algae, prevents metal staining and corrosion, reduces scale formation and lowers water's unique addicts. SilkGuard actually coats metal surfaces, protecting them against rust. Additionally, this additive protects pool surfaces from metal stains and acts like a magnet to bind hard water minerals, leaving your pool water silky and smooth.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in any manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Before using this product the pool water should be properly balanced and appropriately treated with winterizing products appropriate for your geographic area. Consult with your BioGuard Dealer for proper winterization procedures.

After winterization procedures are complete, place this product into the center of the pool in the deep end. If the tablets in the floaters dissolve completely and the pool water temperature is above 80°F for 30 to 45 days, an additional application is recommended. For covered pools, pull the cover back from the deep end of the pool an adequate distance to allow this product to be placed away from the sides of the pool. Monitor pool water temperature and reapply every 30 to 45 days when water temperature is above 60°F.

1. Test and balance water before using this product. Adjust pH to 7.4-7.6, Total Alkalinity to 125-150 ppm, and make sure the pool has a chlorine residual between 1-4 ppm.
2. Adjust the flow-control ring to the three-hole setting.
3. Place floaters in the center of the deep end of the pool and hold upright until it fills with water. Then leave to float.
4. Dispose when the floater has decomposed.

Note: Do not completely submerge floaters or allow holes to become clogged. This could trap an excessive amount of chlorine gas possibly resulting in a violent explosion.
Do not attempt to open or refill this product.

STORAGE AND DISPOSAL:
Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Moisture may decompose this product and cause a violent reaction leading to fire or explosion. In case of decomposition, isolate container if possible and flood area with large amounts of water to dissolve all material before discarding this container. Do not contaminate food or feed by storage or disposal. CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Offer for recycling if available. Triple rinse container (or equivalent) promptly after emptying.

PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: Contact: Causes immediate eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or fumes. Inhaling to nose and throat. Hemorrhage if swallowed. Do not get in eyes or on clothing.

Wear goggles or safety glasses, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse.

FIRST AID: IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice. IF SWALLOWED: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. IN CASE OF MEDICAL EMERGENCY, CALL 1-877-400-5553.

Note to Physician: Prismatic microlight damage may communicate the use of gastric lavage.

PHYSICAL OR CHEMICAL HAZARDS: CONTAINS A STRONG OXIDIZING AGENT. Do not mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. When using automatic feeding devices, always follow manufacturer’s directions as to the proper addition of sanitizer product to chlorinators. Use clean dry vials. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, dispose container in open air or well-ventilated area. Hood area with large volumes of water.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms.

NOTE: User assumes all responsibility for use not in accordance with directions.
