STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal. Product Storage: Store this product in a cool, dry area, away from direct sunlight and heat to avoid deterioration. In case of spill, flood area with large quantities of water. Product Disposal: Product or rinse that cannot be used must be diluted with water before disposal in a sanitary sewer.

Container Handling: Reutilize container. Unlabeled container. Do not re-use this container for any other purpose. Clean the container before final disposal is the responsibility of the person disposing of the container. Before cleaning the responsibility of the reclaimer. Offer for recycling if available or puncture and dispose of in a sanitary landfill.

PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals
DANGER: Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear safety glasses and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until strong odors have dissipated.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems of without notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

Physical or Chemical Hazards
STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with chemicals (e.g. ammonia, acids, detergents, etc.) or organic matter (e.g. urine, feces, etc.) will release chlorine gas which is irritating to eyes, lungs and mucous membranes.

SAFETY FIRST AID
If In Eyes: Rinses away Gently and quickly with water for 15-20 minutes. Remove contact lenses. If present, after the first 5 minutes, continue rinsing. Call a poison control center or doctor for treatment advice.

If on Skin: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If Swallowed: After exposure: Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

KEEP OUT OF REACH OF CHILDREN

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with its labeling.

NOTE: This product is dispensed with eye and exposure to sunlight and heat. Use a chlorine free test kit and temperature correction, as necessary. It is an estimate of available chlorine.

APPLICATION OF NEW FORMULATION CONTACT SURFACES

BRINK METHOD: A solution of 10 ppm available chlorine may be used on the contact surface if it is a 10 ppm solution and is applied within 2 hours of application. This is the only solution that may be used in the Brink method. If the solution is not 10 ppm available chlorine, a sanitizing solution must be used in the Brink method.

SANITIZATION OF SURFACES

BRINK METHOD: A solution of 10 ppm available chlorine may be used on the contact surface if it is a 10 ppm solution and is applied within 2 hours of application. This is the only solution that may be used in the Brink method. If the solution is not 10 ppm available chlorine, a sanitizing solution must be used in the Brink method.

SINKING METHOD: A solution of 10 ppm available chlorine may be used on the contact surface if it is a 10 ppm solution and is applied within 2 hours of application. This is the only solution that may be used in the Brink method. If the solution is not 10 ppm available chlorine, a sanitizing solution must be used in the Brink method.

FOOD-BOUND SANITIZATION: Thoroughly clean all equipment. Add 0.05% of this product to 100 gallons of warm water to make a 5ppm available chlorine solution. The sanitization solution should not exceed 100 degrees F. Stir the warm solution so that the agent disperses evenly in the solution and the agit is thoroughly by stirring or before processing. Do not apply a hot water rinse. The solution should not be stored in sanitary age.

FRUIT AND VEGETABLE WASHING: Thoroughly clean all vehicles and equipment in a wash tank. Thoroughly rinse 4 ft. of this product at 200 gallons of water to make a sanitizing solution of 25 ppm available chlorine. After cleaning the tank, substrate and equipment should be rinsed thoroughly with water and again rinsed with cold water at least 3 times. Soak the equipment in the sanitizing solution for a minimum of 5 minutes and during the soaking phase, the solution pH should be maintained at 6-7.

BEAT AND POULTRY PLANTS: For use in Federally Inspected poultry and meat plants, Chlorine may be used to provide processing water and meat and poultry products at concentrations not to exceed 10 ppm available chlorine. Chlorine must be dispersed at a constant and uniform level and the method or system must be such that a controlled rate is maintained. Thoroughly rinse 0.05% of this product to 200 gallons of water to make a sanitizing solution of 5ppm available chlorine, or 5ppm at 200 gallons of water to make a sanitizing solution of 5ppm available chlorine.
