FOR USE IN SPAS, SALONS & CLINICS.
JUST PULL, WIPE & TOSS!

Rejuvenate™ Ready to Use Wipes
One Step Disinfectant Cleaner is designed for cleaning and disinfection of hard non-porous surfaces in beauty salons, tanning facilities, spas, nail salons, tattoo parlors, barbershops, and hairstyling establishments. It cleans by removing body oils, dead tissue, soil and all other buildups of organic matter found on hard non-porous surfaces.

It is designed for use on hard, non-porous environmental surfaces such as foot baths, foot spas, pedicure foot spa equipment and esthetic tools and equipment.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Not for personal cleansing. This is not a toilet tissue.

Do not flush in toilet. For canisters that are not intended to be refilled by consumer.

CONTAINER HANDLING: Dispose of wipe in trash after use. Do not reuse or refill this container. Offer empty container for recycling. If recycling is not available, discard container in trash.

NOTICE TO USER: Rejuvenate™ may not be suitable for all items or surfaces. Prolonged exposure to copper, brass, anodized aluminum and some coatings should be avoided.

If you are uncertain as to the material composition of your item, confirm with the manufacturer before proceeding or visit the Compatibility section on www.virox.com for a complete list of new and non-porous surfaces.

Keep out of reach of children.

One-Step Disinfectant Cleaner

FOR USE IN SPAS, SALONS & CLINICS

Active Ingredient: Hydrogen Peroxide
Inert Ingredients: 99.5%
Total: 100.0%

Keep out of reach of children.

For use as a one-step cleaner/disinfector:
1. Pre-clean heavily soiled areas.
2. Pull towelettes from canister and wipe hard, non-porous environmental surfaces.
3. All surfaces must remain visibly wet for 1 minute. Use a 5 minute contact time for Mycobacteria. Use a 10 minute contact time for fungi.
4. Wipe surfaces dry or allow to air dry.

For use as a disinfectant, on hard, non-porous surfaces of foot baths (pedicure foot spa equipment):
1. Drain: Drain the water and remove any visible debris.
2. Clean: Thoroughly clean all surfaces with soap detergent, then rinse with water and drain.
3. Apply: Pull towelettes from canister and wipe all hard non-porous surfaces with the wipe.
4. To Disinfect: All surfaces must remain wet for 1 minute. Use a 5 minute contact time for Tuberculosis and a 10 minute contact time for fungi. Use additional towelettes if needed to ensure correct wet contact time.
5. Rinse all surfaces with fresh water.

Note: Change towelettes frequently to avoid re-deposition of soil.

Read s.d.s. before using product. S.D.S. is available online at www.virox.com

STORAGE AND DISPOSAL

Pesticide Storage: Store this product in a cool area, away from direct sunlight and heat. For canisters that are not intended to be refilled by consumer.

Container Handling: Dispose of wipe in trash after use. Do not flush. Tightly close lid between uses to retain moisture. Non-refillable container. Do not reuse or refill this container. Offer empty container for recycling. If recycling is not available, discard container in trash.

NOTICE TO USER: Rejuvenate™ may not be suitable for all items or surfaces. Prolonged exposure to copper, brass, anodized aluminum and some coatings should be avoided.

If you are uncertain as to the material composition of your item, confirm with the manufacturer before proceeding or visit the Compatibility section on www.virox.com for a complete list of new and non-porous surfaces.

ANTIBIOTIC-RESISTANT BACTERIAL ACTIVITY:
Enterococcus faecalis (VRE)
Escherichia coli (ESBL)
Staphylococcus aureus (MRSA)

FUNGICIDAL: 10 MIN.

In the presence of 5% serum load and a 5 minute contact time on hard, non-porous environmental surfaces.

Trichophyton mentagrophytes (Athlete’s Foot and Nail Fungus)

TUBERCULOCIDAL: 5 MIN.

In the presence of 5% serum load and 5 minute contact time on hard, non-porous environmental surfaces.

Mycobacterium bovis (BCG)

NON-FOOD CONTACT SANITIZER: 30 SEC.

In the presence of 5% serum load and 30 second contact time on hard, non-porous environmental surfaces.

