Defender

Disinfectant and Cleaner
Surface Friendly
Kills Clostridium difficile spores in 4 minutes
Effective against a broad range of microorganisms

KEEP OUT OF REACH OF CHILDREN

DANGER

ACTIVE INGREDIENT:
Sodium Dichloro-s-triazinetrione.......................... 48.21%
OTHER INGREDIENTS .......................................................................... 51.79%
TOTAL ................................................................................................ 100.00%
*Equivalent to 31.10% active chlorine by tablet weight. Refer to dilution chart for Available Chlorine concentrations.

Defender is for use in:
- Hospitals, nursing homes, medical and dental offices and clinics, operating rooms, isolation wards, and medical research facilities.
- Veterinary clinics, animal life science laboratories, kennels, breeding and grooming establishments, pet animal quarters, zoos, pet shops, and other animal care facilities.
- Cosmetic, pharmaceutical, and medical device manufacturing facilities, biotechnology firms, pharmacies, and compounding pharmacies.

Defender provides effective cleaning strength that will not dull high gloss floor finishes with repeated use.

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have the person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IN THE EVENT OF A MEDICAL EMERGENCY CALL YOUR POISON CONTROL CENTER AT 1-800-222-1222. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. See side panel for additional precautionary statements.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage. Harmful if swallowed, inhaled, or absorbed through skin. Do not get in eyes, on skin, or clothing. Avoid breathing dust. Wear chemical-resistant gloves and safety glasses or face shield when making up solution. Wash thoroughly with soap and water after handling, and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

PHYSICAL OR CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Use only clean dry utensils. Mix only into water. Contamination with moisture, dirt, organic matter or other chemicals or any other foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. Avoid any contact with flaming or burning material such as a lighted cigarette. Do not use this product in any chlorinating device which has been used with any inorganic or unstabilized chlorinating compounds (e.g., calcium hypochlorite). Such use may cause fire or explosion.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read the entire label and use strictly in accordance with precautionary statements and directions.

HEALTHCARE DISINFECTION

This product, DEFENDER, is a Healthcare Disinfectant against Clostridium difficile. It is effective in killing C. difficile spores when used in accordance with the label instructions. DEFENDER is effective against a variety of other pathogens, including bacteria, viruses, and fungi.

Pre-Clean Procedure:

1. Remove gross filth, such as food waste, vomit, or blood, from the surface.
2. Use a detergent to clean the surface.
3. Rinse the surface with water.
4. Allow the surface to air dry.

Disinfection Procedure:

1. Apply DEFENDER according to the label instructions.
2. Allow the surface to remain wet for the specified contact time.
3. Allow the surface to air dry.
4. Discard all treated equipment that will contact food, feed, or drinking water.

Personal Protection:

When using DEFENDER, wear appropriate personal protective equipment, including gloves, masks, and eyewear. Avoid inhalation of spray mist.

Special Instructions for Cleaning and Decontamination Against HIV-1 of Surfaces Soiled with Blood/Body Fluids:

1. Use DEFENDER at the recommended concentration of 4,306 ppm available chlorine.
2. Apply DEFENDER to surface with a cloth, sponge, or mop.
3. Allow the surface to remain wet for 10 minutes.
4. Allow the surface to air dry.

Storage and Disposal:

Do not store water, food, or feed in contact with the surface. Do not reuse or refill this container. Offer for recycling if available or puncture and dispose of in a sanitary landfill.

Pesticide Disposal

Pesticide may be acutely hazardous. Wastes resulting from the use of this product must be disposed of on-site, or at an approved waste disposal facility.

Container Handling

Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available or puncture and dispose of in a sanitary landfill.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth to mouth, if possible. Call a poison control center or doctor for further treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IN THE EVENT OF A MEDICAL EMERGENCY CALL YOUR POISON CONTROL CENTER AT 1-800-222-1222. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. See side panel for additional precautionary statements.
DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read the entire label and use strictly in accordance with precautionary statements and directions.

HEALTHCARE DISINFECTION This product, DEFENDER, is a Hospital Use Disinfectant. General Healthcare disinfectant (538 ppm available chlorine disinfectant solution) is effective against standard gram positive and gram negative bacteria (Staphylococcus aureus, pseudomonas aeruginosa and salmonella enterica) and cold and flu viruses (respiratory syncytial virus, influenza H1N1). This product is effective as a Healthcare disinfectant for blood borne viruses and animal care facilities when used at level of 1076 ppm available chlorine disinfectant solution. It is effective against HIV, Hepatitis B, Feline Calicivirus, Norovirus, Canine Distemper virus, Infectious Canine hepatitis, T & C, Pseudorabies, Actinobacillus pleuropneumoniae, Bordetella bronchiseptica (rhinitis), Brachyspira (Treponema/Serpulina) hyodysenteriae (twine dysentery), Gumboro disease, Streptococcus uberis, Streptococcus dysgalactiae, and Clostridium perfringes USDA with a 10 minute contact time. For Transmissible gastroenteritis (TGE), Swine Vesicular disease, African swine fever, Hog cholera/Classical swine fever, and Avipox (fowl pox), A 30 minutes contact time is required.

