Manufactured for:
OHP, Inc.
PO Box 746
Bluffton, SC 29910-0746
(800) 356-4647

985025

Net Contents: 2.5 Gallons (9.46 L)
PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals: WARNING. Causes substantial but temporary eye injury. Causes skin irritation. Do not get in eyes, on skin or on clothing. Wear protective eyewear (goggles, face shield, or safety glasses). Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

Personal Protective Equipment (PPE) Requirements:

Handlers who may be exposed to the concentrate through mixing, loading, application, and other tasks must wear:
- protective eyewear;
- coveralls worn over short-sleeved shirt and short pants;
- chemical-resistant footwear and socks;
- chemical-resistant gloves, such as barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, polyvinyl chloride and viton;
- chemical-resistant headgear for overhead exposure and;
- chemical-resistant apron when cleaning equipment, mixing or loading.

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. When mixing and loading wear a chemical resistant apron. When cleaning equipment add a chemical resistant apron. Follow the manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

User should:
- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet;
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing;
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

Environmental Hazards: This product may be hazardous to aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or residue.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all directions for use before applying.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 190. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), restricted-entry intervals, and notification to workers. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated area during the restricted-entry interval of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, includes overalls over short-sleeved shirt and short pants, chemical-resistant gloves, such as barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, polyvinyl chloride and viton, chemical-resistant footwear and socks; protective eyewear; and chemical-resistant headgear for overhead exposure.

Non-Agricultural Use Requirements

The requirements of this box only apply to uses of this product that are not within the scope of the Worker Protection Standard for agricultural workers (40 CFR Part 190). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries or greenhouses.

DIRECTIONS FOR MIXING

For 2% formulation, mix 2 gal of product/100 gal of water (4.07 lb Tech/gal). Add sufficient water to the mixing tank to allow proper agitation by pump or paddles. Continue stirring while adding first the KOPA INSECTICIDAL SOAP then the remaining water.

Hard water in excess of 300 ppm should be conditioned to reduce its hardness prior to mixing with KOPA INSECTICIDAL SOAP.

TANK MIXING

KOPA INSECTICIDAL SOAP may be combined with other pesticides to broaden the target spectrum. Improve the level of kill, provide residual kill and enhance coverage. When used as a tank-mix, observe all directions for use, crops, use rates, caution statements, precautions, and limitations, which appear on the tank mix product label. Follow the local directions for the most restrictive of label precautions and limitations. Do not mix this product with any other product that prohibits such mixing. Tank mixtures are permitted only in those states where the tank mix partner is registered. For tank mixing with companion pesticides, use KOPA INSECTICIDAL SOAP at a rate of 1% formulation (1 gallon of concentrate to 100 gallons of water). For example, certain caterpillars and leaf feeding beetles (e.g. Elm leaf beetle) can be controlled with tank mixes of 1 gallon of KOPA INSECTICIDAL SOAP per 100 gallons of water plus a standard pesticide.

Order of Tank Mixing:
- water
- water conditioner (if needed)
- conventional pesticide - add other products in the following order: water-soluble bags, water-soluble powders, dry flowables, liquid flowables, ECs, and soluble materials such as fertilizers.
- KOPA INSECTICIDAL SOAP
Also, if appropriate, give a Tank Mix Compatibility Test: Using a 2 quart jar, add
the proportionate amounts of the products (in order recommended above) to
1 qt water. After thorough mixing, let it stand for 5 minutes. If the combination
remains mixed or can be re-mixed readily, it is compatible. Once compatibility is
proven, use the same procedure for adding required products to the spray tank.
Muriatic and dilute products are incompatible with KOPA INSECTICIDAL SOAP.

Combining this product with sulfur or applying this product within 3 days of sulfur
application may increase the plant damage caused by sulfur on sensitive plants
(e.g., grapes). Do not tank mix KOPA INSECTICIDAL SOAP with sulfur when tem-
peratures are higher than 65°F.

Do not allow tank mixes to sit for longer than 24 hours. Mix and spray as soon as
possible.

KOPA INSECTICIDAL SOAP alone only requires stirring prior to use. Continue to
stir tank mixes of KOPA INSECTICIDAL SOAP with other pesticides throughout
use. If using equipment without pump or paddle, shake often during use. Flush
fluid in sprayer hose lines back into the tank if spraying is interrupted.

APPLICATION INSTRUCTIONS

For field applications apply 2% formulation, 2 gal of product/100 gal of water
(4.07% to 8.1% active), as a rate of 75 to 200 gal/acre (5.10 to 16.25 lbs at 100 gal/acre) using
ground spray equipment. For best results consistent treatment from infestation is
first noticed. Thoroughly spray insect pests or powdery mildew on plants with
diluted product to wetting. Minimum run-off to reduce plant injury on sensitive
plants. KOPA INSECTICIDAL SOAP is a contact spray and is effective in its liquid
state. Pests need to be contacted with spray solution to be effective. Efforts should
be made to thoroughly reach all plant parts including undersides of leaves.

Repeat treatment every one to two weeks as needed. Apply to a maximum of
three consecutive applications to ensure plant injury does not occur. Additional
applications may be possible if previous experience with repeat applications of
the product under the same conditions have not produced plant injury.

May be used on edible crops up to and including day of harvest after a minimum
spray interval of 12 hours.

PESTS/SITES

KOPA INSECTICIDAL SOAP will control powdery mildew and listed insect pests
such as adelgids (woolly aphids), aphids, lacebugs, mealybugs, mites, leaffoppers,
scale insects, plant bugs, sandy larvae (e.g., pear and rose slug), psyllids, tent
caterpillars, spider mites, spirogyra, whitefly.

