ACTIVE INGREDIENT:
Phosmet (CAS #732-11-6) ........................................ 11.75%
OTHER INGREDIENTS*: ........................................ 88.25%
TOTAL .................................................................... 100.00%

*Contains petroleum distillates.
Contains 1 lb active ingredient per gallon

02-2017 RMX505080® NET CONTENTS: 1 QT (32 FL OZ) 946 ml
CATTLE MAY BE SLAUGHTERED 3 DAYS AFTER TREATMENT.

Do not treat sick, convalescent, stressed, or animals less than 3 months old.

CATTLE MAY BE SLAUGHTERED 3 DAYS AFTER TREATMENT.

Do not treat sick, convalescent, stressed, or animals less than 3 months old.

NOTE TO PHYSICIAN/VETERINARIAN:

Probable mucosal damage may include: salivation, labored breathing, gastrointestinal disturbance, sweating, and pin-point pupils. Usual symptoms of poisoning in animals present aspiration hazard. Usual symptoms of organophosphate poisoning include: salivation, labored breathing, gastrointestinal disturbance, sweating, and pin-point pupils. Atropine is antidotal. 2-PAM is also antidotal and may be administered in cholinesterase inhibitor. If signs of cholinesterase inhibition are present, immediately call a poison control center or doctor. • Do not give anything by mouth to an unconscious person.

FIRST AID

If swallowed • Immediately call a poison control center or doctor. • Do not give anything by mouth to an unconscious person. • Do not give anything by mouth to an unconscious person.

If in eyes • Hold eyes open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes. • Continue rinsing for at least 15 minutes after the flow begins to drip. Fill the container ¼ full with water and shake for 10 seconds. Pour rinsate into application equipment or a mix tank and drain for 10 seconds. Recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank and drain for 10 seconds. Recap.

In cattle, repeat treatment as necessary, but not more than every 7 to 10 days. Treatment for lice, ticks, sarcoptic mange, and from this may be made any time of the year except when cattle graze barrens or in the sulfa or effort period. Consult your veterinarian, extension livestock specialist, or extension entomologist regarding timing of treatment.

If in skin or clothing • Wash contaminated clothing. • Wash immediately with plenty of water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes. • Continue rinsing for at least 15 minutes after the flow begins to drip. Fill the container ¼ full with water and shake for 10 seconds. Pour rinsate into application equipment or a mix tank and drain for 10 seconds. Recap. Shake for 10 seconds.