Note: The California DPR has not approved yet the use of this product Defender against these animal pathogens. Only approved for use against Canine parvovirus, Newcastle Disease Virus, Pseudorabies, Canine Distemper Virus, & Feline Calicivirus in the state of California.

This product is also effective as a Healthcare disinfectant for critical areas potentially contaminated with C. Diff spores when used at a level of 2153 ppm available chlorine disinfectant solution.

Notice to User: This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the blood stream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

GENERAL DISINFECTION This product, DEFENDER, is a general disinfectant at 538 ppm available chlorine disinfectant solution effective against Staphylococcus aureus, Salmonella enterica, Pseudomonas aeruginosa and cold and flu (respiratory syncytial virus, influenza H1N1). Prepare a 538 ppm solution; refer to Dilution Chart. Apply to pre-cleaned surface with mop, cloth, sponge, brush, wipe, foaming equipment, or coarse trigger sprayer. Allow surface to remain wet for 10 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

DISINFECTION FOR SURFACES CONTAMINATED WITH HIV AND OTHER VIRUSES AND ANIMAL HOUSING FACILITIES PREPARATION OF USE SOLUTION: Prepare a 1076 ppm solution; refer to Dilution Chart. Keep in a properly labeled container to protect against contamination. Unused solution must be discarded.

DISINFECTION/VIRUCIDAL DIRECTIONS: Prepare a 1076 ppm solution; refer to dilution chart. Apply use solution to pre-cleaned, hard, non-porous, inanimate surfaces with brush, spray device, sponge, cloth, or mop to wet all surfaces thoroughly. Allow to remain wet for 10 minutes, then remove product by wiping with brush, sponge, or cloth. For sprayer applications use a coarse sprayer device. Spray 8-9 inches from surface, and rub with brush, sponge, wipe or cloth. Do not breathe spray mist. Before using this product, food products and packaging materials must be removed from the room or carefully protected. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

Kills HIV-1, Hepatitis A, and Hepatitis B viruses on VISIBLY CLEAN ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/object with blood or body fluids, and in which the surfaces/object likely to be soiled with blood or body fluids can be associated with the potential for transmission of human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS), Hepatitis A virus, and Hepatitis B virus.

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 OF SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS:

PERSONAL PROTECTION: Specific barrier protection items to be used when handling items soiled with blood or body fluids are disposable latex gloves, gowns, masks, and eye coverings. CLEANING PROCEDURE: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of DEFENDER. This cleaning process may be accomplished with any cleaning solution including DEFENDER. DISPOSAL OF INFECTIOUS MATERIALS: Blood and other body fluids should be autoclaved and disposed of according to federal, state and local regulations for infectious waste disposal. CONTACT TIME: Leave surfaces wet for 10 minutes.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

PESTICIDE STORAGE

Store in a cool, dry, well-ventilated area at temperatures below 40°C/104°F. Avoid moisture getting into container.

PESTICIDE DISPOSAL

Pesticide may be acutely hazardous. Wastes resulting from the use of this product must be disposed of on-site, or at an approved waste disposal facility.

CONTAINER HANDLING

Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available or puncture and dispose of in a sanitary landfill.
PERSONAL PROTECTION: Specific barrier protection items to be used when handling items soiled with blood or body fluids are disposable latex gloves, gowns, masks, and eye coverings. CLEANSING PROCEDURE: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of DEFENDER. This cleaning process may be accomplished with any cleansing solution including DEFENDER. DISPOSAL OF INFECTIOUS MATERIALS: Blood and other body fluids should be autoclaved and disposed of according to federal, state and local regulations for infectious waste disposal. CONTACT TIME: Leave surfaces wet for 10 minutes.

DISINFECTING FOR SURFACES CONTAMINATED WITH CLOSTRIDIUM DIFFICILE IN 4 MINUTES
Special Label Instructions for Cleaning Prior to Disinfection against Clostridium difficile spores: Personal Protection: Wear appropriate barrier protection such as gloves, gowns, masks or eye covering. Cleaning Procedure: Fecal matter/waste must be thoroughly cleaned from surfaces/objects before disinfection by application with a clean cloth, mop, and/or sponge saturated with the disinfectant product. Cleaning is to include vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces in patient rooms are to be cleaned in an appropriate manner, such as from right to left or left to right, on horizontal surfaces, and top to bottom, on vertical surfaces, to minimize spreading of the spores. Restrooms are to be cleaned last. Do not use soiled cloths. Infectious Materials Disposal: Materials used in the cleaning process that may contain feces/wastes are to be disposed of immediately in accordance with local regulations for infectious materials disposal.

