PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER, CORROSIVE. Causes irreversible eye damage and skin burns. Harmful if swallowed or absorbed through skin. May be irritating to nose and throat. Do not get in eyes, on skin or on clothing. Wear coveralls worn over long-sleeved shirt and long pants, socks, chemical-resistant footwear, chemical resistant gloves and protective eyewear. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco.

PHYSICAL OR CHEMICAL HAZARDS: Do not mix with other chemicals. Mix only with water.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in any manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions. This product must be loaded and transferred only using a metering-pump system. Open pumping is prohibited.

This product must be loaded and transferred only using a metering-pump system or a closed loading/application system. Open pouring is prohibited. Wear coveralls worn over long-sleeved shirt and long pants, socks, chemical-resistant footwear, chemical resistant gloves and protective eyewear.

RECYCLATING COOLING AND PROCESS WATER SYSTEMS / AIR WASHERS AND INDUSTRIAL AIR SCRUBBING SYSTEMS:

DOSAGE RATES FOR ABOVE APPLICATIONS:

INITIAL DOSE: When the system is noticeably fouled, add 26 to 77 fluid ounces of this product per 1000 gallons (200 to 600 milliliters/1000 liters) of water contained in the system. Repeat until control is achieved.

SUBSEQUENT DOSE: When microbial control is evident, add 13 to 38 fluid ounces of this product per 1000 gallons (100 to 300 milliliters/1000 liters) of water contained in the system. Repeat as needed to maintain control.

Heavily fouled systems must be cleaned before treatment is begun. When used as directed, this product effectively controls algal, bacterial, and fungal slimes in commercial and industrial cooling towers, evaporative condensers, heat exchange water systems, evaporative coolers, dairy sweetwater systems, industrial process water systems, brewery pasteurizers, can warmers, hydrostatic sterilizers and retorts, air washing systems equipped with a mist eliminator, and industrial air scrubbing systems. Add this product at a point of uniform mixing such as the basin area.

PULP, PAPER, AND PAPERBOARD MILLS:

DOSAGE RATES:

INITIAL DOSE: When the system is noticeably fouled, add 5 to 30 pounds of this product per ton of pulp or paper (dry basis) as a slug dose. Repeat until control is achieved. Heavily fouled systems must be cleaned before initial treatment.

SUBSEQUENT DOSE: When biological control is evident, add 3 to 20 pounds of this product per ton of pulp or paper (dry basis) as a slug dose as necessary to maintain control.

This PRODUCT IS ONLY FOR USE IN NON-FOOD APPLICATION, such as Brown Paper Mills, Sheet for Conrugated Board, Kraft Paper, Newspaper and similar paper / paperboard not intended for food contact uses. When used as directed this product effectively controls bacterial and fungal slimes in pulp, paper, and paperboard mill process water systems including white water systems. Treat water at critical areas in the system where mixing of the product will be uniform such as beaters, furnish chest, white-water tank, vacuum pump and head chest. The frequency and duration of the treatment will depend upon the severity of the problem.

DIRECTIONS FOR USE CONTINUED:

ENHANCED OIL RECOVERY SYSTEMS:

DOSAGE RATES FOR ENHANCED OIL RECOVERY SYSTEMS:

When the system is noticeably fouled, or to maintain control in the system, add 4.2 to 420 gallons of this product per 1000 barrels of water as a slug dose for 1-8 hours per day, 1-4 times per week.

NOT FOR USE IN ESTUARINE OR MARINE OIL RECOVERY SYSTEMS. When used as directed this product effectively controls slime-forming and sulfate-reducing bacteria in injection and produced water systems, gas well systems, and other oilfield water systems. Treat water at critical points in the system where water or oil and produced water mix, such as separators, tanks, surge tanks, oil-water separators, before or after injection pumps, and injection well heads.

OIL AND GAS PRODUCTION AND TRANSMISSION PIPELINES AND SYSTEMS:

This product must be added at a point in the pipeline where uniform mixing will occur. The application rate will depend on the length of the pipeline and the severity of biofouling.

This product is effective at controlling microbial growth in waters and on pipe surfaces in fire protection systems. This product must be added to a fire protection system using a chemical metering pump capable of variable pump rates. The product must be injected at a point, such as a fire, manifold or makeup feed water flow where uniform mixing and distribution will occur. Add 100-500 ppm of product (5-39 ppm active ingredient) depending on severity of microbial contamination in the system. Repeat as needed.

FIRE PROTECTION SYSTEMS:

This product is effective at controlling microbial growth in waters and on pipe surfaces in fire protection systems. This product must be added to a fire protection system using a chemical metering pump capable of variable pump rates. The product must be injected at a point, such as a fire, manifold or makeup feed water flow where uniform mixing and distribution will occur. Add 100-500 ppm of product (5-39 ppm active ingredient) depending on severity of microbial contamination in the system. Repeat as needed.

NOTE: Buyer assumes all responsibility for safety and use not in accordance with directions.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Keep product dry and store in a cool dry, well-ventilated area away from heat or open flame. Store in original container.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Environmental Control Authority, or the Hazardous Waste Registration Office at the following EPA Regional Office for guidance.

CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. This container and its contents are hazardous waste. Do not mix or store with other incompatible materials.

WATER TESTING: Use a cleaning solvent before each test. Keep the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water. Replace and tighten closures. Keep out of reach of children.
