ISO-10

DISINFECTANT FOR HOSPITAL, INSTITUTIONAL AND INDUSTRIAL USE

ISO-10 is a hospital grade disinfectant used to provide effective cleaning, deodorization, and disinfection of non-food contact surfaces. Continued use of the ISO-10 product will assist in controlling surface bacteria in hospitals, nursing homes, medical facilities, laundries and other commercial applications. This product, when used as directed, is formulated to disinfect the following non-porous non-food contact surfaces, inanimate environmental surfaces; floors, walls, metal surfaces, stainless steel surfaces, glazed porcelain, glazed ceramic tile, plastic surfaces, vanity tops, shower stalls, bathtubs, and cabinets. This product meets AOAC Use-Dilution Test Standards for hospital grade disinfectants.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

DISINFECTION: In a clean container, add 3 packets of ISO-10 liquid disinfectant to 1 gallon of tap water. Open 3-pack foil pouch and empty entire pouch contents into the container. If 3 packets are not present, discard contents and open a new foil pouch. Shake in a sealed container vigorously for 30 seconds, add remaining 1/4 gallon of warm tap water to container and shake for an additional 30 seconds. Pour the entire mixture into an open bucket or sprayer. With all surfaces thoroughly wet, allow to remain wet for 10 minutes. Dry before next use. This product is not to be used on non-porous surfaces. To disinfect high level disinfectant on any surface or instrument that is inserted directly into the human body, either inserted or in contact with the bloodstream or normally sterile areas of the body, or to contact intact mucous membranes but which does not penetrate the blood vessel or otherwise enter normally sterile areas of the body. This product may be used to prevent or discontinue critical or semi-critical medical devices prior to sterilization or high level disinfection.

STABILITY OF USE-EXTENSION: For best results, use the solution the day it is mixed. If the diluted product becomes visibly dirty or contaminated, it must be discarded and fresh product prepared. Any use instructions, properly labeled, contained within this product.

BACTERICIDAL ACTIVITY: ISO-10 exhibits effective disinfectant activity against the organisms, Pseudomonas aeruginosa (ATCC 15442) and Staphylococcus aureus (ATCC 6538), repeated after 10 minutes.

CONTACT TIME: 10 minutes.

FOR GENERAL CLEANING: Apply diluted solution to soiled area with a mop, cloth, sponge, hand pump trigger sprayer or low pressure volume sprayer. Thoroughly wet soiled surface. Allow 10 minutes contact time. Surfaces may be thoroughly cleaned in one application and objects before application of this product.

DEODORIZATION: To deodorize a room, apply this product with a mop, cloth, sponge, hand pump trigger sprayer or low pressure volume sprayer as indicated under the heading DISINFECTION.