Prepare a 4,306 ppm solution; refer to Dilution Chart. Apply to pre-cleaned surface with mop, cloth, sponge, brush, wipe, foaming equipment, or coarse trigger sprayer. Allow surface to remain wet for 4 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

GENERAL DISINFECTION WITHOUT PRECLEAN: This product DEFENDER is a Healthcare disinfectant when used at level of 4,306 ppm available chlorine disinfectant solution. It is effective for Norovirus (1 minute contact time) for Salmonella enterica, Staphylococcus aureus, Pseudomonas aeruginosa, carbapenem resistant Klebsiella pneumoniae, Acinetobacter baumannii (4 minute contact time is required). Prepare a 4,306 ppm solution; refer to Dilution Chart. Apply to surface with mop, cloth, sponge, brush, wipe, foaming equipment, or coarse trigger sprayer. Allow surface to remain wet for 4 minutes. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

DISINFECTING FOR SURFACES CONTAMINATED WITH TUBERCULOSIS IN 4 MINUTES
Special Label Instructions for Cleaning Prior to Disinfection against Tuberculosis: This product when used as directed below is effective against Mycobacterium bovis. This product can be used on hard nonporous surfaces in commercial institutional hospital and premises (including kitchens, bathrooms, nurseries, sick rooms, laundry rooms, eating establishments, pet kennels and veterinary premises). To disinfect hard nonporous surfaces first clean surface by removing gross filth (loose dirt debris, food materials etc). Prepare a 5,382 ppm available chlorine solution. Thoroughly wet surface with the solution and allow it to remain in contact with the surface for 4 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

See Insert for full directions for use.
**DEFENDER™**

**GENERAL DISINFECTION**

This product DEFENDER is a general disinfectant at 538 ppm available chlorine disinfectant solution effective against Staphylococcus aureus, salmonella enterica, Pseudomonas aeruginosa and cold and flu respiratory syncytial virus, influenza H1N1. Prepare a 538 ppm solution (refer to Dilution Chart). Apply to pre-cleaned surface with mop, cloth, sponge or coarse trigger sprayer. Air dry or let sit for 10 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

**DISINFECTING SURFACES CONTAMINATED WITH HIV AND OTHER VIRUSES AND ANIMAL HOUSING FACILITIES**

**PREPARATION OF USE SOLUTION:** Prepare a 1076 ppm solution (refer to Dilution Chart). Apply solution to pre-cleaned surface with mop, cloth, sponge or coarse trigger sprayer. Allow to air dry or let sit for 10 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

**KILLING HIV-1, Hepatitis B virus & Hepatitis C virus PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS**

In health care settings or other settings in which there is an expected high likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be contaminated include hands, blood and body fluids should be thoroughly cleaned from surfaces and objects before disinfection by application with a clean cloth, mop, and/or sponge saturated with the disinfectant product. Cleaning is to include vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces that are difficult to clean are to be cleaned in an appropriate manner, such as from right to left or left to right, or top to bottom, on vertical surfaces, to minimize spreading of the spores. Restrooms are to be cleaned last. Do not reuse soiled cloths.

**FIRST AID**

**IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Have person sip a glass of water if able to swallow. Do not give anything by mouth to an unconscious person.

**IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice.

**IF INHALED:** Call a poison control center or doctor immediately for treatment advice.

**IF SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

**DISINFECTION FOR SURFACES CONTAMINATED WITH CLOSTRIDIUM DIFFICILE**

Special Label Instructions for Cleaning Prior to Disinfection against Clostridium difficile spores:

**Personal Protection:** Wear appropriate barrier protection such as gloves, gowns, masks or eye covering.

**Cleaning Procedure:** Meticulous surface decontamination must be thoroughly cleaned from surfaces/objects both before and after disinfection. Apply a 4,306 ppm solution, (refer to Dilution Chart) with a clean cloth, mop, cloth, sponge or coarse trigger sprayer. Allow to remain wet for 20 minutes. Allow to air dry. Prepare a fresh solution daily when using closed containers (spray bottles). Prepare a fresh solution weekly when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

**DISINFECTION FOR SURFACES CONTAMINATED WITH TUBERCULOSIS IN 4 MINUTES**

Special Label Instructions for Cleaning Prior to Disinfection against Mycobacterium tuberculosis:

This product when used as directed below is effective against Mycobacterium bovis, Mycobacterium bovis (tuberculosis), Mycobacterium maculatum, Mycobacterium abscessus, Mycobacterium fortuitum, Mycobacterium marinum and Mycobacterium smegmatis. Treat all equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

**PRECAUTIONARY STATEMENTS**

**LANDS AND DOMESTIC ANIMALS**

**DANGER**

Caustic. Causes irreversible eye damage. Harmful if swallowed, inhaled, or absorbed through skin. Do not get in eyes, on skin, or clothing. Avoid breathing dust. Wash respiratory-masks and safety glasses or face shield when making up solution. Wash thoroughly with soap and water after handling, and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse. See additional precautionary and first aid statements inside the label.