Escherichia coli O157:H7
Klebsiella pneumoniae
Pseudomonas aeruginosa
Salmonella enterica (formerly known as Salmonella choleraesuis)
Staphylococcus aureus

Rejuvenate™ Ready to Use Wipes One-Step Disinfectant Cleaner is designed for cleaning and disinfection of hard, non-porous surfaces in beauty salons, tanning facilities, spas, nail salons, tattoo parlors, barbershops, and hairstyling establishments. It leaves behind no residue, dirt, dust, soil, and all other ballasts of organic matter found on hard, non-porous surfaces. It is designed for use on hard, non-porous and semi-porous environmental surfaces such as foot baths, pedicure foot spa equipment and non-porous surfaces in beauty salons, spas, and other settings in which there is an expected likelihood of direct contact with body fluids. One-Step Disinfectant Cleaner must be used on hard, non-porous surfaces only. 

**DIRECTIONS FOR USE**

1. Drain: Drain the water and remove any visible debris.
2. Clean: Thoroughly clean all surfaces with soap detergent, then rinse with water and drain.
3. Apply: Pull towelettes from canister and wipe all hard non-porous surfaces with a clean cloth or disposable wipes. Do not apply to areas that will be rinsed with water.
4. Disinfect: All surfaces must remain wet for 1 minute. Use a 5 minute contact time for Tuberculosis and a 10 minute contact time for fungi. Use additional features and claims.

**SANITIZER: 30 SEC.**

1. Drain:
2. Clean:
3. Apply:
4. Disinfect:

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Not for personal cleansing. This is not a baby wipe. Do not flush in toilet.

For Use as a One-Step Cleaner/Disinfectant:
1. Pre-clean heavily soiled areas.
2. Pull towelette from canister and wipe hard, non-porous environmental surfaces.
3. All surfaces must remain visibly wet for 1 minute. Use a 5 minute contact time for Mycobacteria. Use a 10 minute contact time for fungi.
4. Wipe surfaces dry or allow to air dry.

For Use as a Tuberculocide:
1. Pre-clean heavily soiled areas.
2. Pull towelette from canister and wipe hard, non-porous environmental surfaces.
3. Allow the surface to remain wet for 5 minutes. Use additional towelettes if needed to ensure the correct wet contact time.
4. Wipe surfaces dry or allow to air dry.
5. Change towelette after each use.

To Kill Fungi:
1. Pre-clean heavily soiled areas.
2. Pull towelette from canister and wipe hard, non-porous environmental surfaces.
3. All surfaces must remain visibly wet for 10 minutes. Use additional towelettes if needed to ensure the correct wet contact time.
4. Wipe surfaces dry or allow to air dry.

For use as a Non-Food Contact Sanitizer:
1. Pre-clean heavily soiled areas.
2. Pull towelette from canister and wipe hard, non-porous environmental surfaces.
3. Allow the surface to remain wet for 30 seconds.
4. Wipe surfaces dry or allow to air dry.
5. Change towelette after each use.

For use as a disinfectant on hard, non-porous surfaces of foot baths (pedicure foot spa equipment):
1. Drain: Drain the water and remove any visible debris.
2. Clean: Thoroughly clean all surfaces with soap detergent, then rinse with water and drain.
3. Apply: Pull towelettes from canister and wipe all hard non-porous surfaces with the wipe.
4. To Disinfect: All surfaces must remain wet for 1 minute. Use a 5 minute contact time for Tuberculosis and a 10 minute contact time for fungi.
5. Rinse all surfaces with fresh water.

Note: Change towelettes frequently to avoid re-deposition of soil.

*SWAYS HIV AND HCV AND HBV ON pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in health care settings and other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood/body fluids, and in which the surfaces/objects likely to be soiled with blood/body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS) Hepatitis B Virus (HBV), or Hepatitis C Virus (HCV).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1, HBV OR HCV ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS:

Personal Protection: Disposable latex or vinyl gloves, gowns, face masks, and eye coverings must be worn during all cleaning of body fluids, blood, and decontamination procedures.

Cleaning Procedures: Blood/body fluids must be thoroughly cleaned from surfaces and objects before application of Rejuvenate™.

Contact Time: Allow surface to remain wet for 1 minute to kill HIV-1, HBV and HCV. Use a 5 minute contact time for Mycobacteria and 10 minute contact for fungi.

Disposal of Infectious Material: Cleaning materials used that may contain blood and other body fluids must be autoclaved and/or disposed of according to Federal, State, and local regulations for infectious waste disposal.