- Use with care on peaches after delayed dormant stage due to potential for fruit
marking.
- Do not exceed a maximum rate of 100 gal/acre on smooth skinned stone fruit
up to fruit formation.
- Do not exceed a maximum rate of 175 gal/acre on peaches.
- Do not use on yellow skinned nectarines.
- If sandy mold is present on citrus, application of product may result in fruit marking.

Additional restrictions for this use:
- Do not use on table grapes once they become 6-7 mm in diameter (removes
woody bloom) or at least recommended rate (75 gal/acre).

<table>
<thead>
<tr>
<th>Crop</th>
<th>Pest</th>
</tr>
</thead>
</table>
| Small fruits (such as: grape, strawberry, blueberry, raspberry, blackberry, cane
  berries, currants, boysenberry, and chokeberry) | aphids, mealybugs, mites, scale insects, leaffoppers, plant bugs, powdery mildew |
| Ornamental and shade trees (flower and foliage plants, birch, flowering cherry,
  dogwood, evergreens, hawthorn, holly, magnolia, maple, oak, flowering peach,
  pier, pyracantha, sycamore) | aphids, lacebugs, mealybugs, mites, plant bugs, psyllids, sandy larvae, leaffoppers, scale mites, whiteflies, wooly aphids ( adelges), tent caterpillars, powdery mildew |
| Flowering, foliage, bedding plants and houseplants – greenhouse and outdoors | aphids, lacebugs, mites, scale insects, psyllids, leaffoppers, whiteflies, sandy larvae (rose slugs), enameled, powdery mildew |

Additional restrictions for this use:
- For tent caterpillars apply at a rate of 3% formulation (3 gal of product/100 gal
  of water) directly on larvae.
- For Cooley scolyte galls adelges apply at a rate of 4% formulation (4 gal of
product/100 gal of water). Test for tree sensitivity before applying at this rate.

Applications in early spring before bud break or in the fall on hardened off foliage
is recommended.

Additional restrictions for this use:
- For scale insects, spider mites, and scale mites directly on larvae.
- Do not exceed a maximum spray volume of 400 gal/acre on apples.

* Not approved for use in California

Additional restrictions for this use:
- Do not spray when plants are under stress. Do not apply to new seedlings and transplants without determining sensitivity to phytotoxicity. First, do not spray during fruit full. Spray early in morning or evening or when evergreen. Do not apply to evergreens during drought and use caution when treating evergreen trees. Do not use on young trees, evergreens, or nursery stock. Do not use on new growth or new foliage. If concerned about sensitivity of plants, apply to individual plants or small areas and wait a couple of days to determine if plant damage occurs prior to treating larger areas.

USE RESTRICTIONS
Do not spray when plants are under stress. Do not apply to new seedlings and transplants without determining sensitivity to phytotoxicity. First, do not spray during fruit full. Spray early in morning or evening or when evergreen. Do not apply to evergreens during drought and use caution when treating evergreen trees. Do not use on young trees, evergreens, or nursery stock. Do not use on new growth or new foliage. If concerned about sensitivity of plants, apply to individual plants or small areas and wait a couple of days to determine if plant damage occurs prior to treating larger areas.

Use with care when used on azaleas, bleeding heart, cantaloupe, corn, squash, fuchsia, gardenia, geraniums, impatiens, hawthorn, horse chestnut, jade plant, Japanese maple, leaverton, mountain ash, ornamental ivy, peas, succulents. Sensitivity varies with plant varieties. If concerned about sensitivity of plants, apply to individual plants or small areas of plants and wait to determine if plant damage occurs prior to treating larger areas.

Use with care on broccoli. Etros of insects before spraying.

Poinsettias may be sensitive. Do not apply after coloring of flowers has begun.

STORAGE AND DISPOSAL
Do not store in water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store this product in its original container and keep in a secure storage area out of reach of children and domestic animals.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER HANDLING: Nonrefillable container. Do not re-use or refill this container. Triple rinse container on equivalent promptly after emptying. Triple rinse as follows:
- Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinse into application equipment or a mix tank or store rinse for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available.

NOTICE TO BUYER
To the extent consistent with applicable law, seller warrants that this product conforms to the chemical description on this label and is reasonably fit for purposes stated on this label only when used in accordance with directions under normal use conditions. This warranty does not extend to use of this product contrary to label directions, or under abnormal use conditions, or under conditions not reasonably foreseeable by seller. To the extent consistent with applicable law, buyer assumes all risk of any such use. To the extent consistent with applicable law, seller makes no other warranties, either expressed or implied.

KEEP OUT OF REACH OF CHILDREN

WARNING/AVISO

Si usted no entiende la etiqueta busque para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

FIRST AID

IF IN EYES  
Hold eye open and rinse slowly and gently with water for 15-20 minutes. 
Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. 
Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING  
Take off contaminated clothing. 
Rinse skin immediately with plenty of water for 15-20 minutes. 
Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. For emergency information concerning this product, call the OHP, Inc. emergency phone, 24 hours a day, at 1-800-356-4647.

See attached booklet for complete Precautionary Statements and Directions for Use.

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals: WARNING. Causes substantial but temporary eye injury. Causes skin irritation. Do not get in eyes, on skin or on clothing. Wear protective eye-wear (goggles, face shield, or safety glasses). Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

Environmental Hazards: This product may be hazardous to aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinseate.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all directions for use before applying. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protect handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. 
PESTICIDE STORAGE: Store this product in its original container and keep in a secure storage area out of reach of children and domestic animals. 
PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. 
CONTAINER HANDLING: Nonrefillable container. Do not re-use or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows:
Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. 
Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinseate into application equipment or a mix tank or store rinseate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available.