**DIRECTIONS FOR USE:** It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read the entire label and use only for the purpose indicated by this product and according to directions and statements on the label.

**HEALTHCARE DISINFECTION**

This product DEFENDER is a Hospital Use Disinfectant. General Healthcare disinfectant (538 ppm available chlorine disinfectant solution) is effective against Staphylococcus aureus, salmonella enterica, Pseudomonas aeruginosa and salmonella enterica; and cold and flu viruses (respiratory syncytial virus, influenza H1N1). Prepare a 538 ppm solution (refer to Dilution Chart). Apply to pre-cleaned surface with mop, cloth, sponge or coarse trigger sprayer. Air dry or let sit for 10 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

**DISINFECTING SURFACES CONTAMINATED WITH HIV AND OTHER VIRUSES AND ANIMAL HOUSING FACILITIES**

**PREPARATION OF USE SOLUTION:** Prepare a 1076 ppm solution (refer to Dilution Chart). Apply solution to pre-cleaned surface with mop, cloth, sponge or coarse trigger sprayer. Let sit for 10 minutes. Allow to air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.
solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food, feed, or drinking water must be rinsed with potable water before reuse.

**To Prevent Cross-contamination**

Prior To Use

To prevent cross-contamination and to sanitize all food processing equipment, use a 3ppm available chlorine (FAC) level of 0.5 – 1.0 ppm is obtained, as determined by use of a reliable test kit. Do not use this product in any chlorinating device which cause fire or explosion.

**PHYSICAL OR CHEMICAL HAZARDS**

STRONG OXIDIZING AGENT: Use only clean dry utensils. Mix only into water. Contamination with moisture, dirt, organic matter or other chemicals (including other chemicals) or any other foreign matter may start a chemical reaction with flaming or burning material such as a lighted cigarette. Do not use this product in any chlorinating device which cause fire or explosion.

**Pesticide** may be acutely hazardous. Wastes resulting from the use of this product must be disposed of on-site, or at an approved waste disposal facility.

**CONTAINER HANDLING**

Nonrefillable container. Do not reseal or refill this container. Offer for recycling if available or puncture and dispose of in a sanitary landfill.

**WARRANTY**

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label. Offer for recycling if available or puncture and dispose of in a sanitary landfill.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage and disposal.

**Pesticide Disposal**

Pesticide may be acutely hazardous. Wastes resulting from the use of this product must be disposed of on-site, or at an approved waste disposal facility.

**FILTRATION DEVICES**

Spray the (or fog) method is generally used to sanitize large, non-porous surfaces such as metal, concrete, and plastic surfaces that have already been cleaned with a disinfectant. Use 3ppm available chlorine (FAC) level of 0.5 – 1.0 ppm is obtained, as determined by use of a reliable test kit.

**DISINFECTION**

Spray the (or fog) method is generally used to sanitize large, non-porous surfaces such as metal, concrete, and plastic surfaces that have already been cleaned with a disinfectant. Use 3ppm available chlorine (FAC) level of 0.5 – 1.0 ppm is obtained, as determined by use of a reliable test kit.

**Spray Method of Sanitizing Equipment**

The spray (or fog) method is generally used to sanitize large, non-porous surfaces that have already been freed of physical soil. It is appropriate for bathtubs; showers; sinks; toilets; natural and synthetic upholstery; and all other interior surfaces of a building. Use 3ppm available chlorine (FAC) level of 0.5 – 1.0 ppm is obtained, as determined by use of a reliable test kit.

**General Rinse Method**

Spray the solutions containing 100 ppm available chlorine (FAC) to sanitize plant floors, walls, ceilings, and doors. Soap can be used to remove debris from grime, dirt, and oil. Use a 3ppm available chlorine (FAC) level of 0.5 – 1.0 ppm is obtained, as determined by use of a reliable test kit.

**Storage and Disposal**

Do not contaminate water, food, or feed by storage and disposal.

**Pesticide Disposal**

Pesticide may be acutely hazardous. Wastes resulting from the use of this product must be disposed of on-site, or at an approved waste disposal facility.

**CONTAINER HANDLING**

Nonrefillable container. Do not reseal or refill this container. Offer for recycling if available or puncture and dispose of in a sanitary landfill.

**PHYSICAL OR CHEMICAL HAZARDS**
