Chlorinating Tabs
3-in-1 Formula / 3" Tablets

Kills Bacteria
Controls Algae
With Built-in Sunlight Protector

Net Weight: 25 lb (11.3 kg)
Each tablet weighs 1/2 lb

KEEP OUT OF REACH OF CHILDREN
DANGER
See side panel for First Aid and additional Precautionary Statements

ACTIVE INGREDIENT:
Trichloro-s-triazinetrione ................ 99.0%
OTHER INGREDIENTS ...................... 1.0%
TOTAL INGREDIENTS .................... 100.0%
(Available Chlorine: 98%)
STORAGE AND DISPOSAL: Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Do not contaminate food or feed by storage or disposal. CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container (or equivalent) promptly after emptying.

PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: Corrosive: Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or fumes. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or safety glasses, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

PHYSICAL OR CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Do not mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. When using automatic feeding devices, always follow manufacturer’s directions as to the proper addition of sanitizer product to chlorinators. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood area with large volumes of water.

FIRST AID: IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call poison control center or doctor for treatment advice. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. IF SWALLOWED: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. IN CASE OF MEDICAL EMERGENCY, CALL 1-877-800-5553.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

NOTE: User assumes all responsibility for use not in accordance with directions.

EPA REG. NO. 67262-17
EPA EST. NO. 5185-GA-1(c), 7616-CA-1(c)
Letter designation in lot code printed above or below on container identifies actual establishment.
POOL SANITIZATION WITH 3 INCH TABLETS

WHY TO USE THIS PRODUCT: This product is one of the most efficient types of stabilized chlorinating sanitizer for pools with automatic feeders or floaters. This slow dissolving product releases sufficient chlorine to reduce the growth of harmful algae and bacteria in your pool. Unlike unstabilized pool sanitizers such as Calcium Hypochlorite or liquid chlorinating product (bleach), this product contains both chlorine and a stabilizer which reduces chlorine loss from sunlight.

IMPORTANT NOTES:
1. When using other products, as outlined in directions for this product, always follow label directions for those products.
2. Sunlight, rainfall, temperature, number of swimmers and frequency of pool use affect the rate of available chlorine loss. Adjust cleaning and chemical maintenance accordingly. To destroy undesirable compounds, shock pool on a regular basis, typically every 1 to 2 weeks.
3. Use this product in an automatic or floating feeder or skimmer designed for this product.
4. Do not add other chemicals through the skimmer or feeder when using this product – an explosion might occur. Use this product in skimmer only if skimmer and the piping between skimmer and pump are plastic. In vinyl pools, do not leave pump turned off for more than 8 hours when this product is in the skimmer. If pump is turned off for more than 8 hours, bleaching and damage to liner may occur.
5. To avoid damage to pool surface or materials do not allow product to come in direct contact with these materials. Do not throw tablets directly into pool.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in any manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

BEFORE YOU BEGIN:
1. Ensure all pool equipment is working properly. Adjust stabilizer levels to 40-50 ppm with Chlorine Stabilizer.
2. Check water pH, alkalinity and calcium hardness with a test kit. Adjust pH to 7.2-7.6 by adding pH Down to lower pH, or by adding pH Up to raise pH. Adjust alkalinity to 80-125 ppm for plaster pools, 125-150 ppm for vinyl or fiberglass pools by adding Alkalinity Increaser. Adjust calcium hardness to 200-275 ppm for plaster pools, 175-225 ppm for vinyl or fiberglass pools by adding Calcium Hardness Increaser. Be sure to follow label directions.
3. Check residual chlorine level with a test kit and adjust to 1-4 ppm by adding a stabilized granular chlorinator.

NOW USE THIS PRODUCT

START-UP/INITIAL TREATMENT:
1. If water is cloudy or green, superchlorinate pool with appropriate shock product until pool is clear.
2. Test chlorine level and add this product to feeder or floater to bring level to 1-4 ppm. If pool has a plastic skimmer, add one tablet per 10,000 gallons of pool water. Add additional product to maintain a chlorine level of 1-4 ppm.
3. When chlorine level is adjusted to 1-4 ppm, add the algicide appropriate to your needs.

ROUTINE MAINTENANCE:
Fill feeding device with product to ensure constant chlorine level of 1-4 ppm. Check feeding device often and refill as needed.

Re-entry into treated swimming pools is prohibited above levels of 4 ppm chlorine due to risk of body injury.

MANUFACTURED FOR:
Recreational Water Products, Inc.
