For this purpose.

Cleaning Procedure: Fecal matter/waste must be thoroughly cleaned from surfaces/object before disinfection by application with CaviCide Bleach. Cleaning is to include vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces in patient rooms to be cleaned in an appropriate manner, such as right to left or left to right, on horizontal surfaces, and to bottom to top, on vertical surfaces to minimize aerosolization. Foul spores. Restrooms to be cleaned last. Do not reuse disposable protective gloves, gowns, masks and eye covers.

Infectious Materials Disposal: Materials used in the cleaning process that may contain feces/wastes are to be disposed of immediately in accordance with local regulations for infectious materials disposal. This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream, or normally sterile areas of the body, or (2) contacts intact mucous membranes, but is to be used on hard, non-porous surfaces.

For Chemical Emergency ONLY (spill, leak, fire, exposure or accident), call CHEMTREC at 1-800-424-9300

For all other inquiries about this product, call Metrex Customer Care at 1-800-841-1428, Monday through Friday, between 6 a.m. and 4 p.m. Pacific Time.

Storage and Disposal:

- Do not contaminate water, food, or feed by storage and disposal. This product is a multi-purpose cleaner/disinfectant for use on hard, non-porous surfaces.
- Disinfectant does not contain bleach. Do not use this product with other chemicals such as ammonia, toilet bowl cleaners, rust removers, or acid, as this releases hazardous gases.
- For use as a disinfectant on hard, non-porous surfaces.
- Before using this product, always refer to manufacturer’s care instructions before using.