- Mycobacterium bovis (BCG)

FUNGICIDAL: 10 MINUTES
In the presence of 5% serum load and 10 minute contact time on hard, non-porous environmental surfaces.

- Trichophyton mentagrophytes (Athlete’s Foot and Nail Fungus)

BROAD-SPECTRUM NON-FOOD CONTACT SANITIZER: 30 SECONDS
In the presence of 5% serum load and 30 second contact time on hard, non-porous environmental surfaces.

- Enterococcus faecalis (VRE)
- Escherichia coli O157:H7
- Klebsiella pneumoniae
- Pseudomonas aeruginosa
- Salmonella enterica (formerly known as Salmonella choleraesuis)
- Staphylococcus aureus
- Staphylococcus aureus (MRSA)
DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Not for personal cleansing. This is not a baby wipe. Do not flush in toilet.

Re-sealable soft pack:
1. Remove the seal.
2. Remove one sheet at a time.
3. Close the seal to prevent drying between uses.

For Use as a One-Step Cleaner/Disinfectant:
1. Pre-clean heavily soiled areas.
2. Pull towelette from dispenser and wipe hard, non-porous environmental surfaces.
3. All surfaces must remain visibly wet for 1 minute. Use a 5 minute contact time for Mycobacteria. Use a 10 minute contact time for fungi.
4. Wipe surfaces dry or allow to air dry.

For Use as a Tuberculocide:
1. Pre-clean heavily soiled areas.
2. Pull towelette from dispenser and wipe hard, non-porous environmental surfaces.
3. Allow the surface to remain wet for 5 minutes. Use additional towelettes if needed to ensure the correct wet contact time.
4. Wipe surfaces dry or allow to air dry.
5. Change towelette after each use.

To Kill Fungi:
1. Pre-clean heavily soiled areas.
2. Pull towelette from dispenser and wipe hard, non-porous environmental surfaces.
3. All surfaces must remain visibly wet for 10 minutes. Use additional towelettes if needed to ensure the correct wet contact time.
4. Wipe surfaces dry or allow to air dry.
5. Change towelette after each use.

For use as a Non-Food Contact Sanitizer:
1. Pre-clean heavily soiled areas.
2. Pull towelette from dispenser and wipe hard, non-porous environmental surfaces.
3. Allow the surface to remain wet for 30 seconds.
4. Wipe surfaces dry or allow to air dry.
5. Change towelette after each use.

For use as a disinfectant on hard, non-porous surfaces of foot baths (pedicure foot spa equipment):
1. Drain: Drain the water and remove any visible debris.
2. Clean: Thoroughly clean all surfaces with soap detergent, then rinse with water and drain.
3. Apply: Pull towelettes from dispenser and wipe all hard non-porous surfaces with the wipe.
4. To Disinfect: All surfaces must remain wet for 1 minute. Use a 5 minute contact time for Tuberculosis and a 10 minute contact time for fungi. Use additional towelettes if needed to ensure correct wet contact time.
5. Rinse all surfaces with fresh water.

Note: Change towelettes frequently to avoid re-deposition of soil.

STORAGE AND DISPOSAL

PESTICIDE STORAGE: Store this product in a cool dry area, away from direct sunlight and heat. For soft-packs that are not intended to be refilled by consumer.

CONTAINER HANDLING: Dispose of wipe in trash after use. Do not flush. Tightly close flap between uses to retain moisture. Non-refillable container. Do not reuse or refill this container. Offer empty container for recycling. If recycling is not available, discard container in trash.

*KILLS HIV AND HCV AND HBV ON pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in health care settings and other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood/body fluids, and in which the surfaces/objects likely to be soiled with blood/body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS) Hepatitis B Virus (HBV), or Hepatitis C Virus (HCV).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1, HBV OR HCV ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS:

Personal Protection: Disposable latex or vinyl gloves, gowns, face masks, and eye coverings must be worn during all cleaning of body fluids, blood, and decontamination procedures.

Cleaning Procedures: Blood/body fluids must be thoroughly cleaned from surfaces and objects before application of Rejuvenate™.

Contact Time: Allow surface to remain wet for 1 minute to kill HIV-1, HBV and HCV. Use a 5 minute contact time for Mycobacteria and 10 minute contact for fungi.

Disposal of Infectious Material: Cleaning materials used that may contain blood and other body fluids must be autoclaved and/or disposed of according to Federal, State, and local regulations for infectious waste disposal.
