EPA Reg. No. 7166-60 EPA Est. No. 7166-CA-1

Storage and Disposal:

Container: Store in tightly closed container when not in use. Store in cool, dry place.

Environmental Hazards: This product is toxic to fish and aquatic organisms.

Toxicological Properties: Contains materials which may cause skin irritation. Avoid contact with eyes, skin, and clothing. Wear protective clothing and gloves when handling this product. Wash hands thoroughly with soap and water after handling the product. Do not eat, drink, or smoke when handling this product. Do not contaminate water. CAUTION: Do not breathe dust from this product. Wear dust mask or respirator. Do not contaminate water, food, or feed by storage or disposal. Wash all equipment used to handle this product with soap and water. Contaminated clothing and equipment must be cleaned or destroyed. Do not contaminate water, food, or feed by storage or disposal. Avoid contact with eyes, skin, and clothing. Wear protective clothing and gloves when handling this product. Wash hands thoroughly with soap and water after handling the product. Avoid contact with eyes, skin, and clothing. Wear protective clothing and gloves when handling this product. Wash hands thoroughly with soap and water after handling the product.

Precautionary Statements:

Physical or Chemical Hazards: This product is hot and may cause burns.

Health and Safety Hazards: This product is toxic to fish and aquatic organisms.

Contaminates on Decomposition: do not seal container.

Grose and possible ejection of liquid after explosion. In case of fire, a possible, sound and gas release. Do not put a chemical solution on the container after explosion. Contamination with moisture, organic matter, or other reaction agents may cause a reaction. Do not use as a deicer. Do not use on or in water. Do not use in any environment that is not intended for.

PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals

DANGER: CORROSIVE: Causes irreversible eye damage and skin burns. May be fatal if absorbed through the skin. May be fatal if inhaled. Do not breathe dust or spray mist. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear splash proof apron, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms.

PHYSICAL OR CHEMICAL HAZARD:

STRONG OXIDIZING AGENT. WILL BURN WITH THE EVOLUTION OF CHLORINE AND EQUALY TOXIC GASES. CONTACT WITH WATER SLOWLY LIBERATES IRITATING AND HAZARDOUS CHLORINE CONTAINING GASES. DECOMPOSES AT 460°F TO 480°F WITH THE LIBERATION OF HARMFUL GASES.

Mix only with water. Use clean, dry utensils. Do not add this product to any dispersing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with the generation of heat, liberation of hazardous gases and possible generation of fire or explosion. IN CASE OF FIRE, IF POSSIBLE, ISOLATE CONTAINER IN OPEN AIR OR WELL-VENTILATED AREA. Flood with a large volume of water. IN CASE OF CONTAMINATION OR DECOMPOSITION DO NOT REUSE CONTAINER.

STORAGE AND DISPOSAL:

STORAGE: Keep product in tightly closed container when not in use. Store in cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container in open area if possible and flood with large amounts of water. CONTAINER HANDLING: Nonrefillable container. Do not recompute or refill this container. IF EMPTY: Place in trash collection or offer for recycling if available. IF PARTLY FILLED: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
SWIMMING POOL WATER DISINFECTANT
- Quick Chlorine Boost
- Reduces Chemical Needs
- Controls Algae & Bacteria
- Swim After Use

FIRST AID: Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling the poison control center or doctor.

Move person to fresh air if the person is not breathing. Call 911 or go to the nearest hospital immediately. If on skin or clothing, take off contaminated clothing. Rinse skin with plenty of water for 15-20 minutes. If in eyes: Hold open eye and rinse slowly and gently with water for 15-20 minutes. If swallowed: Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth unless told to do so by a poison control center or doctor.

NOTE TO PHYSICIAN: Probable mucosal damage may occur.

The PRO SIDE™ SUPER SHOCK QUICK Advantages: This patented blend of ingredients works fast allowing swimmers back into the pool in just 15 minutes. This is a premium grade shock product, so it takes only 13.5 oz of PRO SIDE™ SUPER SHOCK QUICK to treat 12,000 to 20,000 gallons of pool water. PRO SIDE™ SUPER SHOCK QUICK can be added directly into the water without pre-dissolving and is ideal for all types of swimming pools. It destroys swimmer wastes and other impurities that cause cloudy water. PRO SIDE™ SUPER SHOCK QUICK dissolves faster than ordinary shock products without leaving residue. It does not increase the pH of the pool water or contain calcium that causes scale build-up.

DO NOT PRE-DISSOLVE IN CONTAINER (ie. bucket) BEFORE APPLYING.

DIRECTIONS FOR USE:
It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DAILY USE: Regularly check chlorine residual with a test kit and chlorinate daily or as needed to maintain 1.0 to 1.5 ppm residual chlorine.

NOTE: 2 1/4 ounces of this compound per 10,000 gallons of pool water will increase an existing chlorine level by 1.0 ppm (1/8 rounded measuring cup = 1 oz).

**WEEKLY USE:***
1. Check the pH of the pool water daily, adding sodium bisulfate or soda ash or equivalent products as necessary to maintain pH in the 7.2-7.6 range. 2. PRO SIDE™ SUPER SHOCK QUICK is made up of fine particles that dissolve almost instantly when applied to water. Use the entire bag for each application. For best results, pour a steady stream of PRO SIDE™ SUPER SHOCK QUICK into the deep end of the pool or pour into the skimmer with the pump operating. Pour near the water surface (particularly if the wind is present while applying) to ensure the entire dose enters the water. 3. Operate the pump system 4-8 hours (minimum) after applying PRO SIDE™ SUPER SHOCK QUICK. 4. Use 13.5 oz. of PRO SIDE™ SUPER SHOCK QUICK to treat 20,000 gallons of pool water every week for best results.

SUPER CHLORINATION: Whenever the pool water loses its sparkle, turns green, or the chlorine residual falls rapidly after regular chlorination, super chlorinate the pool. During the summer months, super chlorinate the pool with 13.5 oz per 6,500 gallons of pool water every 10 to 14 days. Do not use the pool until the chlorine residual has dropped to 3 ppm.

* During Super-Chlorination
† Pool may be used in 15 minutes after adding this product only when chlorine level is at or below 3 ppm.
